### **Cover photos**

Timber Sales in this book are from state trust lands, managed to help build K-12 public schools, state universities, colleges, prisons, mental hospitals, the state Capitol; and to support local services in many counties.

**Top left:** State Forest Lands are managed to provide revenue to the counties in which they are located such as the Pacific County Courthouse in South Bend, Washington. Northwest Bridge Company of Portland, Oregon completed construction of the courthouse building in June of 1911. One unusual feature of the historic building is an "art glass dome" that crowns the structure. The courthouse is listed on the National Register of Historic Places.

## **Certification Opportunities for DNR Timber Purchasers**

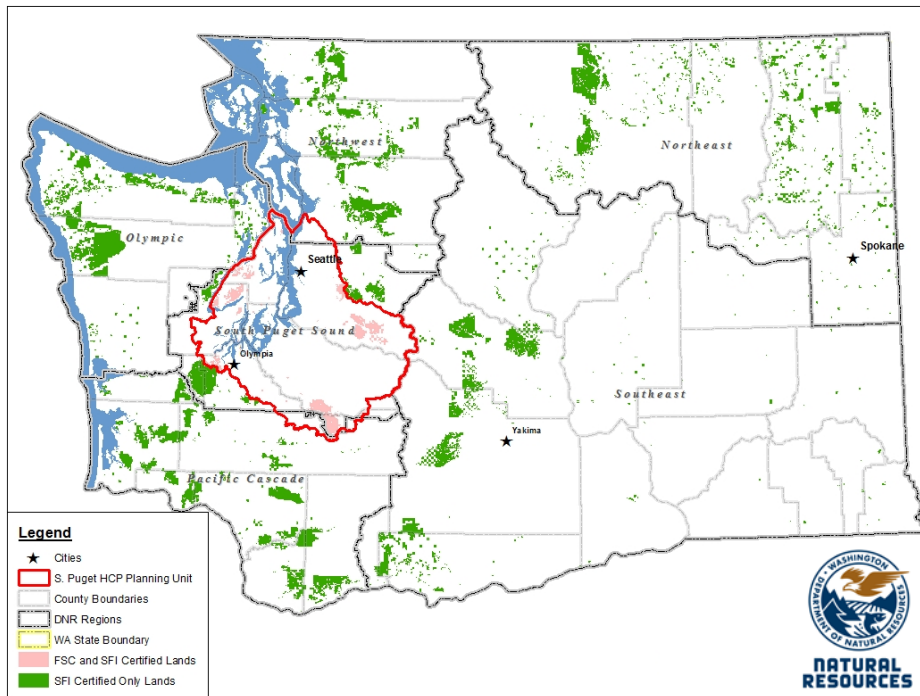

Certified forests are grown to an approved set of standards which demonstrate environmentally responsible, socially beneficial, and economically viable management practices that promote responsible forestry. This unique commitment to responsible forestry recognizes that forest landowners play a critical role in ensuring the long-term health and sustainability of our forests.

Forest Stewardship Council® (FSC®) is an independent, non-profit organization that promotes responsible management of the world's working forests through the development of forest management standards, a voluntary certification system, and trademarks that provide recognition and value to products bearing the FSC label in the marketplace. FSC standards ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way.

Sustainable Forestry Initiative Inc. is an independent, non-profit organization internationally endorsed and accepted around the world. The Sustainable Forestry Initiative® (SFI) program is based on the premise that responsible environmental behavior and sound business decisions can coexist. Its three-chamber Board of Directors governs all aspects of the SFI® program, with equal representation from the environmental, economic, and social sectors.

Currently, all Department of Natural Resources (DNR)-managed forested state trust lands in Washington State are certified under the SFI program Standard. Lands within DNR's South Puget Habitat Conservation Plan Planning Unit, located within parts of King, Pierce, Thurston, Lewis, Kitsap, and Mason counties, are dually certified under both the FSC-US Forest Management Standard and the SFI program Standard.

Certification under each standard involves an inspection audit of the landowner's forest management activities by an independent, accredited third-party to verify that it meets specified forest management principles. If the forest unit complies with the specific standard, the landowner receives a certificate of conformance ensuring that responsible forestry is being practiced. Both standards encourage integration of perpetual growing and harvesting of trees with strong measures to protect wildlife, plants, soil, water, and air quality. Both standards provide a seal of approval that forests certified under these principles are well-managed. The global marketplace recognizes and endorses multiple forest certification standards. Each standard has individual market niches. By being dually certified, DNR can maximize its customer base and provide choices to the consumer.

DNR's FSC certificate number is: BV-FM/COC-080501

DNR's SFI certificate number is: BV-SFIS-US09000572

DNR-managed forested state trust lands within the South Puget Habitat Conservation Plan Planning Unit (located within parts of King, Pierce, Thurston, Lewis, Kitsap, and Mason counties) are certified as being in compliance with the Forest Stewardship Council Pacific Coast Regional Standard.

## **Bidder's/Purchaser's Inspection of Sale Area and Forest Products**

Acreage estimates and volume estimates contained within each timber notice of sale and each timber sale contract are made only for administrative and identification purposes. Except as expressly provided by the timber sale contract, the purchaser shall be responsible for paying the entire purchase price, even if the actual acreage or timber volume varies from the estimated quantity or volume shown.

All prospective bidders have the opportunity and are expected to inspect the sale area and the forest products located thereon. Bidders shall not rely on any representations by the State including, but not limited to, acreage estimates, volume estimates, appraisal or pre-bid documentation. The successful bidder/purchaser will further warrant that they have entered the timber sale contract without any reliance upon the DNR's volume estimates, acreage estimates, appraisals, pre-bid documentation, or any other representation by the DNR.

*Any timber sale contract arising out of these public auctions will require the successful purchaser to warrant that they are entering the timber sale contract based solely upon their own judgment of the value of the forest products, formed after their own examination and inspection of both the timber sale area and the forest products being sold.*
