

Timber, Fish, & Wildlife Policy Committee  
**Policy's Task List**

*The following is a re-formatted task list that a subgroup of Policy revised based on input from the full Committee at the May 2016 meeting.*

Task List

<b>Ongoing Tasks</b> (priority levels: high; medium; low)	<b>Tasks To Do</b>	<b>Completed Tasks</b>
<p><u>Task:</u> Review and respond to the AMPA's <i>Recommendations for Implementing the Unstable Slopes Proposal Initiation</i> (deep-seated and shallow-rapid landslides)  <u>Owner:</u> Policy Committee  <u>Priority:</u> High</p>	<p><u>Task:</u> Develop an action plan to complete implementation of Type N strategy with respect to UMPPF location.  <u>Owner:</u> Policy Committee</p>	<p><u>Task:</u> Develop a Wetlands Research Strategy  <u>Owner:</u> WETSAG/CMER/Policy  <u>Date complete:</u> January 2015</p>
<p><u>Task:</u> SFLOs Westside Alternate Template  <u>Owner:</u> SFLOs Template Subgroup  <u>Priority:</u> Medium</p>	<p><u>Task:</u> Review by rule group the relevant L-1 questions, resource objectives, thresholds, and critical questions, then revisit as projects come up for approval. Type N and Wetlands rule groups are done. Review the remaining in this order: Unstable Slopes, Type F, Roads, Fish Passage, Pesticides, and CMZs.  <u>Owner:</u> Policy Committee</p>	<p><u>Task:</u> Groundwater recharge areas  <u>Owner:</u> UPSAG  <u>Date complete:</u> November 2014</p>
	<p><u>Task:</u> Revisit the mass wasting research strategy with UPSAG. Include a review of the L-1 questions.  <u>Owner:</u> Policy/UPSAG</p>	<p><u>Task:</u> Determine Type F/N regulatory break; implement permanent water typing rules; identify fish habitat  <u>Owner:</u> Policy Committee; various subgroups (both technical and policy)  <u>Date complete:</u> May 2017  <u>Note:</u> While technical work is ongoing on this topic, Policy's role is complete.</p>
	<p><u>Task:</u> Review Hard Rock study chapters.  <u>Owner:</u> Policy, once chapters are ready from CMER.</p>	

## Parking Lot

---

*(strikeouts = recommendations from subgroup to remove from parking lot)*

- CMER streamlining, including:
  - How to maintain science/policy firewall (discussion with CMER and Policy).
  - LEAN process – consider how to increase efficiency and speed up timeline.
  - Increase CMER’s capacity and/or efficiency to do more projects, especially with the additional funding in 2015-17 biennium.
- How to make a stronger coalition for environmental issues that includes diverse stakeholder groups (like the Washington Watershed Restoration Initiative).
- Review how Policy decides to move an informal conversation into a formal process/discussion (like with off-channel habitat discussion).
- Discuss risk tolerance and how much Policy decides to tolerate.
- Consider how to incorporate and improve forest health and fire prevention.
- Develop and implement an AMP communications and outreach strategy for important decisions.
- Economic impact analysis. Define and discuss need for economic impact analyses, including what, when, why, by who, etc.
- Eastside performance targets.
- Review how to proceed with extensiveness monitoring related to fish passage.
- Climate change – consider if and how climate change should be considered in the AMP.
- Determine timing and coordination between compliance monitoring and effectiveness monitoring projects. Compliance monitoring is a DNR program, not part of the AMP, yet still has implications on the work of the AMP.
- Two tasks for DNR, not Policy:
  - Board Manual review/revisions
  - Conduct an independent review every 10 years of the structure, process, and performance of the AMP. To be done by an independent 3<sup>rd</sup>-party research organization and to include considerations such as: structure and function for technical performance, fiscal efficiency, and overall accountability; performance and efficiency of the consensus-based decision process; the rigor of CMER science and responsiveness of CMER to body of Pacific Northwest science; and the interactions of science and policy.
