Part 6–Project Description

6a. Briefly summarize the overall project. You can provide more detail in 6b. [help]

Permit the existing mooring

6b. Describe the purpose of the project and why you want or need to perform it. [help]

When I purchased the 39' Lindsey Globemaster (WN 9735 NF) in the fall of 2010 it was moored in its current location at Friday Harbor. The mooring was an integral part of the package and at the time I believed it to be legal and approved.

Subsequently, I have discovered that even though the mooring is long standing I cannot locate any reference to a current permit.

I access the boat by a dingy that I keep at Friday Harbor Marina, (Berth ST10)

The mooring is long standing. It is very solid and well maintained (I have it checked by a diver annually) and provides excellent service to my boat. (see 6e for more details). I would like a permit because I like the area very much and I am the type of person who just likes everything to be legal and official.

I feel that keeping the boat on its existing mooring is less environmentally disturbing and more secure than me repeatedly dropping an anchor in a similar location.

Mooring is already existing and consist of fully submerged 4 foot x 4 foot concrete block anchors. Galvanized 3/8" High Test chain and 1 ¼" Amsteel blue line (rated in excess of 150,000 lbs) connected to Topper industries mooring buoys constructed from foam filled tire and marine grade aluminum. (These are the same buoys that the state uses in the marine parks). There is a midline float at the transition of chain to Amsteel Blue.

There are two buoys, one stern and one bow.
