General						
Introduction						
Purpose and Need, Plan Organization, Relationship to other Federal, State, Local and Tribal Management						
	page 1- line 2	single out herring as major resource in decline- give detail about decline here or in other relevant section (not Appendix)				
	page 1 para- 2	water quality and habitat affected by industrial practices, also.				
	page 2- list of outcomes	strike conservation- it is not used in later list- p51,52				
	page 2, page 51	e& r outcome is listed as r&e in plan topics- should be consistent				
	page 2, page 51	o&e outcome is listed as e&o in plan topics- should be consistent				
General						
Background						
Cherry Point Reserve Established, Cherry Point Work Group, Common Aim						
	page 4 para 3	should say something about the managemnet guidance- this is too vague. Say something about the technical questions used by the science board				
	page 4 para 4	vague mischaracterization. Should say something about specific concerns of industry and tribe				
	page 4 para 5	misleading- although genesis of CPWG started here- these discussions never part of larger CAC or part of SMP- we have not used the detailed WC info as part of the CPWG process				
General						
Planning Area						
Cherry Point Planning Area, Geographic Location						
	Fig 2	it would be good to differentiate b/w private and unknown ownership				
General						
Land Use/Ownership						
Site Ownership, Background, History of Ownership and Use at Cherry Point						
	page 11, para 2	for ease of reading, identify the three facilities with current lease holders in this paragraph				

	page 11, para5	clarify public beach at Gulf Road and PIT ownership. - does cut out at PIT include Gulf Road area?			
	page 13- needed timeline events	technical vesting of CP and other reserves- 2001			
	page 13- needed timeline events	withdrawal of GSX			
	page 13- needed timeline events	latest renewal date and upcoming date for renewal of leases			
	page 13- needed timeline events	2007 date descriptors need more meat			
	page 13- footnote 6	"I" needs to be defined			
	page 13, para 1	do these two structures need use authorizations/ need to be on map?			
General					
Land Use/Ownership					
Land and Shoreline Management					
	page 14, para 1	is the "new 1100 acre bulk commodities shipping port" that designated PIT (if so, say tentively id PIT)			
General					
Land Use/Ownership					
Resource Management Entities, Supporting and Interested Entities					
	page 17	RE Sources is spelled wrong, technically "RE Sources for Sustainable Communities"			
General					
Management & Regulatory					
Regulatory Framework					
General					
Management & Regulatory					
Clean Air Act, Clean Water Act, HPA					
	page 18- para 1	make clear that Ecology administers CWA program			
General					
Management & Regulatory					
Vessel Traffic, Spills					
General					
Management & Regulatory					
Fish and Shellfish Management, Recreational fishing and shellfish harvesting opportunities					
	page 20, para 4	note which fish are listed			
	page 20, para 4	prey species are mentioned for bull trout- be consistent and mention for all			
	page 20, para 5	define what is meant by comm opps- this does not mean that they are commercially harvested			
	page 20, para 5	are flatfish/ groundfish listed in last sentence really considered "forage fish"			
	page 21, para2	spawn on kelp closed as a fishery according to timeline			
	page 21, para3	should include lbs pop harvested and % of peak population where fishery was closed and present number			
	page 21, para 3	this sentence not clear- answer by who and how-- "A low level fishery..."			

	page 21, para 4	include harvest numbers for both fisheries-- treaty and non-treaty				
	page 21, para5	include areas where sand lance documented to spawn				
	page 22, page 1	how is com fish info set if basic bio not known about surf smelt				
	page 22, para 3	isn't Portage Bay limited to tribal members also				
	page 22, para 4	this info might not be relevant if it changes all of the time, state that subject to closures, and frequently closed- check X website for updated info				
General						
Management & Regulatory						
Public Access and Conservation Opportunities, State-Owned Aquatic Land Management						
General						
Management & Regulatory						
Cultural protection						
General						
Other comments						
Acknowledgement page	Acknowledgement page	Isn't Chris Fairbanks representing the MRC- if so, that should be stated here				
	Acknowledgement page	RE Sources is spelled wrong, technically "RE Sources for Sustainable Communities"				
	Acknowledgement page	please put in titles of Piening and Nightingale				
Figs and Tables	Figs and Tables	please spell out acronyms or put acronym page prior to this one				
Acronyms	Acronyms	SVMP not included

Technical Matter						
Natural Resource Descriptions						
Background, Ecological Zones	page 30- throughout section	This section should include relevant information from lit review and appendix- Right now this section is very light and does not say much of substance (after reading this section I get the feeling of "who cares") This is the section that should show why CP is unique and warranted designation as an aquatic reserve.				
Technical Matter						
Habitat						
Shoreline, Nearshore, Freshwater						
	page 32, para 3	make clear that NR now flows into Bell Bay				
	page 32, para 3	name streams				
	page 32, para 3	include fig with named points, streams and Rivers				
	page 32, para 4	show graphic of detailed habitat with wetlands, marshes,etc-				
Technical Matter						
Species Use, Birds, Marine Mammals						
Species Use - Salmonids, Forage Fish, Other Fish, Shellfish						
	page 33, para 3	hasn't it been shown that forage fish have high degree of fidelity to spawning areas- reword "are believed to return"				
Technical Matter						
Species Use, Birds, Marine Mammals						
Species Use - Birds, Terrestrial and Marine						
Technical Matter						
Species Use, Birds, Marine Mammals						
Species Use - Birds, Terrestrial and Marine						
Technical Matter						
Species Use - Marine Mammals						
Species Use - Birds, Terrestrial and Marine						
Technical Matter						
Non-Native Species						
	page 36 - throughout section					
Technical Matter		The organization of this entire section is poor. I do not understand what this section is trying to do and it is misnamed. Why not call it "Ecological Concerns and Questions" Lead off with the concern statements crafted by the group- then what is known and then the remaining questions. Remaining questions should not be called "Summary"				

Ecological Questions		Why are the concern statements crafted by the group not included here?				
Background/Identify Ecosystems						
	p36-37	organization is poor - question "how they can be conserved" is not answered				
	p 37- summary	organization is poor - this is a summary of what- certainly not what was stated previously				
Technical Matter						
Ecological Questions						
Questions about marine water quality						
		Please rename summary to remaining questions or data gaps- summary is inappropriate				
		A summary would be good to bullet the info of factors that are known. Agreed on				
Technical Matter						
Ecological Questions						
Questions about non-point source water quality and legacy sources						
	p 42	this section needs to be expanded or re-organized- now you only have one subquestion under the overwater structure question that relates to shading, but the initial 2 paragraphs talk about a lot of other effects from overwater structures				
Technical Matter						
Ecological Questions						
Questions about shoreline modification						
Technical Matter						
Ecological Questions						
Questions about overwater structures and artificial lighting						
Technical Matter						
Ecological Questions						
Questions about excessive intermittent sound						
Technical Matter						
Ecological Questions						
Questions about vessel traffic management and spills						
	p 46	shouldn't the upcoming vessel traffic study be cited (one result of Ocean Advocates etal vs ACOE and BP)				
Technical Matter						
Ecological Questions						
Questions about ballast water management						
Technical Matter						
Ecological Questions						

Questions about air quality						
	p 47, para 2	change last sentence to "within these airsheds"

Future of Cherry Point Desired Future Resource Conditions and Management Goals						
Desired Natural Resource Outcomes	page 49-50	DON'T KNOW WHERE THESE GOALS CAME FROM- THEY WERE NOT DISCUSSED BY THE GROUP, ACCORDING TO MY RECOLLECTION				
	p 49, para 2, third sub-bullet	remove the second use of spawning in the phrase				
		what about migratory corridor of bull trout- and other salmonids				
		what about increasing the extent of SAV				
Future of Cherry Point Desired Future Resource Conditions and Management Goals						
Desired Business Outcomes						
		what if some on the CPWG aren't in agreement about one additional pier is OK				
Future of Cherry Point Desired Future Resource Conditions and Management Goals						
Desired Recreational Outcomes						
		what about source of marine biotoxin- nutrient related- why isn't that a goal				
		reduce factors that lead to marine biotoxin, such as nutrient loading				
Future of Cherry Point Desired Future Resource Conditions and Management Goals						
Desired Cultural Outcomes						
Future of Cherry Point Desired Future Resource Conditions and Management Goals						
Resource Management Goals for Cherry Point						
	p 49, para 1	I remember that we decided that the management plan needed to satisfy the goals of an AR or be more protective than an AR.- this is not reflected here.				
		According to the design and implementation guidance of 2005--- "the overall goal of the Aquatic Reserves Program is to ensure environmental protection and preserve and enhance state-owned aquatic lands in order to provide direct and indirect benefits to aquatic resources in Washington State" We need to make sure that our goals enhance the area- not just result in no net loss. The goals in this natural resource section should reflect this.				

		center- As well more description of how they were originated needs to be				
	p 50	what about reduce ind discharges- esp from PBTs and chemicals that contribute to sed. Contamination				
Future of Cherry Point Management Actions	p 51 and p 61 sections	make sense and is confusing to the reader				
Management Principles		future actions can be categorized into protectionm e &R, etc.				
	p 51 , para 4	why 10 years- who decided that? Shouldn't each action be evaluataed on its own merit. Some actions may require no time, others 2 years of assessment and others longer.				
	p 51	the second to last sentences makes no sense				
	p 51	last sentence- change from six to four
