

Peter Goldmark
Washington State
Commissioner of Public Lands

January 22, 2009

The Honorable David Sauter, Chair
Klickitat County Commissioners
205 S Columbus MS: CH-4
Goldendale, WA 98620

Subject: Projection of Income from State Forest Lands

Dear Commissioner Sauter:

The Department of Natural Resources (DNR) manages about 21,693 acres of state forest lands (formerly known as forest board lands) that benefit Klickitat County. As the attached report shows, in calendar year 2008, these lands generated \$491 thousand and are projected to generate \$394 thousand in calendar year 2009. This represents an increase of \$363 thousand from the 2009 projection in the October 2008 report.

Most of this income is from timber sales. Timber markets, supply concerns, contract requirements and regulatory requirements influence when timber purchasers choose to harvest. The revenue projections rely on purchasers' plans for harvest and may change in future reports if those plans change.

The next projection of state forest land revenues will be available in late April 2009. In the meantime, if you have questions about this report, contact Bill Boyum, Southeast Region Manager. Bill can advise you of possible fluctuations in timber harvest and provide information on DNR management programs and activities in your county. Bill can be reached at 509.925.8510.

Sincerely,

Peter Goldmark
Commissioner of Public Lands

County Income Report January 2009

Income from management activities on state forest lands is designated for allocation to several taxing districts in each county, depending upon the location of the activity in that county. Only a very small amount is available for discretionary use by the county.

Revenue from state forest lands (formerly known as forest board lands) comes primarily from harvested timber. Lease activities and rights-of-way applications provide additional sources of revenue. Another source of revenue to the counties is leasehold tax returns, which will vary with the amount of lease activity in any given year.

Table 1 shows the annual revenue for each county from calendar year 1999 through calendar year 2008. As is evident in Table 1, total revenue varies considerably from year to year. Many of the key variables responsible for high revenues in one year can also lead to reduced income the following year.

Revenue projections for each of the 19 counties with state forest lands were made for calendar year 2009. **Table 2** includes the summary of all timber harvest projections listed in Table 2A, and is combined with an estimate of additional revenue from leases, rights-of-way applications, and other activity on state forest lands. **Table 2A** presents projected revenue for each timber sale on state forest lands.

Table 3 presents the volume and net value under contract as of December 31, 2008 that is not currently scheduled for harvest until after December 2009.

These projections were developed by Department of Natural Resources' region staff who contacted each timber sale purchaser with sale rights, to determine approximately how much and when they planned to harvest the timber in each sale.

Projections for each sale's anticipated harvest should be considered a rough estimate only, as actual removal activity depends on individual sale characteristics (species, volume, location, etc.), combined with outside market factors as determined by each purchaser.

The schedule of future state forest land timber sales in your county is available upon request from Department of Natural Resources' region staff.

Table 1. Revenue to Counties from State Forest Transfer and Purchase Lands (Calendar Years)

Note: Revenue is received daily by the Department of Natural Resources for activities on State Forest lands and deposited daily at the Office of State Treasurer. Effective February 1998 these monies are remitted to each county via wire transfer a minimum of four times per month. Due to the specific date monies are received by the Department and the cutoff dates used by the State Treasurer for wire transfers, the revenue for the current period may be different than actual remittances to date.

^{1/} **High - 90 percent reliability that timber harvest will occur and stated revenue will be transmitted.
Medium - 50 percent reliability that timber harvest will occur and stated revenue will be transmitted.**

Note: Projected revenues are based on timber purchaser's logging plans as of [December 2008](#). These plans change with changes in the economy and the business needs of each purchaser. Department of Natural Resources' region staff should be contacted concerning possible fluctuations in timber harvest for sales currently under contract and the schedule of future sales on State Forest Lands in your county.

Table 2A. Projected Timber Harvest Revenues to *Klickitat County* from State Forest Transfer and Purchase Lands by Legal Description
 (Thousands of Dollars)^{1/}

Sale App. Number	Sale Name	Expiration Date	Legal Description			January thru June 2009		July thru December 2009		Value Under Contract after Dec-09
			Section	Township	Range	High	Medium	High	Medium	
76103	Topmart Timber Sale	10/31/09	18 12-14	6N 6N	11E 10E	51.7	51.7	41.3	41.3	0.0

Totals	109,381	\$18,539,756

^{1/} Normally, counties receive 75 percent of State Forest land Transfer revenues and 26.5 percent of State Forest land Purchase revenues.

Note: The sales represented here are currently under contract as of **December 2008**. This timber could be harvested at any time depending on market conditions and business needs as determined by each purchaser. Sales to be sold in the future could provide additional revenue to your county. Department of Natural Resources' region staff should be contacted concerning future sale activity and dates.
