Peter Goldmark
Washington State
Commissioner of Public Lands

February 10, 2012

The Honorable Ray Thayer, Chair
Klickitat County Board of Commissioners
205 South Columbus MS: CH-4
Goldendale, WA 98620

Dear Chair Thayer:

The Washington State Department of Natural Resources (DNR) manages approximately 20,446 acres of State Forest Lands (formerly known as Forest Board Lands) that benefit Klickitat County. These lands generated $209 thousand in calendar year 2011, and are projected to generate $432 thousand in calendar year 2012 from activities expected to occur under current contracts. (See enclosed report.) This represents an increase of $417 thousand from the 2012 projection in the October 2011 report. Net value under contract for harvest after calendar year 2012 is estimated at $234 thousand. This income information does not include anticipated revenues from additional planned activities for which contracts have not been finalized.

Income projections reflect a reduced management fee of 21 percent, (a decrease of 2 percent) per Resolution No. 1368 as approved and adopted by the Board of Natural Resources on October 10, 2011.

The majority of income contained in this report is derived from timber sales. Market conditions, contract requirements, and regulatory requirements influence when timber purchasers choose to harvest. Harvesting could occur earlier if conditions warrant. Changes in purchasers' plans for harvest will be reflected in future reports.

The next projection of State Forest Land revenues will be available in late April 2012. Should you have any questions in the meantime, please contact Todd Welker, Southeast Region Manager, at 509-925-8510 or at todd.welker@dnr.wa.gov. Todd can advise you of possible fluctuations in timber harvest and provide information about DNR management programs and activities in your county.

Sincerely,

Peter Goldmark
Commissioner of Public Lands

Enclosure

County Income Report
January 2012

Income from management activities on state forest lands is designated for allocation to several taxing districts in each county, depending upon the location of the activity in that county. Only a very small amount is available for discretionary use by the county.

Revenue from state forest lands (formerly known as forest board lands) comes primarily from harvested timber. Lease activities and rights-of-way applications provide additional sources of revenue. Another source of revenue to the counties is leasehold tax returns, which will vary with the amount of lease activity in any given year.

Table 1 shows the annual revenue for each county from calendar year 2002 through calendar year 2011. As is evident in Table 1, total revenue varies considerably from year to year. Many of the key variables responsible for high revenues in one year can also lead to reduced income the following year.

Revenue projections for each of the 19 counties with state forest lands were made for calendar year 2012. **Table 2** provides an estimate of projected revenue from all activities on state forest lands. **Table 2A** presents projected revenue for each timber sale on state forest lands.

Table 3 presents the volume and net value under contract as of December 31, 2011 that is not currently scheduled for harvest until after December 2012.

These projections were developed by Department of Natural Resources' region staff who contacted each timber sale purchaser with sale rights, to determine approximately how much and when they planned to harvest the timber in each sale.

Projections for each sale's anticipated harvest should be considered a rough estimate only, as actual removal activity depends on individual sale characteristics (species, volume, location, etc.), combined with outside market factors as determined by each purchaser.

The schedule of future state forest land timber sales in your county is available upon request from Department of Natural Resources' region staff.

Table 1. Revenue to Counties from State Forest Transfer and Purchase Lands (Calendar Years)

Note: Revenue is received daily by the Department of Natural Resources for activities on State Forest lands and deposited daily at the Office of State Treasurer. Effective February 1998 these monies are remitted to each county via wire transfer a minimum of four times per month. Due to the specific date monies are received by the Department and the cutoff dates used by the State Treasurer for wire transfers, the revenue for the current period may be different than actual remittances to date.
