

LIQUEFACTION SUSCEPTIBILITY OF THE GREATER TACOMA URBAN AREA, PIERCE AND KING COUNTIES, WASHINGTON

by Stephen P. Palmer,
William J. Perkins,
and W. Paul Grant

WASHINGTON
DIVISION OF GEOLOGY
AND EARTH RESOURCES

Geologic Map GM-51
June 2003

This research was supported by the U.S. Geological Survey, Department of the Interior, under grant award 99HQGR0073. The views and conclusions contained in this document are those of the authors and should not be interpreted as necessarily representing the official policies, either expressed or implied, of the U.S. Government. Additional financial support was provided by the Washington Department of Natural Resources.

This map is meant only as a general guide to delineate areas prone to liquefaction and cannot be used to determine the presence or absence of liquefiable soils beneath any specific locality. The information provided in this map cannot be substituted for a site-specific geotechnical investigation, which must be performed by qualified practitioners and is required to assess the potential for and consequent damage from soil liquefaction. For additional information, please refer to the enclosed map report.
