

Appendix 3. Location of geochemical samples in the Carnation 7.5-minute quadrangle. All samples collected during the summer of 2009; sample numbers have the year follows by the site number (09-41D). See Appendix 2 for geochemical data, basic sample information including site location information, geologic unit assignment, stratigraphy, sample petrography, and miscellaneous observations. See Appendix 3 for geochemical plots of some of the data. Interpretation of the data and additional geochemical plots are provided in the main open-file report text.
