

Washington Geology and Washington Geologic Newsletter

Our journal, *Washington Geology*, includes original articles about the geology, geologic hazards, and mineral resources of our state. It also contains announcements, reviews, and other items of interest to the geologic community of Washington. This journal is currently on hiatus, but all issues of *Washington Geology* (and its predecessor, *Washington Geologic Newsletter*) are available online in PDF format. Paper copies of recent back issues may still be available—contact geology librarian Lee Walkling at lee.walkling@dnr.wa.gov or 360-902-1473. Issue contents are listed below. Meeting announcements and new publications and ‘Selected Additions to the Washington Geology Library’, which were regular features, have been omitted for brevity.

Washington Geology Issue Index

Washington Geology

[October 2002 \(v. 30, no. 3/4\)](#) [PDF; 4.5 MB]

- Division update, p. 2
- Tertiary flowers, fruits, and seeds of Washington State and adjacent areas—Part III, p. 3
- Hydrangea fossils from the early Tertiary Chuckanut Formation, p. 17
- Book review: Boom towns and relic hunters of northeastern Washington—A comprehensive guide to ghost towns in six historic counties, p. 20
- Earth Connections: Natural resources and your holiday tree, p. 21
- NSF grant establishes microbial observatory at Soap Lake, p. 24

Washington Geology

[July 2002 \(v. 30, no. 1/2\)](#) [PDF; 3.7 MB]

- Division update, p. 2
- The metallic, nonmetallic, and industrial mineral industry of Washington—2001, p. 3
- Washington’s coal industry—2001, p. 8
- Pre-late Wisconsinan glacial outburst floods in southeastern Washington—The indirect record, p. 9
- New aerial photos of northwestern Washington available, p. 16
- Diversion of meltwater from Kautz Glacier initiates small debris flows near Van Trump Park, Mount Rainier, Washington, p. 17
- Murdock Trust grant awarded to Vancouver teacher [Rusty Weaver] and DNR geologist [Patrick Pringle], p. 19

Washington Geology

[December 2001 \(v. 29, no. 3/4\)](#) [PDF; 36.0 MB]

- A division in transition, p. 2
- 1998 debris flows near the Yakima River, Kittitas County, Washington—Some geomorphic implications, p. 3
- Dating the Bonneville landslide with lichenometry, p. 11
- *Skolithos* in a quartzite cobble from Lopez Island—Are western Washington’s oldest fossils Canadian Emigrants?, p. 17
- Port Townsend’s marine science center expands, p. 20
- Earth Connections: Mudpile mountain, p. 22
- Get your geology license now—Don’t procrastinate, p. 24
- Glacier Peak west seismograph is working!, p. 26
- In memoriam: Harry T. Halverson, p. 26
- New State Geologist and Assistant State Geologist confirmed, p. 27
- Staff news: Chris Johnson, Hoa Le, Matt Brookshier, Pat Pringle, Kevin Scott, Fritz Wolff, p. 28

Washington Geology

[September 2001 \(v. 29, no. 1/2\)](#) [PDF; 7.5 MB]

- What’s happening with our publications, p. 2
- The metallic, nonmetallic, and industrial mineral industry of Washington in 2000, p. 3
- Washington’s coal industry—2000, p. 9
- Washington’s fossil forests, p. 10
- Where am I now, and can I take this fossil with me?, p. 20
- On the trail of Washington dinosaurs, p. 21
- Another whale of a tale, p. 28
- Landslide hazard mapping in Cowlitz County—A progress report, p. 30
- Identifying unstable slope conditions, p. 33
- Cutting losses from landslide hazards, p. 34
- A new look at an old landslide—Radiocarbon dates indicate the Bonneville landslide may be far younger than thought, p. 35
- Mount Rainier volcano evacuation plans, p. 38
- Earth Connections: Back to school—Tips for classroom speakers, p. 39
- New monitoring tools help reduce earthquake risks—Shake maps pinpoint hardest hit areas, p. 41
- Spokane earthquakes point to Latah fault?, p. 42
- Insuring future access to geoscience reports, p. 43
- Staff news: Keith Ikerd, Pat Pringle, Kevin Scott, Tim Walsh, Connie Manson, Lee Walkling, p. 44

Washington Geology

[May 2001 \(v. 28, no. 3\)](#) [PDF; 9.0 MB]

NISQUALLY EARTHQUAKE ISSUE

- Earthquake damage minor at the Natural Resources Building, p. 2
- Surviving the Nisqually earthquake, p. 3
- ASCE [American Society of Civil Engineers] Infrastructure Report Card for King and Snohomish Counties, p. 5
- Personal account: Rich Phipps, p. 5
- Working a geologic disaster, p. 6
- USGS contracts \$100 million to U.S. mapmaking companies, p. 18
- Earthquake creates gassy mounds in Offutt Lake, p. 19
- Personal account: Josh Logan, p. 19
- How we measure and earthquake—Magnitude and intensity, p. 20
- Earthquakes in Washington State, p. 22
- Natural Resources Building earthquake mitigation, p. 24
- Observations during the Nisqually earthquake on Harbor Island, Seattle, Washington, p. 25
- In memoriam: Barbara Ann Bjorkman Preston, p. 26

- Guide to 'best available science', p. 26
- Earthquake prediction, p. 27
- Book review: Hiking Washington's geology, p. 28
- The Charlatan Game, p. 29
- The perils of earthquake prediction, p. 30
- Sand dune reactivation and subduction zone earthquakes in the Grayland area, p. 31
- Kirk Bryan Award presented to Brian F. Atwater and Eileen Hemphill-Haley, p. 34
- Earth Connections: Reading a wall, p. 36
- Earth Connections: Do rocks last forever?, p. 38
- A river runs by it [Columbia River Exhibition of History, Science and Technology], p. 40
- DGER is now a USGS Earth Science Information Center, p. 57
- USGS Earth Science Corps marks anniversary, p. 57
- Staff news: Ray Lasmanis, Chuck Gulick, Dave Knoblach, Bill Lingley, Richard Stewart, Steve Boyer, Leslie Lingley, Andy Dunn, Connie Manson, Pat Pringle, Carolyn Driedger, Tim Walsh, Karl Wegmann, p. 58
- Northwest Stone Sculptors Association, p. 58
- American Geophysical Union's position statement on meeting the challenges of natural hazards, p. 59
- Final bill report: Geologist licensing (SB 5206), p. 59
- Washington geologists in the news: Kathy Goetz Troost, Weldon Rau, Wes Wehr, p. 60

Washington Geology

[September 2000 \(v. 28, no. 1/2\)](#) [PDF; 6.8 MB]

- Geologist Licensing Act, p. 2
- The metallic, nonmetallic, and industrial mineral industry of Washington in 1999, p. 3
- Washington's coal industry—1999, p. 9
- Shore platforms at Cape Flattery, Washington, p. 10
- Washington's inactive and abandoned metal mine inventory and database, p. 16
- Holocene Glacier Peak lahar deposits in the lower Skagit River Valley, Washington, p. 19
- Quake forecast shifts to land—Scientists say data show the heart of a huge disaster under the Coast Range and the western Willamette Valley [Oregon], p. 22
- Mount Baker/Glacier Peak Coordination Plan, p. 23
- Abstracts on the geology of Mount Rainier, p. 24
- Earth Connections: Hills, scales, and hiking trails, p. 30
- Earth Connections: Virtual vacation, p. 32
- Resources for educators, p. 33
- Book review: Geology of the North Cascades—A mountain mosaic, p. 35
- Geologist registration bill passes, p. 36
- 'Sunrise to Paradise' [The story of Mount Rainier National Park] honored by AAAS [American Association for the Advancement of Science], p. 41
- Oil and gas lease auction, p. 42
- Book review: The amber forest—A reconstruction of a vanished world, p. 42
- In memoriam: Carl R. McFarland, p. 43
- Selected Internet resources in the geosciences and related fields, with an emphasis on Washington State, p. 44
- Blast from the past: Photo of Mount St. Helens taken April 23, 1983, p. 46

- New National Natural Landmarks regulations, p. 46
- National Park Service Ice Age Floods Study, p. 47
- Geological projects at Washington colleges and universities, p. 48
- Geographic/geologic names on the web, p. 51
- Staff notes: Michael Polenz, Carol Serdar, Phung Ho, Richard Phipps, Donald 'Mac' McKay, Lea Gilbertson, Josh Brown, Tara Salzer, p. 60

Washington Geology

[December 1999 \(v. 27, no. 2/3/4\)](#) [PDF; 5.0 MB]
