BRAND

This brand shall not be used on forest products originating from any other timber sale until notification by the DNR to the Scaling Organization of the brand cancellation assigned to this sale by agreement number this timber sale has been terminated.

Logs are authorized to be weighed only at the following locations: Enter Locations

The approved weighing facility will perform to the following weighing specifications:

1. The scale must be long enough to weigh the entire truck at one time.
2. The scale must print the weight on the weight ticket. Handwritten weights on the weight ticket are not acceptable.
3. The tare weight must be taken on every load. The scale must print the tare weight on the same ticket as the live load weight. (Tare weight is the weight of the unloaded truck; live load weight is the weight of the loaded truck) Average tare weight may be used if approved by the State. If average tare weight is approved by the state a new tare must be established each month.
4. The scale must have been inspected and approved in the last two years by the State of Washington Department of Agriculture or State of Washington Department of Agriculture designee.
5. The scale must be self-zeroing, or must be adjusted by someone other than the truck driver. In cases where the scale must be adjusted manually, the adjustment must not be accessible to the truck driver.
6. Special Provisions: **This contract requires the use of a State approved third party Log and Load Reporting Service (LLRS). Purchaser shall ensure load weight data is received by the LLRS within 24 hours of logs being weighed.**
