Forest Health Workshops

Is your forest healthy?
This forest health workshop is designed to give landowners hands-on experience identifying and measuring factors that affect your forest's health.

Workshop participants will learn to recognize forest problems and how to manage your forest so that it is resilient to insects and diseases.

Landowners will learn how to measure forest health indicators and assess risk in their forests. Afternoon field session will include hands-on measurement of forest stands.

Please note: Half of the workshop will be outdoors so please be prepared for the weather. Workshop will be held rain or shine.

Agenda

9:00 a.m. to 12:00 p.m.
- Identification and management of common forest insects and diseases in eastern Washington.
- Lunch: bring your own.
- Travel to field sites.

12:00 p.m. to 1:00 p.m.
- Identification and management of common insects and diseases in the field.
- Stand density management.
- Measuring forest health indicators.
