

TABLE OF THERMAL AND MINERAL SPRING LOCATIONS IN WASHINGTON

by

Michael A. Korosec

STATE OF WASHINGTON  
DEPARTMENT OF NATURAL RESOURCES  
DIVISION OF GEOLOGY AND EARTH RESOURCES  
OLYMPIA, WASHINGTON 98504

Open File Report No. 80-11

Prepared under Department of Energy Contract  
No. DE-AC07-79ET27014

April 1980

This table contains the names and locations of all thermal and mineral springs within the State of Washington known to the Division of Geology and Earth Resources as of April 1980. They are listed by county and arranged alphabetically. The location is given as Township, Range, and 1/4 of 1/4 of section. The temperature, measured in degrees Centigrade, represents the temperature measured for the warmest spring within a system of springs. The exact temperatures of a few springs are unknown, but have been recorded as being over 20°C (+20) or under 20°C (-20). The flow is an approximation of the total flow of all springs in the area, and is measured in liters per minute. The conductivity (micro-mhos/cm) was measured by a conductivity meter with built-in temperature compensation to 25° during the 1979 field session.

<u>SPRING NAME</u>	<u>T</u>	<u>R</u>	<u>Location</u>		<u>Sec</u>	<u>Temperature</u> °C	<u>Flow</u> l/min	<u>Conductivity</u> umhos/cm
			<u>1/4</u>	<u>1/4</u>
