

# Washington Invasive Ranking System

Washington Natural Heritage Program

## *Mycelis muralis* (Wall Lettuce)

Assessed by

Regina Johnson (Assistant Natural Areas Ecologist, Westside, Washington Dept. of Natural Resources)  
21 November 2024 (WIRS Version 1.5)

---

Ecological Impact Rank: **Insignificant** (16)

Confidence: **High** (83)

---

Management Difficulty Rank: Insignificant (0)

Confidence: High (100)

Biological Characteristics of Invasiveness: Moderate (55)

Confidence: Moderate (37)

Concern Related to Distribution and Abundance: Moderate (56)

Confidence: High (80)

---

### Ranking Notes

Rapid assessment only, based primarily on professional expertise.

### Legal Listings

[Washington State Weed Board](#): No

[Washington Invasive Species Council](#): No

### Section 1: Distribution and Abundance

**Figure 1.** Distribution of counties where *Mycelis muralis* has been documented in Washington State (CPNWH, 2024; EDDMapS, 2024; iNaturalist Community, 2024).

### Q1: Current Range Size in Washington

**Rating:** High

**Confidence:** High

*Mycelis muralis* is found in 72% of counties in Washington State (CPNWH, 2024; EDDMapS, 2024; iNaturalist Community, 2024).

**Source:** Herbarium records and other observations

### Q2: Current Trend in Total Range

**Rating:** Low

Confidence: High

Source: Professional expertise

**Q3: Proportion of Potential Range Currently Unoccupied**

Rating: Low

Confidence: Moderate

Source: Professional expertise

**Q4: Local Range Expansion or Change in Abundance**

Rating: Low

Confidence: Moderate

Source: Professional Expertise

**Q5: Diversity of Ecosystems Invaded**

Ecosystem types: Forest & Woodland

Rating: Low

Confidence: High

May occur incidentally in more open ecosystems, but this species is primarily restricted to forests.

Source: Professional expertise

**Section 2: Biological Characteristics**

**Q6: Aggressive Mode of Reproduction**

Rating: Not Rated

Confidence: Not Rated

Source:

**Q7: Innate Potential for Long-Distance Dispersal**

Rating: Not Rated

Confidence: Not Rated

Source:

**Q8: Potential to be Spread by Human Activities**

Rating: Yes

Confidence: Moderate

Source: Professional expertise

**Q9: Allelopathy**

Rating: No

Confidence: Moderate

Source: Professional Expertise

**Q10: Competitive for Limiting Abiotic Factors**

Rating: Yes

Confidence: Moderate

Source: Professional Expertise

**Q11: Growth Form**

Rating: No

Confidence: Moderate

Source: Professional Expertise

**Q12: Germination Requirements**

Rating: No

Confidence: Moderate

Source: Professional Expertise

**Q13: Invasiveness of Other Plants in Genus**

Rating: No

Confidence: High

*Mycelis muralis* is the only species documented in this genus for North America (Strother, 2022). This plant was formerly in the *Lactuca* genus, which is represented by a number of widespread introduced species in North America.

**Q14: Shade Tolerance**

Rating: High

Confidence: High

Source: Professional Expertise

**Q15: Disturbance Tolerance**

Rating: Yes

Confidence: High

Source: Professional expertise

**Q16: Propagule Persistence**

Rating: Unknown

Confidence: Not Rated

Source:

**Q17: Palatability**

Rating: Unknown

Confidence: Not Rated

Source:

**Section 3: Ecological Impact**

**Q18: Impact on Ecosystem Abiotic Processes**

Abiotic Processes: None listed

Rating: Insignificant

Confidence: Moderate

Source: Professional expertise

**Q19: Impact on Ecosystem Structure**

Rating: Insignificant

Confidence: High

Source: Professional expertise

**Q20: Impact on Ecosystem Composition**

Rating: Insignificant

Confidence: High

Source: Professional expertise

**Q21: Impact on Particular Native Species**

Rating: Insignificant

Confidence: High

Source: Professional expertise

**Q22: Observed Ability to Invade Undisturbed Ecosystems**

Rating: Low

Confidence: Moderate

Source: Professional expertise

**Q23: Observed Ability to Invade Naturally Disturbed Ecosystems**

Rating: Yes

Confidence: High

Source: Professional expertise

**Section 4: Management Difficulty**

**Q24: General Management Difficulty**

Rating: Insignificant

Confidence: High

Source: Professional expertise

**Q25: Minimum Time Commitment**

Rating: Insignificant

Confidence: High

Source: Professional expertise

**Q26: Impacts of Management on Native Species**

Rating: Insignificant

Confidence: High

Source: Professional expertise

**Q27: Inaccessibility of Invaded Areas**

Rating: Insignificant

Confidence: High

Source: Professional expertise

**Q28: Sociopolitical Implications of Management**

Rating: Insignificant

Confidence: High

Source: Professional expertise

**Additional Comments**

None
