I'm just writing to continue offering my support for development of river access site still the Maple Falls DNR parcel. This site is highly needed as a takeout from the Upper Doug Fir Campground launch site and a put-in for Mosquito Lake Road Bridge (Welcome Access) takeout.

This increases public safety and provides a location for public education and river hazard notification.

Thank you, Chris Elder, citizen, ~~_____~~

we need enforcement NOW! Sumas + Red Mountain are over-run w/ illegal trails + ORV riding. The signs DNR put up were taken down almost immediately (an indication of the disrespectful attitude/actions on the part of ORV riders) We want a clear plan of action in regards to signage/enforcement. We want that plan to be made public, along with time lines for action.

DNR leadership needs to allocate funding + seek new funding for enforcement. We need action not vague promises.

Kathleen Leavitt

What is going to happen to Sumas Mt? Concept H does NOT mention anything about it. I do ~~trust~~ ^{trust that} DNR keeps it's word that "Sumas Mt area is not being held back for motorized vehicles!" And DNR is ~~not~~ ^{not} involved with the ~~pulling~~ ^{pulling} zoning change as stated by Glenn Glaser.

I understand 'NO MOTORIZED VEHICLES' signs got posted & were ripped down & stolen within a week! When will they be replaced? How about putting them on a tree out of reach? Aren't there legal charges that could be enforced IF a tree was cut & STOLEN? It is obvious there is no respect for the law because the value of a tree & a sign is insignificant therefore a misdemeanor. A tree is another matter! Please work harder to enforce these laws!
 Thank you
 PEGGY TAPHOUSE

Please continue to consider + pursue access to the Canyon Lake Community Forest – a trail connector would be great for sturdy hikers but road access would be desirable for families w/ small children + less vigorous hikers.

I realize it may be difficult to negotiate ~~the~~ public access via the logging road off of N. Fork Rd (currently gated) but it would be worth the effort.

Thank you!
