SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:
Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:
This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:
Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:
For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. Name of proposed project, if applicable:
   Sandrini
2. Name of applicant:
   Ronald Sandrini
3. Address and phone number of applicant and contact person:
841 Brown Rd. W, Chehalis, WA 98532 (360) 508-0069
Contact Person: Ben Carlsen (253)-740-9772 email: bcarlsen@fmspnw.com
4. Date checklist prepared:
6/24/2022
5. Agency requesting checklist:
Department of Natural Resources.
6. Proposed timing or schedule (including phasing, if applicable): N/A
Upon approval of Department of Natural Resources permits.
7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain. No

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.
None

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.
No

10. List any government approvals or permits that will be needed for your proposal, if known.
Forest Practices Application for the Department of Natural Resources.
11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.) Converting 20.7 acres of forestland into open field.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.
Lat/Long: 46.585128, -122.986734

B. Environmental Elements [HELP]

1. Earth [help]
a. General description of the site:
(circle one): Flat, rolling, hilly, steep slopes, mountainous, other ______________

b. What is the steepest slope on the site (approximate percent slope)?
65
- FPA 2940600 indicates steepest slope to be 50%
c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

General types of soils are silt, loam and clay.

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

Yes. There is some indications of possible unstable slopes along stream A.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

Erosion could occur, but will be limited to that in common to forest practices.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

0%

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

Best management practices as outlined in the Forest Practice Board Manual will be employed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

Normal diesel emission associated with road construction/maintenance and logging.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

NONE PROPOSED.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

There is an unnamed fish stream that runs east to west, thru the middle of the parcel. There is also an unnamed seasonal stream found in the northwest corner of the parcel.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

Yes, Timber harvest will occur no closer than 113' of the fish stream.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

No fill in waters.
4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals, . . . agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

DOES NOT APPLY

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

Runoff common to seasonal rainfall and even-aged harvesting will occur. It will flow into drainage ditches on site.

2) Could waste materials enter ground or surface waters? If so, generally describe.

No

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No
d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:
No

4. Plants [help]
   a. Check the types of vegetation found on the site:
   
   ___ X_deciduous tree: alder, maple, aspen, other
   ___ X-evergreen tree: fir, cedar, pine, other
   ___ X_shrubs
   ___ X_grass
   ___ pasture
   ___ crop or grain
   ___ Orchards, vineyards or other permanent crops.
   ___ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
   ___ water plants: water lily, eelgrass, milfoil, other
   ___ other types of vegetation

   b. What kind and amount of vegetation will be removed or altered? All vegetation will be removed.

   c. List threatened and endangered species known to be on or near the site.
   None

   d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:
   None Proposed

   e. List all noxious weeds and invasive species known to be on or near the site.
   None observed.

5. Animals [help]
   a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

   Examples include:
   birds: hawk, heron, eagle, songbirds, other:
   mammals: deer, bear, elk, beaver, other:
   fish: bass, salmon, trout, herring, shellfish, other

   b. List any threatened and endangered species known to be on or near the site.
   None known.
b. Is the site part of a migration route? If so, explain.
   Yes, this proposal and all of Washington State is part of the Pacific Flyway for migratory
   birds.

d. Proposed measures to preserve or enhance wildlife, if any:
   NONE PROPOSED

e. List any invasive animal species known to be on or near the site.
   None known

6. Energy and Natural Resources  [help]
   a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet
      the completed project's energy needs? Describe whether it will be used for heating,
      manufacturing, etc.
      Oil derived diesel will be used to complete the project.

   b. Would your project affect the potential use of solar energy by adjacent properties?
      If so, generally describe.
      Yes, with timber removed, adjacent properties will see additional solar energy.

   c. What kinds of energy conservation features are included in the plans of this proposal?
      List other proposed measures to reduce or control energy impacts, if any:
      None

7. Environmental Health  [help]
   a. Are there any environmental health hazards, including exposure to toxic chemicals, risk
      of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal?
      If so, describe.
      No

      1) Describe any known or possible contamination at the site from present or past uses.
         None known

      2) Describe existing hazardous chemicals/conditions that might affect project development
         and design. This includes underground hazardous liquid and gas transmission pipelines
         located within the project area and in the vicinity.
         None known

      3) Describe any toxic or hazardous chemicals that might be stored, used, or produced
         during the project's development or construction, or at any time during the operating
         life of the project.
         None will be stored, used or produced.

      4) Describe special emergency services that might be required.
         Emergency services in common to ground based logging practices might be required.
         Generally none.
5) Proposed measures to reduce or control environmental health hazards, if any:
   None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?
   Noise typical of clearcut harvesting in Washington.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.
   In the short-term, diesel logging equipment (Logging Shovels, Tracked Cutting Machines) will produce noise between 7 a.m. and 7 p.m. in common to timber harvesting activity.

3) Proposed measures to reduce or control noise impacts, if any:
   None proposed.

8. Land and Shoreline Use [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.
   Current use of the site is 91 Residential Land - Undivided. Adjacent properties are 18 Other Residential and 91 Residential Land – Undivided.

b. Has the project site been used as working farmlands or working forest lands? If so, describe.
   How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?
   No

1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:
   No

c. Describe any structures on the site.
   None

d. Will any structures be demolished? If so, what?
   No

e. What is the current zoning classification of the site?
   91 Residential Land – Undivided
f. What is the current comprehensive plan designation of the site?
Residential Residential

g. If applicable, what is the current shoreline master program designation of the site?
Does not apply - None

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.
No

i. Approximately how many people would reside or work in the completed project?
Timber harvest proposal = None.

j. Approximately how many people would the completed project displace?
None

k. Proposed measures to avoid or reduce displacement impacts, if any:
DOES NOT APPLY

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:
Application and SEPA review

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:
None proposed

9. Housing [help]
a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.
None

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.
None

c. Proposed measures to reduce or control housing impacts, if any:
None

10. Aesthetics [help]
a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?
No buildings proposed per this application.

b. What views in the immediate vicinity would be altered or obstructed?
The removal of mature trees will alter the view in the immediate vicinity.

c. Proposed measures to reduce or control aesthetic impacts, if any:
   None

11. Light and Glare [help]
a. What type of light or glare will the proposal produce? What time of day would it mainly occur?
   None

b. Could light or glare from the finished project be a safety hazard or interfere with views?
   No

c. What existing off-site sources of light or glare may affect your proposal?
   None

d. Proposed measures to reduce or control light and glare impacts, if any:
   None proposed

12. Recreation [help]
a. What designated and informal recreational opportunities are in the immediate vicinity?
   No recreational opportunities are allowed in the immediate vicinity on all private property.

b. Would the proposed project displace any existing recreational uses? If so, describe.
   No

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:
   None proposed.

13. Historic and cultural preservation [help]
a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.
   No

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.
   No
c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc. Application generates statewide screening measures for sites. This is systematic consultations with OHAP and affected tribes.
d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.
None proposed.

14. Transportation [help]
a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.
None

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?
No

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?
None.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).
NO

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.
No

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?
In general, during logging operations 5-10 vehicle trips are created per day with peak travel between 7:00 a.m. and 4:00 p.m.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.
No

h. Proposed measures to reduce or control transportation impacts, if any:
None proposed

15. Public Services [help]
a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.
No

b. Proposed measures to reduce or control direct impacts on public services, if any.
None proposed.

16. Utilities [help]

a. Circle utilities currently available at the site:
   electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.
None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature:

Name of signee
Ben Carlson

Position and Agency/Organization
Consultant/Engineer

Date Submitted: 7/19/2022

D. Supplemental sheet for nonproject actions [HELP]

(IT IS NOT NECESSARY to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?
Typical to even-aged timber harvest in Western Washington.
Proposed measures to avoid or reduce such increases are:
None proposed.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?
All vegetation will be removed from site, leaving only open field. No marine life is present on site. Any fish found onsite will be unaffected due to the stream being protected from harvest. Animals are transient and will either work around disturbed area or utilize it for forage.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:
A 113’ buffer is in place along stream A to protect the stream.

3. How would the proposal be likely to deplete energy or natural resources?
The proposal by its nature depletes a natural resource (timber).

Proposed measures to protect or conserve energy and natural resources are:
None proposed.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?
The proposal is unlikely to affect the above described areas designated for governmental protection.

Proposed measures to protect such resources or to avoid or reduce impacts are:
None proposed.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?
The proposal is unlikely to affect land and shoreline use because it is already zoned residential and not near any designated shorelines.

Proposed measures to avoid or reduce shoreline and land use impacts are:
None proposed.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?
The proposal is unlikely to increase demands on transportation or public services.

Proposed measures to reduce or respond to such demand(s) are:
None proposed.
7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

The proposal is submitted with no intention of conflicting with any local, state, or federal law or requirements for the protection of the environment.
