DETERMINATION OF NONSIGNIFICANCE

Description of proposal: The project will utilize an existing water delivery system to provide water to DNR managed lands. The land will be irrigated under center pivot circles. Exact number of acres to be irrigated will be determined based on feasibility of soils and leveling associated with topographic constraints. The planned development is approximately 461 irrigated acres +/- . DNR is apply for a new water right from Department of Ecology using Permanent Trust Water and Temporary Trust Water as mitigation. The total cubic feet per second (cfs). will be determined during the application process.

Proponent: Department of Natural Resources

Location of proposal, including street address, if any: All of Section 16, Township 9 North, Range 31 East W.M.

Lead agency: Washington State Department of Natural Resources

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21c.030(2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.

There is no comment period for this DNS

This DNS is issued under 197-11-340(2); the lead agency will not act on this proposal for 14 days from August 5, 2020. Comments must be submitted by August 19, 2020.
