DETERMINATION OF NONSIGNIFICANCE

Description of proposal: The project would use a combination of waste rock and imported clean and inert fill to create reclaimed slopes and improve final topography at a permitted 304-acres mine. Approximately 5.78 million cubic yards, including 2.43 million cubic yards of inert fill, will be imported to the site. The site will be reclaimed to a forestry subsequent use. Surface Mining Reclamation Permit #70-010409

Proponent: Zak Fiorito/AAA Monroe Rock

Location of proposal, including street address, if any: The project is located one mile NE of the city of Monroe at 15421 166th ST SE, Snohomish, WA. Sections 3 and 10, Township 27 North, Range 6 East, W.M., Snohomish County.

Lead agency: Department of Natural Resources

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21c.030(2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.
