October 2017 Results

**SALES OFFERED**
- 13 sales
- 61.1 mmbf
- $20.7 million
- $338/mbf

**SALES SOLD**
- 13 Sales
- 61.1 mmbf
- $29.7 million
- $486/mbf
- Average # of Bids = 3.2
Current Proposal

**Total Proposal**

- 18 sales
- 67.3 mmbf
- $24.3 million
- $362/mbf
Part of an ongoing cooperative study between:

• WA DNR
• USFS Pacific Northwest Research Station
• University of Idaho
• University of Washington

Comparing the visual impacts of timber harvest using different silvicultural systems while maintaining typical timber and revenue production
Each replication consists of six treatments:
1. Clearcut – one-time entry
2. Two-aged stand – one-time entry
3. Patch cuts – new patches every 10 years
4. Group selection cuts – new groups every 10 years
5. Thinning – repeated every 20 years
6. Control – untreated

Three replications in Capitol State Forest:
• Blue Ridge (1998, 2008)
• Copper Ridge (2002, 2012)
• Rusty Ridge (2004, 2014)
Recommend all sales be approved for auction
