## On-Site Suppliers, Vendors and Other Contractors – Vaccination Requirement

The Department of Natural Resources (DNR) is requiring all suppliers, vendors and other contractors working on-site at any DNR work site to be fully vaccinated against COVID-19 or receive an approved exemption no later than Tuesday, November 30, 2021, in accordance with the Governor's [Proclamation 21-14.2 COVID-19 Vaccination Requirement](#). For more information, please see a [copy of our contractor notification](#).

DNR has elected to require its contractors to assume responsibility for verification of COVID-19 vaccination as well as handling disability and religious accommodation requests, although the DNR reserves the right to verify compliance. Contractors are also required to ensure their representatives, including any employees and subcontractors, comply with the COVID-19 vaccination requirement.

To confirm compliance, all suppliers, vendors and other contractors working at a DNR work site must complete and return a COVID-19 Contractor Vaccination Requirement Declaration.

For questions about these requirements, please first review the Proclamation above, and review the [FAQs](#) from the Office of the Governor. Any remaining questions should be sent to: [DNRContractorSupport@dnr.wa.gov](mailto:DNRContractorSupport@dnr.wa.gov)
