

In order to limit the spread of COVID-19 and to protect our employees, we are implementing active screening protocols. The intent of the active screening protocols is to provide a daily health screen at work sites for non-DNR employees who are entering DNR work sites, where social distancing measures cannot be observed. This specifically includes work sites in which DNR employees are being screened including: engine crews, aviation crews and mechanics, hand crews, nursery employees, employees in crew barracks, law enforcement personnel, employees in a dispatch center, and geoduck compliance teams including divers.

A screening area will be designated at the entrance to the DNR work site where non-DNR employees will be screened prior to entering any DNR work site. Screeners will ask a series of questions to check for COVID-19 symptoms and take your temperature. You must follow social distancing protocols while waiting to be screened – and throughout the shift.

You will be asked the following questions (answer NO if attributed to another condition):

- Do you have a fever (100.4°F or higher), or a sense of having a fever?
- Do you have any of the following **new** symptoms: a cough, shortness of breath, sore throat, fatigue, headache, congestion, loss of taste or smell, nausea, vomiting, diarrhea?
- Are you experiencing new muscle aches (myalgia) you cannot attribute to another health condition, or that may have been caused by a specific activity (such as physical exercise)?
- Have you have had close contact within the last 14-days, with someone who is currently sick with confirmed COVID-19? (Note: Close contact – refers to being closer than 6 feet from someone for greater than 15 minutes total (this is a cumulative total within a 24 hour period). Close contact is used when determining possible quarantine needs if a positive case occurs.)

If you would answer YES to ANY of the questions listed above, please contact your supervisor prior to entering a DNR work site as you will not be admitted.

We encourage all of you to stay home and take care of yourself if you feel sick. You should only report to DNR work sites if you feel healthy. Our goal continues to be to provide a healthy and safe work environment for all.

What are the symptoms?

People diagnosed with COVID-19 have reported symptoms that may appear from 2 days to 14 days after exposure to the virus: Fever, Cough, & Difficulty breathing

How can I protect myself from novel coronavirus?

Steps you can take to prevent the spread of novel coronavirus:

- Frequently wash your hands with soap and warm water and use alcohol-based sanitizer.
- Avoid touching your mouth, nose and eyes at all times.
- Cough or Sneeze into your elbow or a tissue, then throw away the tissue immediately.
- Cover your mouth and nose with a [mask](#) when around others who don't live in your household, especially when other [social distancing](#) measures are difficult to maintain.
- Stay home when you are sick. Stay away from people who are sick.

WASHINGTON STATE DEPARTMENT OF
NATURAL RESOURCES

NON-DNR EMPLOYEE COVID-19 HEALTH SCREENING

- Frequently clean and disinfect high-touch and common surfaces.
- Follow social distancing (more than 6 feet) from other individuals.
