

Section 14

Survey Protocol for Marbled Murrelets

WAC 222-12-090 (14) requires that the Pacific Seabird Group survey protocol in effect on January 6, 2003, be used to conduct marbled murrelet surveys. This document, formally titled *Methods for Surveying Marbled Murrelets in Forests: A Revised Protocol for Land Management and Research*, as well as a survey guidance document to assist in implementing the protocol, is available through DNR and Washington Department of Fish and Wildlife Olympia and regional offices. Landowners are encouraged to contact Washington Department of Fish and Wildlife for information regarding conducting protocol surveys.
