

# Carrie Gillum, L.G., L.H.G.

## Hydrogeologist/Editing Assistant

Carrie is a hydrogeologist responsible for serving groundwater well monitoring data to the National Groundwater Monitoring Network as the project lead Hydrogeologist, and assists on other DNR groundwater related projects. This has created professional partnerships between the Washington Geological Survey and local counties in Washington. In addition to hydrogeology, she assists the GIS/Editing section with preparing WGS publications as well as other tasks related to the use of GIS and database management. In prior positions for the WGS, she was a permitting geologist and site inspector for the Surface Mine Reclamation Program. These positions provided exposure to a majority of the State and its diverse geology.
