

2019–2021 School Seismic Safety Project—School Buildings Assessed

Washington Geological Survey / Office of Superintendent of Public Instruction

This table lists the 339 school buildings and subsections of school buildings that were assessed as part of the 2019–2021 School Seismic Safety Project. Concept-level seismic upgrade designs were completed for 17 selected school buildings (marked in green). The designs were developed with the goal of life safety (the building should keep people safe and allow them to evacuate but may not be useable after an earthquake).
