### **COMPLAINT PROCESS – PRIOR TO BID DUE DATE:**

The purpose of a complaint process is to settle unresolved issues or concerns that either were not or could not be resolved during the question and answer period.

Any Bidder may submit a complaint regarding this solicitation based upon the following:

- The solicitation unnecessarily restricts competition;
- The evaluation/scoring process is unfair or flawed; or
- The requirements are inadequate or insufficient so that a response/bid is difficult to prepare.

Complaints not based on procedural matters will not be considered. Complaints will be rejected

as without merit if they address issues such as: 1) an evaluator's professional judgment on the quality of a proposal, or 2) Agency's assessment of its own and/or other agencies needs or requirements.

If no complaint is filed, a Bidder cannot later file a protest based on one of the above complaint criteria.

Any complaint to the solicitation must be in writing and submitted to the Bid Coordinator no less than five (5) business days prior to the date when the bid is due, and shall clearly articulate the basis for the complaint and include a proposed remedy.

Responses to complaints will be articulated in writing, including any resulting changes to the solicitation, and will be posted on WEBS, and the Agency head will be notified.

The Agency's decision is final; no further administrative appeal is available.

#### DEBRIEFING OF UNSUCCESSFUL BIDDERS:

Any Bidder who has submitted a bid and been notified that they were not selected for contract award may request a debriefing. The request for a debriefing conference must be received by the Bid Coordinator within three (3) business days after the Unsuccessful Bidder notification is e-mailed to the Bidder. The debriefing must be held within three (3) business days of the request.

Discussion at the debriefing conference will be limited to the following:

- Evaluation and scoring of the Bidder's bid;
- Critique of the bid based on the evaluation; and
- Review of Bidder's final score in comparison with other final scores without identifying the other firms.

Comparisons between bids or evaluations of the other bids will not be allowed. Debriefing conferences may be conducted in person or on the telephone and will be scheduled for a maximum of one hour.

#### PROTEST PROCEDURE:

This procedure is available to Bidders who submitted a response to this solicitation and who have participated in a debriefing conference. Upon completing the debriefing conference, the Bidder is allowed five (5) business days to file a protest of the acquisition with the Bid Coordinator. Protests must be submitted in writing via e-mail and signed by the protesting party or an authorized Agent.

The protest must state the grounds for the protest with specific and complete statements of the action(s) being protested. A description of the relief or corrective action being requested should also be included.

Bidders protesting this procurement shall follow the procedures described below. Protests that do not follow these procedures shall not be considered. This protest procedure constitutes the sole administrative remedy available to Bidders under this procurement.

Only protests stipulating an issue of fact concerning the following subjects shall be considered:

- A matter of bias, discrimination or conflict of interest on the part of the evaluator;
- Errors in computing the score;
- Non-compliance with procedures described in the solicitation document, or applicable state or federal laws or regulations.

Upon receipt of a protest, a protest review will be held by the Agency. All available facts will be considered and a decision will be issued by the Commissioner of Public Lands or his/her delegate within five (5) business days of receipt of the protest. If additional time is required, the protesting party will be notified of the delay.

In the event a protest may affect the interest of another Bidder who submitted a bid, such Bidder will be given an opportunity to submit its views and any relevant information on the protest to the Bid Coordinator.

The final determination of the protest shall:

- Find the protest lacking in merit and uphold the Agency's action; or
- Find only technical or harmless errors in the Agency's acquisition process conduct and determine the Agency to be in substantial compliance and reject the protest; or
- Find merit in the protest and provide the Agency options which may include:
  - Correct the errors and re-evaluate all bids, quotations and/or proposals; and/or
  - Reissue the solicitation document; and/or
  - Make other findings and determine other courses of action as appropriate.

If the Agency determines that the protest is without merit, the Agency will enter into a contract with the Apparent Successful Bidder.

The Agency protest decision is final and no appeal process will be required. If a protesting Bidder does not accept the Agency protest response, the Bidder may try to seek relief from Thurston County Superior Court.

## **2.6 PROPRIETARY INFORMATION/PUBLIC DISCLOSURE**

Bids submitted in response to this solicitation shall become the property of the Agency. All bids received shall remain confidential until the contract, if any, resulting from this solicitation is signed by the Agency and the Apparent Successful Bidder; thereafter, the bids shall be deemed public records as defined in Chapter 42.56 of the Revised Code of Washington (RCW).

The information must be clearly identified and the particular exemption from disclosure upon which the Bidder is making the claim must be cited. Each page containing the information claimed to be exempt from disclosure must be clearly identified by the words "Proprietary Information" printed on the lower right hand corner of the page. Marking the entire bid exempt from disclosure or as Proprietary Information will not be honored.

If a public records request is made for the information that the Bidder has marked as "Proprietary Information," the Agency will notify the Bidder of the request and of the date that the records will be released to the requester unless the Bidder obtains a court order enjoining that disclosure. If the Bidder fails to obtain the court order enjoining disclosure, the Agency will release the requested information on the date specified. If a Bidder obtains a court order from a court of competent jurisdiction enjoining disclosure pursuant to Chapter 42.56 RCW, or other state or federal law that provides for nondisclosure, the Agency shall maintain the confidentiality of the Bidder information per the court order.

Pursuant to RCW 42.56.120, DNR uses the default fee schedule. However, records may be viewed in person for no fee. **A-21 Non-conformances with Work Schedule**

If Contractor is not in conformance with the Work Schedule for reasons other than acts of Force Majeure, Contractor shall bring its activities into conformance with the schedule or request the Compliance Forester to revise the schedule to reconcile with the actual progress of the Work. The Compliance Forester may require a meeting prior to granting a revision. A revision to the Work Schedule for one Unit shall not change the timing for any other Unit unless expressly authorized. In the event the Contractor stops Work or if the initial start-up is delayed for a period of one (1) week or more, a new Pre-Work Conference may be required.

**A-22 Work Days**

Work shall only proceed on regular Monday through Friday work days. Work on weekends or on designated State holidays requires written permission from the Compliance Forester.

- B. If the contract expires pursuant to clause A-33 without Contractor having performed all its duties under this contract, Contractor's right to operate is terminated and Contractor shall not have the right to remedy the breach. This provision shall not relieve Contractor of any payment obligations.

## SECTION I-B: SPECIFICATIONS FOR THE ACTIVITY

Contractor shall transport and plant Seedlings as described below.

### **B-01 Workers, Supervision, and Equipment**

Contractor shall provide:

- A. A minimum crew size of 8 workers, and a maximum crew size of 14 workers, unless otherwise approved by the Compliance Forester;
- B. Adequate crew supervision, including at least one qualified non-planting, English speaking foreperson per crew, unless otherwise allowed by the Compliance Forester. The foreperson must have one season (at least three (3) months) of tree planting experience. Documentation of a foreperson's experience shall be provided to DNR upon request;
- C. A vehicle that ensures Seedlings shall be transported to the Unit in a covered, unheated compartment, such as an enclosed truck or pickup with canopy. Tarps are not acceptable covering for transport. Shelving or sufficient floor space shall be available so that containers of Seedlings are not stacked more than five high without intermediate support;
- D. Planting shovels for each worker, with minimum blade dimensions of five (5) inches wide and eleven (11) inches long for most Seedling species. Shovel blades shall be at least five (5) inches wide and twelve (12) inches long for red alder Seedlings; and

### **B-02 Boundaries**

The boundaries depicted on Unit Map (Section II-B) delineate the planting area. Contractor is responsible for completing all Work to boundaries. The planting boundaries will consist of easily identifiable features (including but not limited to roads, streams, or abrupt changes in forest type or age). Flagging will be used for areas where identifiable features are absent. Contractor is responsible for understanding the location of all boundaries. Failure to complete Work to boundaries in any Unit renders Work in that Unit incomplete, and no payment will be made to Contractor for any Work on that Unit. No payment will be provided for Unit(s) with Work that extends beyond Unit boundaries. Work extending beyond Unit boundaries will be considered breach of contract. See Clause A-23, above.

### **B-03 Seedling Supply**

DNR will supply Seedlings at the cooler location specified on the map (Section II-D). If DNR's supply of Seedlings is temporarily interrupted, it could cause a delay for Contractor. If needed, the contract may be extended by written agreement to permit completion, or that part of the contract that cannot be completed because of lack of supply will be voided at DNR's discretion.

### **B-04 Substitution of Type of Seedling Stock Types**

If DNR has to substitute Seedlings, adjustment of per thousand Unit Bid Price will be made based on the stock type of new Seedlings pursuant to the following schedule:

| Seedling Stock<br>Type as Per<br>Bid Invitation                   | Substitute<br>Seedling<br>Stock Type                                  | Percent Unit<br>Bid Price<br>Adjustment |
|---|---|---|
| 1+1 or P+1 or P+1/2<br>Or 2+0 or 1+0 or P+0(> 10in <sup>3</sup> ) | P+0 (≤ 10in <sup>3</sup> )  | -10%                                    |
| P+0 (≤ 10in <sup>3</sup> )  | 1+1 or P+1 or P+1/2<br>Or 2+0 or 1+0 or P+0<br>(> 10in <sup>3</sup> ) | +10%                                    |

Table 1: Substitution of Seedling Stock Types

In the event that more than one stock type of Seedlings are required for a planting Unit, the adjustment in Unit Bid Price will be prorated based on the acreage planted with each stock type. In such cases, the entire Unit will use the adjusted price. However, there will be no price adjustments if substitute Stock Type quantities constitute less than 5 percent of the total trees planted on a Unit.

#### **B-05 Weather Conditions**

Planting operations will be halted when the Compliance Forester determines weather conditions are injurious to the Seedlings. Weather conditions during which DNR may not allow planting include, but are not limited to:

- A. Air temperature of less than 32 degrees F (32°F) or greater than 65 degrees F (65°F);
- B. Wind velocity greater than twenty (20) miles per hour;
- C. Soil frozen more than one-half (1/2) inch deep;
- D. Snow cover greater than two (2) inches; or
- E. Less than 50 percent Relative Humidity (RH).

If any of these conditions exist on the site, the Compliance Forester may direct the foreperson to cease operations until weather conditions improve.

#### **B-06 Seedling Care During Transportation and Handling**

Contractor shall transport Seedlings from storage to the Unit(s). Contractor shall comply with all of the following specifications for Seedling care during transportation and handling:

- A. Containers of Seedlings shall be carefully handled at all times. No throwing, dropping, crushing, etc.;
- B. Containers of Seedlings shall be shaded from the sun with a reflective tarp and shielded from winds. Contractor shall have water available on-site for dipping Seedling roots prior to being placed in the planting bags. At the Compliance Forester's verbal request, Seedling roots shall be moistened with water and/or planting bags lined with damp packing material;
- C. Containers of Seedlings shall be stored in a manner that will provide air circulation around each container. When containers are stored in snow banks, snow shall be placed around each container;
- D. Seedlings will be distributed to the workers so that no more than one container per Seedling stock type will be open at the assembly point at one time;
- E. Opened containers of Seedlings shall be immediately resealed. Contractor shall supply tape and/or stapler to reseal and have them available on the Work site at all times;
- F. Seedlings carried by a worker shall be in a planting bag and arranged for easy removal of one Seedling at a time. Planting bags shall not be overfilled. Seedlings should be placed in planting bags without shaking or removing soil from the roots. Seedlings should be placed in the planting bag by cupping the roots and guiding the roots into the bag. Seedlings should not be grabbed at the root collar and stuffed into the planting bag;
- G. Seedlings shall not be removed from the planting bag before a planting hole has been prepared;
- H. Seedlings shall be planted as received without pruning or culling, unless directed to do so by the Compliance Forester;

- I. If mold, dry roots, freezing, drying, or evidence of other injury is observed on any Seedlings, Contractor shall cease planting such damaged Seedlings, and the condition shall be immediately reported to the Compliance Forester. If available, other Seedlings shall be used until the Compliance Forester has decided whether or not the damaged Seedlings can be planted;
- J. At the end of the Work day, Seedlings which have been distributed but not planted shall be sealed and returned to the cooler; and
- K. Contractor shall keep Seedlings free from damage at all times, including but not limited to: drying, heating, smothering, freezing, drowning, or mechanical injury.

## **B-07 Spacing and Number of Seedlings**

Contractor shall plant Seedlings as follows:

### **A. Total Seedlings Per Acre**

‘Total Seedlings per Acre’ means the estimated number of Seedlings to be planted per acre, averaged over an entire Unit, or a contiguous area within a Unit. This number varies between Units, and is listed in the Unit Description (Section II-A).

### **B. Seedlings Per Acre by Species**

‘Seedlings per Acre by Species’ means the number of Seedlings of an individual species to be planted per acre, averaged over an entire Unit, or a contiguous area within a Unit. If only one species is to be planted over a Unit, or a contiguous area within a Unit, this number is the same as the Total Seedlings per Acre. If multiple species are to be planted over a Unit, or a contiguous area within a Unit, then the sum of all the Seedlings per Acre by Species will equal the Total Seedlings per Acre.

### **C. Average Spacing**

‘Average Spacing’ means the average distance (in feet) between planted Seedlings in the Unit, that will result in the correct number of Total Seedlings per Acre after planting, when Seedlings are planted in a grid pattern. Average spacing may be different for each unit, or for contiguous areas within a Unit, therefore Seedlings will be planted over the Unit at the Average Spacing listed in the Unit Description (Section II-A).

### **D. Minimum Spacing**

Seedlings shall not be planted closer together than the Minimum Spacing (in feet) specified in the Unit Description (Section II-A), from:

1. Another Contractor-planted Seedling;
2. An acceptable previously planted Seedling; or
3. An acceptable natural Seedling

Acceptable previously planted or natural Seedlings are conifer Seedlings which are at least twelve (12) inches tall, well formed, and vigorous.

### **E. Variation to Average Spacing**

The spacing of individual Seedlings may vary within the limits of the Minimum Spacing, so long as average spacing is maintained.

## **B-08 Line Planting Method**

Contractor’s planting crew(s) will use the “line” method of planting, unless otherwise permitted by the Compliance Forester. Each worker will only plant one (1) line at a time on each pass. Seedlings planted within each line, and adjacent lines, will both be at the Average Spacing as specified in the Unit Description (Section II-A).

## **B-09 Satisfactorily Planted Seedlings**

Contractor shall plant Seedlings according to all of the following criteria in order for Seedlings to be considered 'Satisfactorily Planted'.

### **A. Preparation of Planting Spot**

A 'Planting Spot' is a spot where a Seedling is planted, that meets all the conditions for Preparation and Clearing as described here:

1. 'Preparation' for planting a Seedling shall include the Clearing of an area with a minimum diameter of one (1) foot that is free of debris that could end up in the planting hole. The Planting Spot shall be located as near to the center of this cleared area as is practicable.
2. 'Clearing' means the removal of duff up to eight (8) inches deep, loosely compacted slash up to two (2) feet deep, and other debris accumulations such as rock, rotten wood, snow, and ice which can be removed by kicking, dragging, or the use of a planting tool.

### **B. Unplantable Spots**

An 'Unplantable Spot' is a spot that does not meet the conditions for Preparation and Clearing, or is closer than the Minimum Spacing specified in the Unit Description (Section II-A). Examples of spots that are considered 'Unplantable' include, but are not limited to, large stumps, boulders, areas of exposed bedrock, sites with large woody brush, and sites with debris accumulations deeper than two (2) feet. Contractor shall not attempt to plant Seedlings in Unplantable Spots.

### **C. Planting Hole Location and Excavation**

The planting hole shall be located and excavated as follows:

1. The planting hole shall be located in mineral soil and as near the center of the Planting Spot as is practicable;
2. Where possible, the planting hole shall be located near stumps, logs, dead brush, or other dead shade to provide protection from animal damage, winds, and solar radiation; and
3. The planting hole shall be vertical, broken out on three sides, and shall be wide and deep enough to fully accommodate the roots of the Seedling being planted.

### **D. Seedling Placement in Planting Hole**

Seedling placement in the planting hole shall be as follows:

1. All Seedlings shall be suspended near the center of the planting hole with the roots in a near natural arrangement;
2. Seedlings shall be at a depth that after filling, packing and leveling, the soil comes to a point midway between the top lateral roots and the lowest needles or branches;
3. The roots shall not be doubled up, twisted, tangled, or bunched;
4. Moist mineral soil shall be filled in and firmly packed around roots. The Seedling should not pull loose after a firm tug on the main stem; and
5. The planted Seedling shall have the main stem and roots vertical and free to grow.

## **B-10 Seedling Waste by Contractor**

Wasted Seedlings are those that have been dumped, dropped, discarded, mishandled, damaged, or otherwise wasted by Contractor. Wasted Seedlings shall be considered a breach of contract. See Clause A-23, above.

## SECTION I -C: UNIT COMPLIANCE INSPECTION AND PAYMENT

### C-01 Field Inspections

The Compliance Forester will conduct periodic inspections. Inspections may be done concurrently with Work but will be completed no later than five (5) business days after Work completion on the Unit.

### C-02 Inspection Plots

The Compliance Forester will install Inspection Plots to assess whether Seedlings have been Satisfactorily Planted (Clause B-09) and meet all Special Planting Requirements (Clause B-11, if applicable), according to the spacing and species requirements listed in the Unit Description (Section II-A). Inspection Plots shall be circular and be between one fiftieth ( $1/50^{\text{th}}$ , 16.7 foot radius) and one one-hundredth ( $1/100^{\text{th}}$ , 11.8 foot radius) of an acre in size. There will be a minimum sample of five (5) plots, or two (2) plots for every five (5) acres of Unit, whichever is greater. The Inspection Plots will be well distributed throughout the Unit. The Compliance Forester will record the number of Planting Spots, Seedlings Planted, Satisfactorily Planted Seedlings, Dropped or Wasted Seedlings, and make written comments for each Inspection Plot as described below. In addition to making observations about planted Seedlings, the Compliance Forester may dig up one or more planted Seedlings per Inspection Plot to determine if Seedlings are Satisfactorily Planted.

#### A. Planting Spots

The number (#) of Planting Spots will be calculated for each Inspection Plot as follows:

$$\# \text{ of Planting Spots} = \# \text{ of Expected Planting Spots} - \# \text{ of Unplantable Spots}$$

1. The number of 'Expected Planting Spots' is calculated for each Inspection Plot by dividing the Total Seedlings per Acre (from the Unit Description, Section II-A) by the inverse of the plot size being used for compliance (e.g, divide by 50 if using  $1/50^{\text{th}}$  acres plots) and rounding to the nearest whole number.
2. The number of Unplantable Spots (Clause B-09-B) is calculated for each Inspection Plot by visually estimating the percentage of the area of the Plot that is Unplantable, multiplying it by the number of Expected Planting Spots, and rounding to the nearest whole number.

**Example:** Total Seedlings per Acre = 500 and 20% of the Inspection Plot is Unplantable.

|   |                    |    |
|---|--------------------|----|
| The number of Expected Planting Spots is: | $500 / 50 =$       | 10 |
| The number of Unplantable Spots is:       | $20\% \times 10 =$ | 2  |
| The number of Planting Spots is:          | $10 - 2 =$         | 8  |

#### B. Seedlings Planted

'Seedlings Planted' is the number of Contractor-planted Seedlings within the Inspection Plot, including both Seedlings that are Satisfactorily Planted and those that are not. Although this number is not used in the Seedling Planting Performance Rating (Clause C-03), it may be used by the Compliance Forester to demonstrate examples of Unsatisfactorily Planted Seedlings to the Contractor, when the number of Seedlings Planted is greater than the number of Satisfactorily Planted Seedlings.

#### C. Satisfactorily Planted Seedlings

The number of Satisfactorily Planted Seedlings is the number of Contractor-planted Seedlings within the Inspection Plot that meet all applicable specifications of Clause B-09, Clause B-11, and the Unit Description (Section II-A). This number will be less than or equal to the number of Seedlings Planted because Seedlings that are not Satisfactorily Planted will be deducted. Examples of Seedlings that will not be counted include, but are not limited to, those that have been planted: closer than the Minimum Spacing (Clause B-07-D); without proper Preparation and Clearing of the Planting Spot (Clause B-09-A); or in Unplantable Spots (Clause B-09-B). In addition, planted Seedlings will not be counted if the planting hole has been improperly located or excavated (Clause B-09-C), or if the seedling placement in the hole is inadequate because the roots

are damaged or bent, the Seedling is buried too deep, or the soil is not packed firmly around the roots (Clause B-09-D).

**D. Wasted Seedlings**

The Compliance Forester will record the combined number of Wasted Seedlings (as defined in Clause B-10) found on the Unit. Such Seedlings can be on individual Inspection Plots, elsewhere in the Unit, or where Seedlings are unloaded prior to planting. Wasted Seedlings include those that are damaged by the Contractor to the extent that they cannot be planted or replanted, due to Contractor's failure to meet the requirements for transportation and handling (Clause B-06), Satisfactorily Planted Seedlings (Clause B-09), or other Special Planting Requirements (Clause B-11, if applicable).

**C-03 Seedling Planting Performance Rating**

The Compliance Forester will calculate the 'Seedling Planting Performance Rating' for each Unit. The Seedling Planting Performance Rating will be expressed as a percent and will be calculated using the sum (or aggregate) of all Inspection Plots in a Unit. The total of all recorded values for Satisfactorily Planted Seedlings (Clause C-02-C), divided by the total of all recorded values for Planting Spots (Clause C-02-A), multiplied by one hundred (100), equals the Seedling Planting Performance Rating percent:

$$\frac{\text{Total Satisfactorily Planted Seedlings}}{\text{Total Planting Spots}} \times 100 = \text{Seedling Planting Performance Rating \%}$$

**C-04 Determination of Payment by Unit**

The acceptability and the Rate of Pay for planting Work performed will be based on the Seedling Planting Performance Rating (Clause C-03) for each Unit.

**A. Satisfactory Planting Performance**

'Satisfactory Planting Performance' on the Unit is when the Seedling Planting Performance Rating is between 92 percent and 105 percent.

**B. Unsatisfactory Planting Performance**

'Unsatisfactory Planting Performance' on the Unit is when the Seedling Planting Performance Rating is greater than 105 percent or less than 92 percent, or the Unit is not planted to boundaries.

**C. Rate of Pay**

The 'Rate of Pay' is the actual amount (in dollars) that the Contractor will be paid per thousand Seedlings for each Unit. The Rate of Pay is equal to the Unit Bid Price for Units with Satisfactory Planting Performance. The Rate of Pay is the Unit Bid Price minus any reductions in payment (Clause C-04-D) for Units with Unsatisfactory Planting Performance. The Rate of Pay will not exceed the Unit Bid Price for any Unit.

**D. Reduction in Payment**

The reduction in payment for Unsatisfactory Planting Performance on a Unit will be calculated for the Unit as follows:

1. If the Seedling Planting Performance Rating is less than 92 percent but equal to or greater than 80 percent, the Rate of Pay will be equal to the Unit Bid Price reduced by 3 percent for every 1 percent the Seedling Planting Performance Rating is less than 92 percent.
2. If the Seedling Planting Performance Rating is less than 80 percent, or if the Unit is not planted to boundaries, there will be no payment.
3. If the Seedling Planting Performance Rating is greater than 105 percent, the Rate of Pay will be equal to the Unit Bid Price reduced by 3 percent for every 1 percent the Seedling Planting Performance Rating is above 105 percent.

4. The Contract Manager will deduct from Contractor's payment three dollars (\$3) per Seedling found Wasted by Contractor (Clause C-02-D).

## **C-05 Payment Examples**

**Example A:** The Unit Bid Price is \$66 per thousand and the Seedling Planting Performance Rating is 80 percent.

The Seedling Planting Performance Rating of 80 percent is 12 percentage points less than the 92 percent minimum performance threshold. A 3 percent reduction for each of the percentage points below that threshold equals a total reduction in the Unit Bid Price of 36 percent. Therefore, 100 percent minus 36 percent equals 64 percent. The Rate of Pay for the Unit is calculated by multiplying 64 percent by \$66/thousand = \$42.24/thousand.

**Example B:** The Unit Bid Price is \$78 per thousand and the Seedling Planting Performance Rating is 107 percent.

The Seedling Planting Performance Rating of 107 percent is 2 percentage points greater than the 105 percent maximum performance threshold. A 3 percent reduction for each of the percentage points above that threshold equals a total reduction in the Unit Bid Price of 6 percent. Therefore, 100 percent minus 6 percent equals 94 percent. The Rate of Pay for the Unit is calculated by multiplying 94 percent X \$78/thousand = \$73.32/thousand.

## **C-07 Re-work of Unsatisfactory Units**

The Compliance Forester may require Contractor to re-work a Unit that has an Unsatisfactory Seedling Planting Performance Rating (Clause C-03). The Compliance Forester may require the re-work to be completed prior to starting Work on a new Unit. The Compliance Forester will take new Inspection Plots and calculate a new Seedling Planting Performance Rating for re-worked Units, which will replace the previous Seedling Planting Performance Rating.

If Contractor refuses to re-work the Unit, DNR may then pursue its available remedies for either breach (Clause A-23) or default (Clause A-24) of contract. If Contractor re-works the Unit and it is rated unsatisfactory a second time, DNR may consider this breach or default of contract.

The Compliance Forester is not required to give Contractor the opportunity to re-work Unit(s) with Unsatisfactory Seedling Planting Performance Ratings (Clause C-03). In some cases, DNR may not have the additional staff needed to perform contract compliance for such re-work, and Contractor's overall performance on this contract may indicate that Contractor will be unable to improve the quality of Work enough to justify the additional time and expense of re-working Unit(s). In these cases, the Compliance Forester may choose to simply calculate the correct reduction in payment in accordance with Clause C-04-D and allow Contractor to continue Work on other Unit(s).

## **C-08 Payment Schedule**

The default payment schedule will be one monthly payment to Contractor, following completion of each full calendar month, unless otherwise approved by Contract Manager. If a different schedule is requested by either party, it will be agreed upon during the Pre-Work Conference (Clause A-19) and will be set forth in the Work schedule. Payment shall be made as follows:

### **A. Partial Payment**

Contractor may request partial payment when part of a Unit is completed.

### **B. Unit Completion Form**

Contractor or Designated Contract Representative shall sign the Unit Completion Form after completion of each partial Unit being submitted for payment, or at the conclusion of Work and completion of the

Compliance Inspection for each Unit. The Compliance Forester will make payment recommendations for the invoice and forward the Unit completion form to the Contract Manager for processing.

**C. Verification Traverse**

If a Unit's acreage is disputed, Contractor may request a verification traverse by DNR. The request must be in writing and signed by Contractor. DNR will base the rate of pay on the acres determined from the verification traverse. If the net acres specified in the Unit Description (Section II-A) are correct within plus or minus five percent ( $\pm 5\%$ ) after the verification traverse, Contractor shall pay for the verification traverse at a rate of ten dollars (\$10.00) per one hundred (100) feet of traversed boundary.
