Any Bidder may submit a complaint regarding this solicitation based upon the following:

- The solicitation unnecessarily restricts competition;
- The evaluation/scoring process is unfair or flawed; or
- The requirements are inadequate or insufficient so that a response/bid is difficult to prepare.

Complaints not based on procedural matters will not be considered. Complaints will be rejected as without merit if they address issues such as: 1) an evaluator's professional judgment on the quality of a proposal, or 2) Agency's assessment of its own and/or other agencies needs or requirements.

If no complaint is filed, a Bidder cannot later file a protest based on one of the above complaint criteria.

Any complaint to the solicitation must be in writing and submitted to the Bid Coordinator no less than five (5) business days prior to the date when the bid is due, and shall clearly articulate the basis for the complaint and include a proposed remedy.

Responses to complaints will be articulated in writing, including any resulting changes to the solicitation, and will be posted on WEBS, and the Agency head will be notified.

The Agency's decision is final; no further administrative appeal is available.

DEBRIEFING OF UNSUCCESSFUL BIDDERS:

Any Bidder who has submitted a bid and been notified that they were not selected for contract award may request a debriefing. The request for a debriefing conference must be received by the Bid Coordinator within three (3) business days after the Unsuccessful Bidder notification is e-mailed to the Bidder. The debriefing must be held within three (3) business days of the request.

Discussion at the debriefing conference will be limited to the following:

- Evaluation and scoring of the Bidder's bid;

This procedure is available to Bidders who submitted a response to this solicitation and who have participated in a debriefing conference. Upon completing the debriefing conference, the Bidder is allowed five (5) business days to file a protest of the acquisition with the Bid Coordinator. Protests must be submitted in writing via e-mail and signed by the protesting party or an authorized Agent.

The protest must state the grounds for the protest with specific and complete statements of the action(s) being protested. A description of the relief or corrective action being requested should also be included.

Bidders protesting this procurement shall follow the procedures described below. Protests that do not follow these procedures shall not be considered. This protest procedure constitutes the sole administrative remedy available to Bidders under this procurement.

Only protests stipulating an issue of fact concerning the following subjects shall be considered:

- A matter of bias, discrimination or conflict of interest on the part of the evaluator;
- Errors in computing the score;
- Non-compliance with procedures described in the solicitation document, or applicable state or federal laws or regulations.

Upon receipt of a protest, a protest review will be held by the Agency. All available facts will be considered and a decision will be issued by the Commissioner of Public Lands or his/her delegate within five (5) business days of receipt of the protest. If additional time is required, the protesting party will be notified of the delay.

In the event a protest may affect the interest of another Bidder who submitted a bid, such Bidder will be given an opportunity to submit its views and any relevant information on the protest to the Bid Coordinator.

The final determination of the protest shall:

- Find the protest lacking in merit and uphold the Agency's action; or
- Find only technical or harmless errors in the Agency's acquisition process conduct and determine the Agency to be in substantial compliance and reject the protest; or
- Find merit in the protest and provide the Agency options which may include:
 - Correct the errors and re-evaluate all bids, quotations and/or proposals; and/or
 - Reissue the solicitation document; and/or
 - Make other findings and determine other courses of action as appropriate.

If the Agency determines that the protest is without merit, the Agency will enter into a contract with the Apparent Successful Bidder.

The Agency protest decision is final and no appeal process will be required. If a protesting Bidder does not accept the Agency protest response, the Bidder may try to seek relief from Thurston County Superior Court.

SECTION I-B: SPECIFICATIONS FOR THE ACTIVITY

Contractor shall perform pre-commercial thinning work as described below.

B-01 Precedence between Sections

Section I-B covers the general standards that apply over the whole contract. If a change is required on a site by site basis those differences will be outlined on the Unit Description Form (Section II-A). The site specific details found on the Unit Description Form should take precedence over these general guidelines when they exist. If special requirements noted in the Unit Description conflict with requirements in this Section, the special requirements will prevail.

B-02 Boundaries

The boundaries depicted on Unit Map (Section II-B) delineate the thinning area. Contractor is responsible for completing all Work to boundaries. The thinning boundaries will consist of easily identifiable features (including but not limited to roads, streams, or abrupt changes in forest type or age). Flagging will be used for areas where identifiable features are absent. Contractor is responsible for understanding the location of all boundaries. Failure to complete Work to boundaries in any Unit renders Work in that Unit incomplete, and no payment will be made to Contractor for any Work on that Unit. No payment will be provided for Unit(s) with Work that extends beyond Unit boundaries. Work extending beyond Unit boundaries will be considered breach of contract. See Clause A-06, above. |

B-03 Contractor shall furnish:

The Contractor shall provide all of the following at its own expense:

- A. A minimum crew size of 10 workers, and a maximum crew size of 14 workers, unless otherwise approved by the Compliance Forester;
- B. Adequate crew supervision, including at least one qualified non-thinning, English-speaking foreperson per crew, unless otherwise allowed by the Compliance Forester. The foreperson must have one season (at least three (3) months) of precommercial thinning experience. Documentation of a foreperson's experience shall be provided to the DNR upon request;
- C. All equipment and supplies for mechanical treatment, as well as any specific tool requirements that are detailed in the Unit Description (Section II-A);
- D. All safety equipment;
- E. All costs of operation and maintenance not specifically furnished by the DNR;

B-04 DNR shall furnish:

- A. Compliance Forester(s) to acquaint the Contractor with each unit to be worked and to conduct periodic field inspections.
- B. Boundary marking and access to the unit as reasonably necessary to complete the contract.

B-05 Thinning Methods

Selection of leave trees or crop trees will be made by the Contractor according to the following specifications. One thinning procedure is recognized and described below as well as in the Unit Description table (Section II-A). One pruning procedure is recognized and designated for each unit in the Unit Description Table.

A. Simple Spacing Thinning

When thinning on a spacing basis, Contractor will select and leave uncut the largest live conifer trees of good form and vigor that will maintain the average spacing designated in the Unit Description Table. To maintain average spacing, Contractor may not need to cut as many trees immediately adjacent to gaps. However, clumps or patches should not be left unthinned to make up gaps in the stand. Spacing is the average distance between trees that will result in the correct number of tree left per acre. The number of trees left per acre will be measured by DNR to determine compliance with the Per Acre Zone of Acceptance as described in Clause C-02.

B-06 Order of Selection of Leave Trees

The order of selection of leave or crop trees will be as follows:

A. Leave the tallest, straightest single stem with the largest crown and free of damage due to animals, insects, disease, physical or mechanical causes.

B. Maintain specified average number of trees per acre.

C. Maintain specified average spacing.

D. Select crop tree by species in the following order unless otherwise specified in the Unit Description:

1. Ponderosa pine
2. Douglas-fir
3. Grand fir

E. Western white pine, whitebark pine, western larch and western redcedar do not count as part of the prescribed spacing grid. None shall be thinned, nor considered within the spacing requirements.

F. If no healthy, undamaged tree exists within the required spacing, leave the tree with the least damage.

G. Leave tree clumps are designated areas to receive no treatment. Approximate location of Leave Tree Clumps are designated in the Contract Maps. Size of Leave Tree Clumps shall be 0.5 acres +/- 20 percent.

B-07 Trees to Be Cut

Except for crop or leave trees specified above and in the Unit Description Table, the Contractor shall cut the following:

A. All surplus conifer trees more than one (1) foot in height will be considered for treatment.

B. All surplus trees less than 7" in DBH will be targeted for treatment in the thinning area (Units 1, 2, 3, 4). Trees greater than 7" and greater in DBH will be included in the spacing guidelines and are not considered "ghost trees."

C. When trees over the maximum cut DBH are present, leave trees shall be spaced off those trees. The spacing may be varied up to plus or minus 20% of the designated distance in order to leave the most desirable trees. The designated distance for each unit in this task order is 30

feet, which would amount to variance of leave trees between 24 – 36 feet. In areas where the majority of the trees are over the DBH cut limit, spacing is expected to be less than the 30 x 30-foot goal.

D. When leave trees are of equal size and vigor, select the leave tree according to the preferred conifer. A lower priority species that is at least 25% taller than the height of an adjacent higher priority species shall be left as the leave tree.

E. A forked tree shall not have only one stem cut. The whole tree shall be cut down unless it is the most desirable leave tree, then all stems are to be left standing.

F. Conifer trees shall be cut in a way that does not damage leave trees. Any tree to be felled can be girdled instead in order to minimize leave tree damage.

G. The State retains the right to designate individual trees to be cut or left standing.

B-08 Cut Trees

Trees will be cut below the lowest live limb and cut completely free of the stump. Cut trees must not be left "hung up" or leaning against crop trees. Stumps shall not exceed a six (6) inch height.

B-09 Progression of Daily Work

Contractor work shall progress in an orderly fashion to avoid accidentally leaving untreated areas, with workers regularly connecting treated areas. At the end of each work day, no "islands" of untreated areas shall be left within areas that have been treated.

B-10 Resource Protection Requirements

A. Trees felled into streams shall be removed and streams shall be left in their original state. If certain streams will be protected and cutting will not be permitted within the specified area, they will be designated on the Unit Map.

B. No cutting or slashing is allowed within 50 feet of an intermittent stream channel or within 100 feet of a perennial stream channel. Watercourses identified during project preparation are located in Contract Maps. Any additional watercourses encountered during project implementation are the responsibility of the contractor to identify and buffer accordingly and notify contract administrator.

B-11 Fences and Improvements

Contractor shall not damage fences and other improvements (e.g., water developments, monumented corners, road surfaces and/or drainage structures) within or adjacent to the Units during the thinning operation. Any such damage will be repaired at Contractor's expense back to existing condition prior to damage. Trees adjacent to fences or other improvements shall be felled away. All slash falling on fences and other improvements shall be removed and distributed back into the unit by Contractor. Trees and slash felled onto lands not owned by the State shall also be removed and distributed back into the unit.

B-12 Slash in Roads and Buffer Zones

Slash or debris resulting from the pre-commercial thinning operation, that falls into roads, ditches, road banks, or designated buffer zones, shall be removed by Contractor and redistributed within the thinned Unit(s) at the end of every day, or more often on well-traveled roads.

B-13 Special Requirements

A. Slashing Procedures

- a. All conifers within size class, species priority, or spacing distance as stated in thinning procedures are to be cut.
- b. All slash created by the slashing operation shall be lopped on 3 sides of the bole, scattered and bucked to within 2 feet of the ground. Boles will be bucked to lengths of 6 feet or less no matter what the diameter.
- c. Slash generated will be pulled back 6 feet along both sides of all traveled roads and trails, within units and on one side where unit is just on one side of road. This work is considered incidental to the slashing work.
- d. No hang-ups or operational damage is allowed.
- e. All slash shall be pulled back and away from leave trees. All pullback slash shall be scattered throughout the unit to achieve a slash depth not greater than 2 feet. Pull back distance shall be a minimum of 6 feet from trees.
- f. Slash generated from each day of work shall be removed from roadways, ditches, and from the top of cut banks along all traveled roads in the project area, even if not shown on project maps or as identified. This slash shall be pulled back by the end of each workday.
- g. Slash may not be placed/spread onto private or other property besides Forest Service lands.
- h. Old slash from previous logging activity and natural blow down, will be cut (6' lengths) and pulled back from leave trees. Pull back would be performed on all dead woody debris from 3" to 12" (diameter) in size and would be pulled back a minimum of 6 feet away from leave trees and scattered to prevent creating a windrow.

B. Pruning

When required under this contract, selected leave trees will have the limbs pruned off to the following specifications:

- i. Pruning equipment shall be the contractors' option with the following requirements:
 - i. Dead limbs may be removed with the use of power chain saws.
 - ii. Live limbs will be cut with the use of loppers or hand saws.
 - iii. Power saws may be used with the approval of the Contract Administrator if the quality of the pruning meets and maintains standards.
- j. In the Thinning units (1, 2, 3, 4), 50% of designated leave trees shall be pruned to a height of 6 feet above the ground (as measured on the uphill side of the tree), or to 50% of the crown, whichever is less. Trees selected for pruning will be the largest, tallest, and straightest trees evenly spaced throughout the unit. In areas with less than full stocking, at least 50 trees per acre will be pruned.

- i. Emphasis on selection of Douglas-fir, Western white pine, and Western Larch to prune when appropriate.
 - ii. Older/taller trees that can't meet the 50% crown shall be chosen as select prune trees.
- k. Limbs will be cut at the branch collar and at right angles to the trunk leaving a 0.25 inch collar on the limb to prevent damage to the bole of the leave tree.
- l. Limbs must be cleanly cut off and not broken or otherwise wrenched from the tree.
- m. The cambium layer around the bole of the tree shall not be torn, cut, or damaged as a result of the pruning operation.
- n. Slash resulting from the pruning operation shall be lopped and scattered such that the maximum height of said slash does not exceed 2 feet in height. Under no circumstances shall slash be left "haystacked" against the bole of the tree.

SECTION I-C: UNIT COMPLIANCE INSPECTION AND PAYMENT

C-01 Determination of Payment

Compliance and payment for work performed will be based on the following:

- A. Work completed to boundaries (see Clause B-02). If work extends beyond unit boundaries, charges may be levied against the Contractor by the DNR for damages suffered by DNR, or by other parties suffering damages, including the U.S. Forest Service.

C-02 Determination of Satisfactorily Completed Work

Satisfactorily completed work will be determined using the following criteria:

- A. The Compliance Forester will establish circular plots, generally either 1/20th acre (26.3 foot radius horizontal distance) or 1/100th acre (11.8 foot radius horizontal distance), to check contract specifications compliance and as a basis for determining satisfactory quality.
- B. The Compliance Forester will attempt to measure a minimum of one (1) plot for each five (5) acres accomplished.
- C. The Compliance Forester will determine acceptable spacing and number of trees per acre as specified in the Unit Description Table for the unit based on the following Per Acre Zone of Acceptance:

PER ACRE ZONE OF ACCEPTANCE			
Spacing	Number of Crop Trees		
	Minimum	Average	Maximum
11' x 11'	330	360	380
12' x 12'	273	303	320
13' x 13'	228	258	278
14' x 14'	192	222	242
15' x 15'	164	194	214
16' x 16'	140	170	190
17' x 17'	121	151	171
18' x 18'	104	134	154
19' x 19'	100	121	140
20' x 20'	90	109	120

- D. The required number of "crop trees" per acre must fall between the maximum and minimum as listed in the Per Acre Zone of Acceptance and as specified by spacing in the Unit Description Table, or Work on the Unit will be considered unsatisfactory.

Example: In a 12' x 12' spacing basis, every plot should contain 5 to 7 properly selected crop trees except for gaps (Clause C-02).

C-03 Unsatisfactory Work Compliance

The DNR Representative will inspect the contract work to determine if treatment is satisfactory. The Contractor will be notified of any unsatisfactory unit(s) or parts thereof.

- A. Removal of crop trees or poor selections of crop trees for any reason is defined as stand damage.
- B. If overcutting of acceptable crop trees leaves a maximum treeless space (dimensions shown below) on one-half (1/2) of the compliance plots installed, or if any one such gap exceeds three times the spacing requirement, the work on that unit will not be paid for. More severe damage will result in termination of the Contract. The Contractor shall be liable for damages resulting from the overcutting of trees.

	Maximum Treeless
Spacing (ft.)	Space Permitted (ft.)
11' x 11'	22' x 22'
12' x 12'	24' x 24'
13' x 13'	26' x 26'
14' x 14'	28' x 28'
15' x 15'	30' x 30'

- C. If undercutting occurs according to the contract specification, payment will be withheld on the unsatisfactory unit(s). The Contractor shall return at no additional expense to the DNR, and re-treat unsatisfactory unit(s) or parts thereof. In the event the contract is terminated for unsatisfactory performance, payment will be made as set forth in Clause C-05 below for work satisfactorily completed.
- D. All undercutting work must be corrected to the satisfaction of the DNR Representative before work may be performed in any other portion of the unit or other units.

C-04 Payment shall be made as follows:

Payment may be made by the month, unit or by one total payment. Details of payment schedule will be determined in the pre-work conference. The DNR will attempt to comply with the desires and needs of the Contractor but assumes no legal duty or obligations to adhere to the schedule of payments so arranged.

C-05 Partial payment

Partial payment may be made upon completion of part of a unit as determined by the DNR. Request for partial payment is to be made by the Contractor utilizing the Contractor's Billing Invoice and Compliance Report provided by the DNR. The Contractor or contract representative identified during pre-work conference (Clause A-37) shall sign the Contractor's Billing Invoice and Compliance Report after completion of each such "sub-unit" being submitted for payment. The DNR Representative will then make payment recommendations for the invoice and forward the Contractor's Billing Invoice and Compliance Report to the DNR's Region office for processing.

- A. Contractor or contract representative and the DNR Representative shall sign the Contractor's Billing Invoice and Compliance Report form at the conclusion of work on each unit. Final payment will not be made to the Contractor unless the Contractor's Billing Invoice and Compliance Report form are signed by the Contractor or contract representative and the DNR Representative, and "final" payment is designated thereon.
- B. If a unit's contract acreage is disputed the Contractor may upon completion of the unit request a verification traverse by the DNR; the request must be in writing and signed by the Contractor. The DNR will pay the Contractor based on acres determined from the verification traverse. If the verification traverse indicates the net acres specified in the Unit Description are correct within plus or minus five percent (5%) the Contractor shall pay the cost of the verification traverse at a rate of ten dollars (\$10.00) per one hundred (100) feet of traversed boundary.

C-06 Liquidated damages

Damages will be assessed for any and all delays extending beyond the final contract completion date according to the following schedule based on growth losses resulting from delays. Delays beyond the Contractor's control, resulting from Acts of God, and/or shutdowns or delays imposed by the DNR because of fire conditions, weather, threat of insect damage, conflict with other operations, and labor strikes will not count toward the contract time period, and lieu-time extending beyond the original completion date will be earned for such delays.

Schedule of Liquidated Damages

	High Site (S.I. 110+)	Low Site (S.I. 110 and below)
Lost Growth Value per acre per season *	\$10/Ac/Yr	\$5/Ac/Yr
	\$1.43/Ac/Mo	\$.71/Ac/Mo

Note: Ages less than 10 years deduct 33%
 Ages 10-14 use full value
 Ages 15-19 years deduct 33%
 Ages 20 years + deduct 66%

*Season refers to growing season. Defined as March 15 through October 15, a total of seven (7) months. Proration for parts of the year will be from mid-month to mid-month, 1/7 of the total above per monthly period, based on whole months only. No damages will be assessed for extension or delays outside the growing season.
