Bidder's/Purchaser's Inspection of Sale Area and Forest Products

Acreage estimates and volume estimates contained within each timber notice of sale and each timber sale contract are made only for administrative and identification purposes. Except as expressly provided by the timber sale contract, the purchaser shall be responsible for paying the entire purchase price, even if the actual acreage or timber volume varies from the estimated quantity or volume shown.

All prospective bidders have the opportunity and are expected to inspect the sale area and the forest products located thereon. Bidders shall not rely on any representations by the State including, but not limited to, acreage estimates, volume estimates, appraisal or pre-bid documentation. The successful bidder/purchaser will further warrant that they have entered the timber sale contract without any reliance upon the DNR's volume estimates, acreage estimates, appraisals, pre-bid documentation, or any other representation by the DNR.

Any timber sale contract arising out of these public auctions will require the successful purchaser to warrant that they are entering the timber sale contract based solely upon their own judgment of the value of the forest products, formed after their own examination and inspection of both the timber sale area and the forest products being sold.

Exclusion and Disclaimer of Warranties

The PARTIES AGREE that the IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, and ALL OTHER WARRANTIES EXPRESS OR IMPLIED, ARE EXCLUDED from this transaction, and shall not apply to the goods sold. For example, THE FOLLOWING SPECIFIC MATTERS ARE NOT WARRANTED, and are EXCLUDED from this transaction:

- a. *The merchantability of the forest products*. The use of the term "merchantable" in any document is not intended to vary the foregoing.
- b. The condition of the forest products. All forest products will be conveyed "AS IS."
- c. *The acreage contained within any sale area*. Any acreage descriptions appearing in the timber notices of sale, timber sale contract, timber sale map or other documents are estimates only, provided solely for administrative and identification purposes.
- d. The volume, quality, or grade of the forest products. The descriptions of the forest products to be conveyed are estimates only, made solely for administrative and identification purposes.
- e. The correctness of any soil or surface conditions, presale construction appraisals, investigations, and all other pre-bid documents prepared by or for the State. These documents have been prepared for the State's appraisal purposes only.
- f. That the sale area is free from threatened or endangered species, or their habitat. The State is not responsible for any interferences with forestry operations that result from the presence of any threatened or endangered species, or the presence of their habitat, within the sale area.
- g. That the forestry operations to be performed under this contract will be free from regulatory actions by governmental agencies. The State is not responsible for actions to enforce regulatory laws, such as the Washington Forest Practices Act (Chapter 76.09 RCW), taken by the Department of Natural Resources or any other agency that may affect the operability of these timber sales.
- h. Items contained in any other documents prepared for or by the State.

Please also see timber sale contract clause G-060 for further information.

BIDDING PROCEDURES FOR TIMBER AUCTIONS

The general requirements that follow are a part of all Timber Notices of Sale to be auctioned by the Department of Natural Resources (DNR).

General Information

The State reserves the right to waive minor irregularities and the right to reject any or all bids.

- A. This book contains the timber notices of sale and maps for each timber sale scheduled to be auctioned. More specific information can be obtained by contacting the appropriate region office at the number listed on the back cover of this book.
- B. The timber notice of sale is a summary of sale information. For more specific information, interested parties are encouraged to view the Appraisal Packets on the DNR Internet Site @ www.dnr.wa.gov, this will take you directly to the Product Sales Section. The Appraisal Packets contain **DRAFT** copies of the timber notice of sale, map, contract, road plan, cruise data, precruise and cruise narrative, Forest Practices Application (FPA), Hydraulics Project Approval (HPA).
- C. The sale preview packets may be obtained at no charge for individual sales by visiting the appropriate region office.
- D. Timber sale contracts contain extensive terms and conditions that will be binding upon successful high bidders. Each bidder should carefully review all terms contained in the appropriate **DRAFT** timber sale contract prior to bidding on a sale, and should review the final contract prior to signing. **DRAFT** timber sale contracts are contained in the preview and presales packets and are available upon request at the respective region office.
- E. Sales advertised in this book have not been approved by the Board of Natural Resources and are subject to the Board's approval before they will be sold. The Board meets and approves sales approximately six weeks prior to auction. All sales are subject to confirmation by the DNR under RCW 79.15.120.
- F. The State does not guarantee the accuracy of any information contained herein pertaining to particular sales. Therefore, all prospective purchasers are expected to make their own independent inspections and appraisals prior to bidding.
- G. If any conflict exists between the information in the Timber Notice of Sale, timber sale map, sale preview packets and that in the timber sale contract, the signed contract will prevail.
- H. Timber sales are subject to the Washington State Forest Excise Tax (RCW Chapter 84.33).
- I. Within 30 days of sale confirmation, the apparent high bidder will provide to the State the Performance Security specified on each Notice of Sale.
- J. Each DNR region office has information about sales offered in that region. For further information, contact the respective DNR region office. Region office addresses and telephone numbers appear on the back cover of this booklet.
- K. The purchaser assumes the responsibility for any costs associated with extra maintenance or repair levied by a county for any county road used by the purchaser.

BIDDING PROCEDURES FOR TIMBER AUCTIONS (Continued)

Bidding Process

- A. All timber will be auctioned using the sealed bid method.
- B. Bids submitted on day of auction must be in the bid box at the specified auction location before 10:00 a.m. The respective DNR region office must receive mailed bids by 4:30 p.m., on the last business day before the auction. Bidders assume all risk for the method of delivery.
- C. The DNR has the right to reject bid forms that are completed incorrectly. All bid forms must have an original signature on behalf of the person or entity submitting the bid, and must be on the form provided in this booklet or a photocopy thereof. Revised documents are not permissible. Bidding instructions are on the back of the Sealed Bid Form. A bid deposit must be included in the sealed bid envelope unless using a Timber Sale Statewide Bid Bond.
- D. All bids must include the completed Sealed Bid Form and bid deposit.
- E. Bids will be opened in each respective region in the order in which sales appear in the Public Auction Sale of Timber book (alphabetically by county and by agreement number).
- F. If a tie bid occurs, the names of the tie bidders will be placed in a hat and the successful bidder will be determined by a drawing.
- G. The apparent high bidder on a particular sale will have the option of withdrawing additional sealed bids submitted for any remaining sales to be auctioned. The apparent high bidder must exercise this option within two minutes after the apparent high bidder is announced.

Auction Time and Location

Auctions will start at 10:00 a.m. and close at 4:00 p.m. on the date and at the location specified in each Timber Notice of Sale.

Bid Deposits

- A. Required bid deposits are listed on each Timber Notice of Sale.
- B. Bid deposits must be in the form of cash, certified check, cashiers' check, money order or bid bond.
- C. Bid bonds may be either a Timber Sale Statewide Bid Bond or a Timber Sale Per Sale Bid Bond.
- D. All bid deposits shall be submitted by the person or entity submitting the bid and made payable to the Department of Natural Resources. **Third party deposits will not be accepted**.

Timber Sale Per Sale Bid Bonds

- A. The Per Sale Bid Bond shall guarantee payment of the bid deposit within ten days of auction.
- B. The balance between the bid bond and the Initial Deposit payment is due by 4:30 p.m., on the day of auction.
- C. Additional forms and instructions for a Per sale Bid Bond are available at any DNR region office.

Timber Sale Statewide Bid Bond

- A. Statewide Bid Bonds shall guarantee payment of the Initial Deposit on any statewide timber sale while the bond is in effect.
- B. The Statewide Bid Bond must be received by the Department of Natural Resources, Product Sales & Leasing Division, PO BOX 47016, Olympia, Washington, 98504-7016, ten days in advance of the auction date. The bond shall be in the amount of \$150,000.00.
- C. The bidder must supply a list of persons authorized to bid using the bond. Bid bonds are subject to approval by the Department of Natural Resources.
- D. Successful bidders using a Statewide Bid Bond must pay the total Initial Deposit payment (10 percent of the total bid price) by 4:30 p.m. on the day of auction.
- E. A Statewide Bid Bond cannot be used to secure the Initial Deposit payment due the day of auction.
- F. Additional forms and instructions for a statewide bid bond are available at any DNR region office.

Payments

The initial deposit for a sale is 10% of the total bid value as submitted by the apparent high bidder (25% if the bidder is a defaulter as defined under WAC 332-140-300) and never less than \$5,000.00 for lump sum sales. For Lump Sum sales appraised at less than \$5,000.00, the entire bid value is due on day of auction.

- a. Apparent high bidders using cash, certified check, cashiers' check or money order as a bid deposit must pay the total Initial Deposit amount by 4:30 p.m. on auction day.
- b. Apparent high bidders using a Timber Sale Per Sale Bid Bond as a bid deposit must pay the difference between the bid deposit and the total initial deposit by 4:30 p.m., on the day of auction. The bid bond amount must be replaced with a certified check, cashier's check, bank draft, cash, money order, or wire transfer within ten days of the auction.
- c. Apparent high bidders using a Timber Sale Statewide Bid Bond must pay the entire Initial Deposit amount by 4:30 p.m. on the day of auction.

Fees due on the day of sale must be paid by 4:30 p.m.

All payments must be in the form of a certified check, cashier's check, bank draft, cash, money order or wire transfer.

Eligibility to Bid

In order to bid on State timber sales you must be:

- 18 years of age (or have a co-signer who meets the eligibility requirements),
- Licensed to do business in the State of Washington,
- Eligible to bid on Export Restricted timber, and
- Capable of meeting all contract obligations.

Authorized Representatives

Companies may only use authorized representatives or company officers to bid on State sales, sign State documents or sign checks. A list of authorized representatives and their specific authorities must be submitted in writing to the Department of Natural Resources Product Sales & Leasing Division, PO BOX 47016, Olympia, Washington, 98504-7016, ten days in advance of the auction. A company owner or officer must sign this submittal.

Instructions For Completing Sealed Bid Form

All bids submitted for the purchase of forest products being sold by the Washington State Department of Natural Resources must have an original signature on behalf of the person or entity submitting the bid, and must be on the form provided in this booklet or a photocopy thereof. The DNR will not accept bids that are not signed, and will not accept bids that are not on the current, approved bid form. All appropriate blanks on bid form must be completed including the bid bond number if the bidder is relying upon a bid bond for bid deposit.

For more specific information, contact the appropriate region office.

In-Person Bids

- A. Sealed bids must be in auction box before 10:00 a.m. on the day of auction at the location specified in the Timber Notice of Sale.
- B. Sealed bids must be submitted in an envelope with the name of the sale, the bidder's name and the contract number clearly written on the outside of the envelope. The full legal name and business address of the bidder must be inserted where indicated on the form, and must be on the bid bond and timber sale contract. The bid form must be signed by an authorized representative. When a bidder has more than one person authorized to bid, documentation of those persons with signature authority for bidding must accompany the bid or be on file at the region office. Sealed bid envelopes are available at all region offices. One bid per envelope.
- C. Sealed bid envelopes <u>must</u> contain a completed bid form and a bid deposit.
- D. Sealed bid envelopes <u>may</u> contain a check for the Initial Deposit amount and a check for fees.

Mailed Bids

- A. Bids that are mailed are required to have printed on the outside: "DO NOT OPEN UNTIL SALE DATE. SEALED BID ENCLOSED". The sealed bid envelope(s) will be enclosed inside the mailed-in envelope. Mailed bids must be submitted in an envelope with the name of the sale, the bidder's name and the agreement number clearly written on the outside of the envelope. The full legal name and business address of the bidder must be inserted where indicated on the form, and must be the same on the bid bond and timber sale contract. The Sealed Bid Form must be signed by an authorized representative. When a bidder has more than one person authorized to bid, then documentation of those persons with signature authority for bidding must accompany the bid or be on file at the region office. Mail-in envelopes are available at all region offices. One bid per mailed-in envelope.
- B. Bids that are mailed will be accepted up to 4:30 p.m. the last business day before the auction by the region office in which the sale is located. Bidders assume the risk for the method of delivery. The DNR assumes no responsibility for any delays caused by any delivery service.
- C. Sealed bid envelopes must contain a completed bid form and a bid deposit.
- D. Sealed bid envelopes <u>may</u> contain a check for the Initial Deposit amount and a check for fees.

Initial Deposit:

Lump Sum Sales - Initial Deposit must equal 10% of the total bid submitted. (25% if the bidder is a defaulter as defined under WAC 332-140-300)

Weight Scale Sales - Initial Deposit must equal 10% of the bid per ton multiplied by the total sale estimated tonnage. (25% if the bidder is a defaulter as defined under WAC 332-140-300)

Scribner MBF Scale Sales - Initial Deposit must equal 10% of the bid per MBF multiplied by the total sale MBF. (25% if the bidder is a defaulter as defined under WAC 332-140-300)

PERFORMANCE

SECURITY: \$100,000.00 SALE TYPE: Lump Sum

EXPIRATION DATE: September 30, 2007 **ALLOCATION:** Export Restricted

BID DEPOSIT: \$60,900.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised

price.

HARVEST METHOD: Cable harvesting equipment with ground based harvesting equipment (tracked skidder,

shovel) being restricted to slopes of 35% and less during dry soil conditions. Lead end suspension required on all cable settings. A track skidder will be allowed on Unit #1 on the ground based areas only. Whole tree yarding shall be utilized within the cable logging portion of harvest Unit #1. Intermediate support may be required to prevent soil rutting in Unit #1 off the PH-1002, PH-1003 and PH-1004 Roads. Within Unit #2, a track skidder shall only be allowed to yard the timber from the northeast portion (3-4 acres) of the unit connected by the tractor crossing, otherwise a shovel will be used for the entire unit. Purchaser shall fall and yard timber away from county roads. See Schedule L for additional requirements. Shovel yarding will not be permitted from October 31 to May 15 unless authorized in writing by the Contract Administrator.

ROADS: 21.97 stations of required construction. 15.18 stations of optional construction. 43.00

stations of pre-haul maintenance. 15.18 stations of road abandonment. Rock is available at no charge from two State pits in Sec. 13 and 24, T06N, R01E, W.M. Purchaser shall comply with the terms and conditions of the road approach permits entered into between the State and Cowlitz County. Purchaser shall also be required to renew the road approach permits prior to any road construction. Purchaser shall manufacture 4,250 cubic yards of 2 ½ inch minus crushed rock, of which 3,500 cubic yards shall be stockpiled. 0.55 miles of the PH-1000 road shall be treated with lignin sulfonate. Road construction will not be permitted from September 30 to May 1 unless authorized in

writing by the Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD: The sale acres were determined by GPS. The sale area was cruised using a variable plot

cruise method. Harvesting activities are estimated to be approximately 66% ground-

based and 34% cable harvesting.

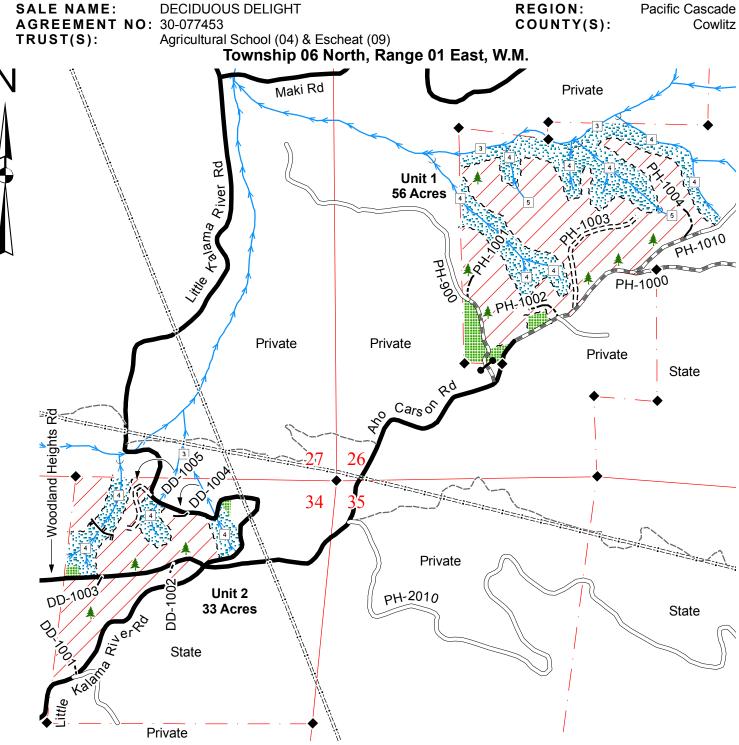

FEES: \$26,170.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in

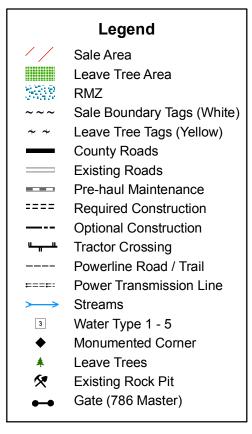

addition to the bid price.

SPECIAL REMARKS: Purchaser shall provide a written Extreme Hazard Abatement plan. Purchaser shall

deliver to the State, within 30 days of date of sale, a check made payable to Longview Fibre Company in the amount of \$500.00 for a Road Use Permit. Purchaser shall comply with terms and conditions of Cutting Line Agreement entered into between the State and Charles Ferguson LLC, dated 3/14/2005. Gate keys may be obtained from the

Region office. See vicinity map for gate locations.

MINIMUM BID: \$496,000.00 BID METHOD: Sealed Bids

PERFORMANCE

SECURITY: \$99,200.00 SALE TYPE: Lump Sum

EXPIRATION DATE: November 30, 2006 **ALLOCATION:** Export Restricted

BID DEPOSIT: \$49,600.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised

price.

HARVEST METHOD: Rubber tired skidder or tractor no larger than a D-5 cat or equivalent. Falling and

Yarding will not be permitted from October 31 to April 1 unless authorized in writing by the Contract Administrator in order to protect the soil from compaction and the water

quality from degradation due to wet weather conditions.

ROADS: 120.39 stations of required pre-haul maintenance. Prospective purchasers should review

the road plan in detail. All roads are existing. The hauling of forest products will not be permitted from October 31 to April 1 unless authorized in writing by the Contract Administrator in order to protect the road surface and subgrade from damage due to wet

weather conditions.

ACREAGE DETERMINATION

CRUISE METHOD: Acres were determined using a GPS system. Volume was determined using a variable

plot cruise and 32' log grades except for the ponderosa pine which used 16' log grades.

FEES: \$16,000.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in

addition to the bid price.

SPECIAL REMARKS: Good county road access. Easy ground based harvest. No new road construction, all

existing roads. No equipment is allowed to cross the gas pipeline on the south side of Unit #2. Designated nests for Western Gray Squirrels have a 50-foot no-entry buffer (marked with blue Special Management tags). These nests have a timing restriction that is defined as no noisy activity within 350 feet during either February 1 - April 30 or June 1 - September 15, Purchaser's choice. Purchaser shall scatter slash and construct water bars on skid trails on approximately 10 acres in Unit #2 as designated by the Contract Administrator. Purchaser must submit a slash abatement plan to abate extreme slash hazard within 500 feet of homes and 100 feet of the county roads. Unit #2 is behind a

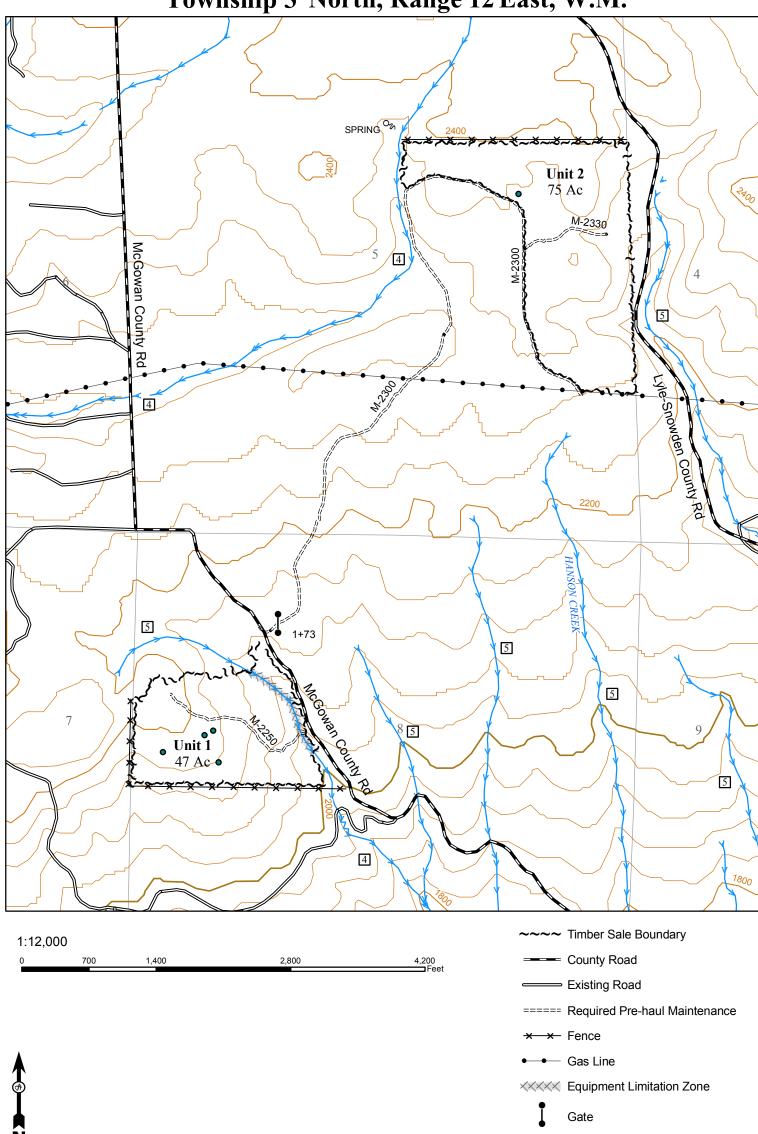

locked gate. Contact the Region Office for access information.

EXPIRATION DATE: September 30, 2007 **ALLOCATION:** Export Restricted

BID DEPOSIT: \$120,500.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised

price.

HARVEST METHOD: Cable, Motorized Carriage, Shot gun, Slackline, Shovel and Track skidder. Cable

harvesting equipment with ground based harvesting equipment (tracked skidder or shovel) being restricted to slopes of 35% and less during dry soil conditions. Shovel harvesting equipment must be large enough to pick up one end of the largest log 35 feet from the machine. Ground based operations may be suspended during periods of wet weather when rutting is apparent as a result of ground based harvesting equipment. Within shovel logging areas, the shovel operator shall break up concentrations of logging debris greater than 10 feet by 10 feet to allow exposure of natural forest soils to ensure proper reforestation. Lead end suspension required on all cable settings. Landing debris shall be piled as directed by the Contract Administrator. Ground based yarding will not be permitted from September 30 to May 1 unless authorized in writing by the Contract

Administrator. See Schedule L for Harvesting Specifications.

ROADS: 23.98 stations of required construction. 20.60 stations of optional construction. 116.30

stations of required pre-haul maintenance. 20.60 stations of road abandonment.

Approximately 1,500 cubic yards of reclaimed rock is available at no charge from the K-30411 road stock pile. The remainder of rock (approximately 5,136 cubic yards) required for this sale may be obtained from an approved commercial source. Any damage to any road resulting from any harvest operations will be repaired at the Purchasers expense unless authorized by the Contract Administrator. Road construction will not be permitted from September 30 to May 1 unless authorized in writing by the Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD: The sale acres were determined by GPS. The sale area was cruised using a variable plot

cruise method. Harvesting activities are estimated to be approximately 60% ground

based and 40% cable harvesting.

FEES: \$41,570.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in

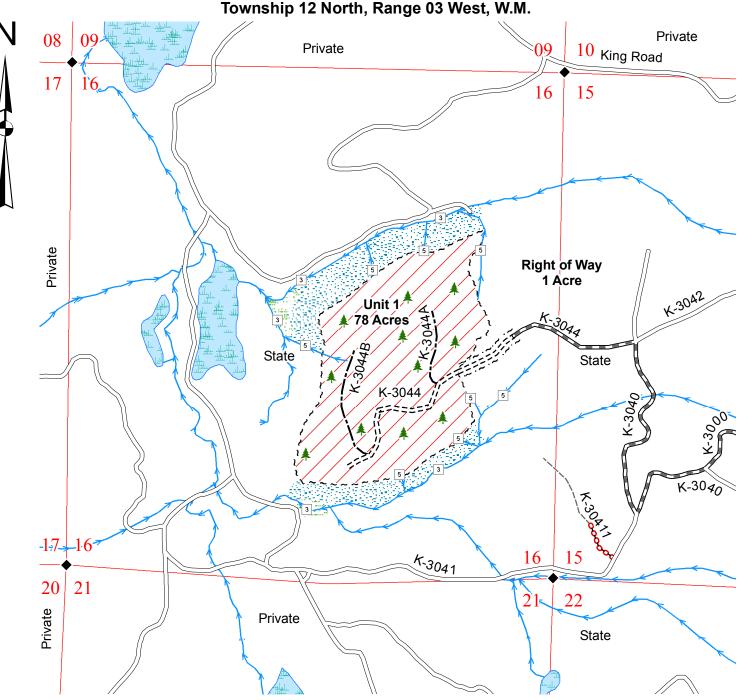

addition to the bid price.

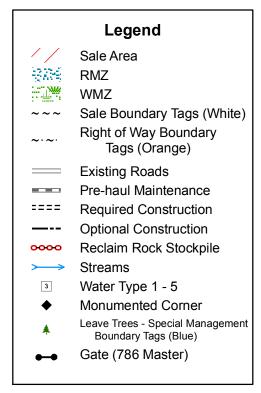

SPECIAL REMARKS: Gate keys may be obtained from the Region office. See vicinity map for gate locations.

If Purchaser tailholds on State land, tailhold straps shall be used when tailholding on live trees to minimize damage and approved in writing by the Contract Administrator.

BIDDABLE SPECIES: Douglas fir

BID DEPOSIT: \$261,900.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised

price.

HARVEST METHOD: Cable and shovel harvesting systems may be used. Shovel logging will not occur on

slopes greater than 30%. Within shovel logging areas, the shovel operator shall break up concentrations of logging debris greater than 10 feet by 10 feet to allow exposure of natural forest soils to ensure proper reforestation. A detailed felling and yarding plan shall be required prior to any harvest activities and approved in writing by the Contract Administrator. Intermediate supports may be required to prevent soil rutting in Units #1 and #2 off the 5973, 5973-F, and 5973-G roads. Purchaser shall follow the Harvesting Specifications as listed in Schedule L. Shovel yarding will not be permitted from September 30 to April 1 unless authorized in writing by the Contract Administrator.

ROADS: 128.55 stations of required construction. 24.48 stations of optional construction. 5.00

stations of road abandonment. Rock for this proposal may come from any commercial source as approved by the Contract Administrator. Any damage to any road resulting from any harvest operations will be repaired at the Purchaser's expense unless authorized by the Contract Administrator. Road construction will not be permitted from September 30 to May 1 unless authorized in writing by the Contract Administrator. The hauling of forest products will not be permitted from October 1 to May 1 unless authorized in

writing by the Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD: Acreage was determined using a compass and a laser rangefinder, with a maximum error

of closure of 1: 221. The sale area was cruised using a variable plot cruise method. Harvesting activities are estimated to be approximately 25% shovel and 75% cable

harvesting.

FEES: \$50,000.00 is due on day of sale. \$16.53 per MBF is due upon removal. These are in

addition to the bid price.

SPECIAL REMARKS: A representative from the Natural Area Preserves Program shall be present at the pre-

work conference. Purchaser assumes responsibility for any county road use/approach permits and for all costs associated with permits and extra maintenance or repair levied by a county for any county road used by the Purchaser. See Schedule L for timing restrictions on the 5973-F road. See vicinity map for gate locations. Gate keys to access

State land may be obtained from the Pacific Cascade Region office.

The remaining amount of rock (approximately 10,787 cubic yards) required for this sale shall be obtained from an approved commercial source. Purchaser shall abate the dust on the Spur 1. Road construction will not be permitted from September 30 to May 1 unless authorized in

writing by the Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD: The sale acres were determined by GPS. The sale area was cruised using a variable plot

cruise method. Harvesting activities are estimated to be approximately 90% ground-

based and 10% cable harvesting.

FEES: \$50,000.00 is due on day of sale. \$14.64 per MBF is due upon removal. These are in

addition to the bid price.

SPECIAL REMARKS: Purchaser shall enter into a Road Use Permit with Weyerhaeuser Company. Purchaser

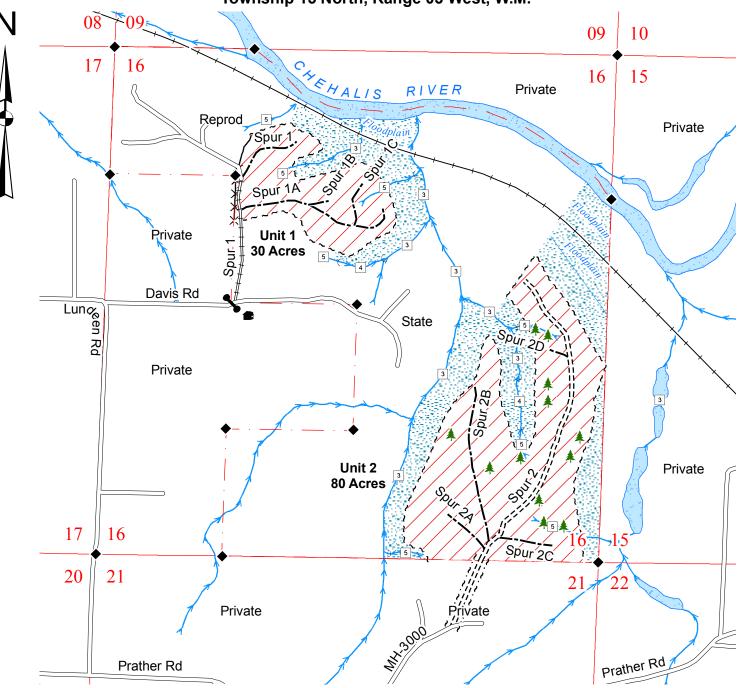

shall deck Port Blakely's logs as directed by Contract Administrator. Purchaser shall contact Chris Lunde of Port Blakely Tree Farm at 360-280-4348 to obtain a cutting card of prefered lengths, prior to felling the right-of-way timber on Port Blakely's ownership, located in Section 21, Township 15 North, Range 3 West. No operations shall occur on any weekends, State recognized holidays, or from 7 p.m. to 7 a.m. on weekdays in Units #1 and #2 only. See vicinity map for gate locations. Gate keys may be obtained from the Pacific Cascade Region office. This sale contains approximately 543 MBF of 2 and 3

saw mini peelers.

MINIMUM BID: \$1,019,000.00 **BID METHOD:** Sealed Bids

PERFORMANCE

\$100,000.00 SALE TYPE: SECURITY: Lump Sum

ALLOCATION: EXPIRATION DATE: October 31, 2007 **Export Restricted**

BID DEPOSIT: \$101,900.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised

price.

HARVEST METHOD: Cable harvesting equipment, with tracked harvesting equipment (tracked skidder or

shovel) being restricted to 35% slopes and less during dry soil conditions. 360 welldistributed plantable spots per acre shall be created on all tracked harvesting ground. This shall include the uprooting of vine maple clumps and the felling or uprooting of all non-merchantable hardwoods and whips that are 2 inches or greater in diameter. Yarding may be suspended at the discretion of the Contract Administrator when soil rutting exceeds four inches as measured from the natural ground line when there is potential for damage to any public resource. If yarding is suspended, the Contract Administrator must be assured that future harvest operations will not potentially damage any public resource. To reduce damage to the soil, the Contract Administrator may require water bars to be constructed and grass seed, hay or straw to be placed on exposed soils. Lead end suspension required on all cable settings. Any and all snags cut because of safety

concerns cannot be removed and must remain where they were felled.

ROADS: 25.93 stations of required construction. 47.50 stations of required reconstruction. 25.92

stations of optional construction. 2.55 stations of optional reconstruction. 21.10 stations of pre-haul maintenance. Rock is available at no charge from a State pit in Sec 36, Twp 9N, Rng 5W, and a State stockpile in Sec 31, Twp 9N, Rng 4W, W.M. Purchaser shall crush 6,841 cubic yards of rock to four inch minus specifications. Drilling and shooting may be necessary to obtain the rock quantity for crushing. Road construction will not be permitted from September 30 to May 1 unless authorized in writing by the Contract

Administrator.

ACREAGE DETERMINATION

CRUISE METHOD: Acreage determined by GPS traverse. The sale was cruised using a variable plot method.

Harvesting activities are estimated to be 70% tracked harvesting equipment and 30%

cable harvesting equipment.

FEES: \$50,000.00 is due on day of sale. \$10.88 per MBF is due upon removal. These are in

addition to the bid price.

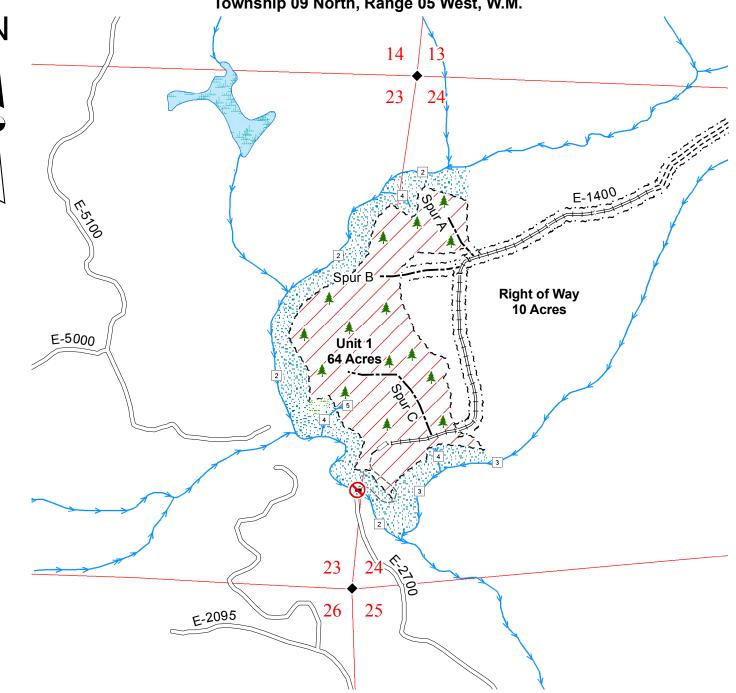

SPECIAL REMARKS: Any and or/all operation(s) of this sale may be temporarily suspended, when, in the

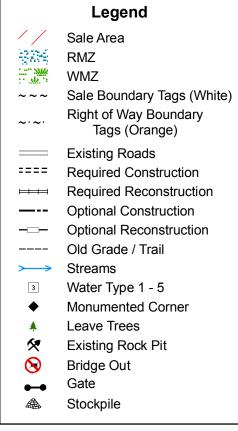

opinion of the Contract Administrator, there is the possibility of sediment delivered to

flowing water tributary to any fish bearing stream.

HARVEST METHOD: Ground based equipment on slopes less than 35 percent. Cable equipment with slack

pulling carriage on slopes greater than 35 percent. If Purchaser elects to shovel log, shovel logging shall be in accordance with Schedule A, which is part of this contract. Falling and Yarding will not be permitted from November 1 to May 31 unless authorized in writing by the Contract Administrator, nor at all on weekdays from 7 pm to 5 am,

weekends and state recognized holidays.

ROADS: 41.89 stations of required construction. Purchaser maintenance on the 2725 Road and

those portions of the Winery Road used for this sale. Road construction will not be permitted from November 1 to May 31 unless authorized in writing by the Contract Administrator, nor at all on weekdays from 7 pm to 5 am, weekends or state recognized holidays. The hauling of forest products will not be permitted from November 1 to May 31 unless authorized in writing by the Contract Administrator, nor at all on weekdays

from 7 pm to 5 am, weekends or state recognized holidays.

ACREAGE DETERMINATION

CRUISE METHOD: Acreage was determined by photocall. The unit, right of way and corridors were cruised

using a variable plot sample with a BAF of 20 on a 800x400 foot grid.

FEES: \$7,367.00 is due on day of sale. \$1.02 per ton is due upon removal. These are in addition

to the bid price.

SPECIAL REMARKS: This is a smallwood thinning. Combination for locked gate on the Winery Road is 7231.

Schedule I Thinning Prescription

Target Stand Characteristics
Residual trees per acre: 120-130, and
Residual basal area per acre: 120-140 square feet

- 1) When selecting take trees, use the following criteria by comparing trees to the adjacent trees, until the target stand characteristics are met:
 - A) First, remove hardwood species.
- B) Next, starting from the smallest, poorest formed trees and progressing upward in DBH,
 - remove DEFECTIVE* Western hemlock and Douglas-fir up to 14 inches in DBH.
- C) Finally, remove non-defective conifer trees, starting with the smallest, poorest formed,

least vigorous/smallest crowned trees, to the following diameter limits:

Western hemlock and Douglas-fir to 14 inches, then western red cedar.

2) Tree spacing between leave trees shall be no greater than 25 feet.

*See Schedule M for Defective Tree Criteria.

BID DEPOSIT: \$14,500.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised

price.

HARVEST METHOD: Shovel harvesting equipment may be used on the entire sale area. Shovel logging will

not be permitted on slopes over 30% unless authorized in writing by the Contract Administrator. Shovel logging roads shall be a minimum of 120 feet apart unless otherwise approved by the Contract Administrator. Shovel must be large enough to pick up one end of the largest log 35 feet from the machine. Logging debris created from harvest operations shall be removed from typed streams, concurrently with yarding operations. Within shovel logging areas, the shovel operator shall break up

operations. Within shovel logging areas, the shovel operator shall break up concentrations of logging debris greater than 10 feet by 10 feet to allow exposure of natural forest soils to ensure proper reforestation. Any and all snags cut because of safety concerns cannot be removed and must remain where they were fall. Shovel yarding will not be permitted from September 1 to May 1 unless authorized in writing by the Contract

Administrator.

ROADS: 7.82 stations of optional construction. Rock for construction under this contract may be

obtained from any commercial source as approved in writing by the Contract

Administrator. The use of unmuffled "jake brakes" will not be allowed on the 5700 road. Any damage to any road resulting from any harvest operations will be repaired at the Purchasers expense unless authorized by the Contract Administrator. Road construction will not be permitted from September 30 to May 1 unless authorized in writing by the

Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD: Acres were determined by hand compass and laser range finder with a maximum error of

closure of 1:234. The sale area was cruised using a variable plot method. The sale is

estimated to be harvested by 100% shovel harvesting.

FEES: \$8,220.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in

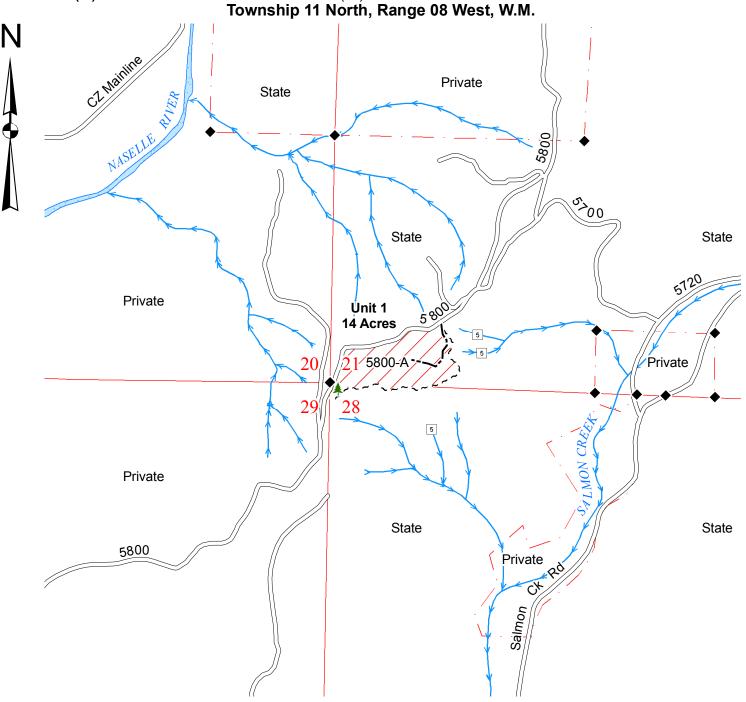

addition to the bid price.

SPECIAL REMARKS: Yarding may be suspended at the discretion of the Contract Administrator when soil

rutting exceeds four inches as measured from the natural ground line when there is potential for damage to any public resource. If yarding is suspended, the Contract Administrator must be assured that future harvest operations will not potentially damage any public resource. To reduce damage to the soil, the Contract Administrator may require water bars to be constructed and grass seed to be placed on exposed soils.

stations of optional construction. 21.60 stations of existing road to be abandoned. 9.37

stations of new road to be abandoned if built.

Development of an existing hardrock source (P-1400 Pit) at station 438+00 of the P-1000 road will involve clearing, stripping, drilling, shooting, and processing rock to generate approximately 114 cubic yards of rip rap and approximately 2,020 cubic yards of 3-inchminus ballast. This rock is available at no cost on State land in Section 6, Township 39 North, Range 5 East, W.M.

Construction, reconstruction, or abandonment of any road shall not be permitted between November 1 and March 31 unless authorized in writing by the contract administrator. If permission is granted to operate between November 1 and March 31, the purchaser may be required to provide a "Closed Season Plan" to include further protection of water, soil, roads, and other forest assets. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to

reduce soil damage and siltation.

ACREAGE DETERMINATION

CRUISE METHOD: Acres determined by GPS traverse. 174 acres net (includes 163.5 acres in the Unit, 3.1

> acres in right of way and 7.4 acres in the corridors). Cruised using variable plot method. Expansion factor used is 40. Sighting height is 4.5 feet. Grid size plot spacing is 500 X 500 feet for the unit and 500' apart for the right of way and corridors. Plot ratio cruise count is cruise all. 30 plots were taken in the Unit, 6 plots were taken in right of way and corridors; for a total of 36 plots. Note: Right of way and corridor acreages were

combined.

FEES: \$18,775.25 is due on day of sale. \$0.97 per ton is due upon removal. These are in

addition to the bid price.

This sale is on lands certified under the Sustainable Forestry Initiative® program. www.aboutsfi.org

TIMBER NOTICE OF SALE

SPECIAL REMARKS: (1) No tail hold trees are to be located outside the timber sale boundary tags. (2) Some of the yarding distances in the SW corner of the unit will probably require intermediate supports. (3) Blue special management tags represent experimental research plots.

Schedule B Sumas Pass PC Thinning Specifications

LEAVE TREE DEFINITION

Leave trees in all units will be selected by comparing their characteristics with other trees in the stand. Leave trees will be the best trees from the largest diameter classes available.

Preferred leave tree species in order of preference are:

- 1. Douglas fir
- 2. Western redcedar
- 3. Silver fir
- 4. Sitka spruce
- 5. Western hemlock

Best tree definition is having the following characteristics:

- 1. Fullest and most vigorous crowns.
- 2. Free of disease, major defect and damage.
- 3. Best form: tallest tree, straightest boles, and smallest limb diameters.

Uniformly distributed means:

Openings created by felling trees shall not exceed 30 feet between leave trees. If openings in the stand approach this diameter, sufficient trees shall be left on the perimeter of the opening to maintain the appropriate trees per acre.

Deformed tree:

Any tree that has forked tops, broken tops, and severe cat faces (bark removed on more than half the circumference of the tree).

All Douglas fir greater than 15" diameter breast height (DBH) are to be left standing unless leaving them results in a residual stand of more than the indicated spacing or trees that are severely deformed as defined above.

FOREST PRODUCTS TO BE REMOVED

For Entire Sale Area:

Remove all hardwood stems.

Cut all trees 6" DBH and less. Trees less than or equal to 6" DBH will not count towards meeting required stand conditions.

5 of the trees from the largest diameter class designated for removal (described below) per acre of T-3 and T-4 RMZ must be directionally felled toward or into the stream and left. The number of trees will be determined by calculating the area of RMZ for each stream, ie; length of RMZ times the width (100' for T-4 and 135' for T-3). The trees to be felled toward/into the stream shall be chosen from within the sale area and within 25' of the timber sale boundary tags adjacent to each stream.

Within Blue Special Management tags:

All trees not painted blue, unless approved in writing by the contract administrator for operational purposes only.

Within White Timber Sale Boundary tags (excluding the areas within Blue Special Management tags)

All stems resulting in a minimum of 175 square feet basal area and a maximum of 185 square feet basal area in the residual stand (within the diameter limit described under 'LEAVE TREE DEFINITION' thinning from below).

RESIDUAL STAND TARGET

The residual stand target is a minimum 175 square feet of basal area and a maximum of 185 square feet of basal area using a basal area factor 40 prism.

GENERAL REQUIREMENTS

Cable yarding corridors will be limited to 12-feet in width including rub trees. Corridors will be at least 150 feet apart when parallel as measured from the center of the corridors unless approved by the contract administrator. Landings will be located to provide for parallel yarding corridors wherever possible. When radial yarding corridors are required from a central landing, the distance between yarding corridors must be no closer than 150 feet where the corridor leaves the unit as measured from the center of the corridors. Where possible corridors should be located in a manner to minimize the damage to or removal of leave trees. When corridors are field located, only leave trees within 3 – 5 feet of the center of the corridor should be removed prior to yarding. Following completion of yarding of each corridor, damaged leave trees within 6 feet of the center of the corridor may be felled and yarded to the landing. It is not required to remove all leave trees from the 12-foot corridor.

COMPLIANCE

On the main body of the sale outside of the special management boundary tags, variable radius plots will be taken to determine basal area per acre for the unit. Plots will be evenly distributed at a density of at least 2 plots per five acres. Each plot will be measured with a 40 basal area factor (BAF) prism; the number of "in" trees multiplied by 40 will give the basal area for that plot. The average basal area of all plots in the unit will determine if the unit meets its target value. Borderline trees shall be measured at DBH to the face of the tree to the nearest 1/10th inch and multiplied by the plot radius factor of 1.903 to determine limiting distance.

Within the areas delineated with special management boundary tags no trees with silver tags or blue paint on them shall be cut.

Diameter limit compliance will be monitored using a stump diameter- breast height diameter regression equation.
