Bidder's/Purchaser's Inspection of Sale Area and Forest Products

Acreage estimates and volume estimates contained within each timber notice of sale and each timber sale contract are made only for administrative and identification purposes. Except as expressly provided by the timber sale contract, the purchaser shall be responsible for paying the entire purchase price, even if the actual acreage or timber volume varies from the estimated quantity or volume shown.

All prospective bidders have the opportunity and are expected to inspect the sale area and the forest products located thereon. Bidders shall not rely on any representations by the State including, but not limited to, acreage estimates, volume estimates, appraisal or pre-bid documentation. The successful bidder/purchaser will further warrant that they have entered the timber sale contract without any reliance upon the DNR's volume estimates, acreage estimates, appraisals, pre-bid documentation, or any other representation by the DNR.

Any timber sale contract arising out of these public auctions will require the successful purchaser to warrant that they are entering the timber sale contract based solely upon their own judgment of the value of the forest products, formed after their own examination and inspection of both the timber sale area and the forest products being sold.

Exclusion and Disclaimer of Warranties

The PARTIES AGREE that the IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, and ALL OTHER WARRANTIES EXPRESS OR IMPLIED, ARE EXCLUDED from this transaction, and shall not apply to the goods sold. For example, THE FOLLOWING SPECIFIC MATTERS ARE NOT WARRANTED, and are EXCLUDED from this transaction:

b. The condition of the forest products. All forest products will be conveyed “AS IS.”

c. The acreage contained within any sale area. Any acreage descriptions appearing in the timber notices of sale, timber sale contract, timber sale map or other documents are estimates only, provided solely for administrative and identification purposes.

e. The correctness of any soil or surface conditions, presale construction appraisals, investigations, and all other pre-bid documents prepared by or for the State. These documents have been prepared for the State’s appraisal purposes only.

f. That the sale area is free from threatened or endangered species, or their habitat. The State is not responsible for any interferences with forestry operations that result from the presence of any threatened or endangered species, or the presence of their habitat, within the sale area.

g. That the forestry operations to be performed under this contract will be free from regulatory actions by governmental agencies. The State is not responsible for actions to enforce regulatory laws, such as the Washington Forest Practices Act (Chapter 76.09 RCW), taken by the Department of Natural Resources or any other agency that may affect the operability of these timber sales.

h. Items contained in any other documents prepared for or by the State.

MINIMUM BID:  $164,000.00  
BID METHOD:  Sealed Bids

PERFORMANCE SECURITY:  $32,800.00  
SALE TYPE:  Lump Sum

EXPIRATION DATE:  September 30, 2008  
ALLOCATION:  Export Restricted

BID DEPOSIT:  $16,400.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD:  Rubber tired skidder or tractor no larger than a D-6 cat or equivalent. Falling and Yarding will not be permitted from November 1 to May 1 unless authorized in writing by the Contract Administrator due to wet weather conditions.

ROADS:  21.00 stations of required construction. 38.60 stations of required reconstruction. 336.80 stations of required pre-haul maintenance. 34.90 stations of required post-haul abandonment. Prospective purchasers should review the road plan in detail. Road construction will not be permitted from November 1 to May 1 unless authorized in writing by the Contract Administrator due to wet weather conditions. The hauling of forest products will not be permitted from November 1 to May 1 unless authorized in writing by the Contract Administrator to protect the road surface and subgrade due to wet weather conditions.

ACREAGE DETERMINATION

CRUISE METHOD:  Acres were determined using a GPS system. Cruise was determined using a variable plot method and 16' log grades.

FEES:  $30,740.00 is due on day of sale. $9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS:  Access to review the sale during the winter months may require a snow machine. This is a high elevation sale. Haul route is out the main Coleman Road (N-3000). Relatively gentle slopes throughout sale conducive to ground-based equipment. Approximately 210 MBF of hew-saw material. Approximately 15 MBF of Douglas fir mini-peeler material. Ignore old orange right of way tags in the northern end of Unit #1. There is also old faded blue and orange paint from past harvest activities throughout sale area, but the new orange paint on these units is easy to distinguish from the old paint. The operator may be required to return up to 50% of the landing slash back to the forest floor to eliminate oversized landing debris piles. NO live Douglas fir, ponderosa pine or western larch trees 28" DBH or larger AND 160 years of age or older will be harvested as part of this proposal.
