

## Washington State Department of Natural Resources (DNR)

### Bidder's/Purchaser's Inspection of Sale Area and Forest Products

Acreage estimates and volume estimates contained within each timber notice of sale and each timber sale contract are made only for administrative and identification purposes. Except as expressly provided by the timber sale contract, the purchaser shall be responsible for paying the entire purchase price, even if the actual acreage or timber volume varies from the estimated quantity or volume shown.

All prospective bidders have the opportunity and are expected to inspect the sale area and the forest products located thereon. Bidders shall not rely on any representations by the State including, but not limited to, acreage estimates, volume estimates, appraisal or pre-bid documentation. The successful bidder/purchaser will further warrant that they have entered the timber sale contract without any reliance upon the DNR's volume estimates, acreage estimates, appraisals, pre-bid documentation, or any other representation by the DNR.

*Any timber sale contract arising out of these public auctions will require the successful purchaser to warrant that they are entering the timber sale contract based solely upon their own judgment of the value of the forest products, formed after their own examination and inspection of both the timber sale area and the forest products being sold.*

---

### Exclusion and Disclaimer of Warranties

The PARTIES AGREE that the IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, and ALL OTHER WARRANTIES EXPRESS OR IMPLIED, ARE EXCLUDED from this transaction, and shall not apply to the goods sold. For example, THE FOLLOWING SPECIFIC MATTERS ARE NOT WARRANTED, and are EXCLUDED from this transaction:

a. ***The merchantability of the forest products.*** The use of the term “merchantable” in any document is not intended to vary the foregoing.

b. ***The condition of the forest products.*** All forest products will be conveyed “AS IS.”

c. ***The acreage contained within any sale area.*** Any acreage descriptions appearing in the timber notices of sale, timber sale contract, timber sale map or other documents are estimates only, provided solely for administrative and identification purposes.

d. ***The volume, quality, or grade of the forest products.*** The descriptions of the forest products to be conveyed are estimates only, made solely for administrative and identification purposes.

e. ***The correctness of any soil or surface conditions, presale construction appraisals, investigations, and all other pre-bid documents prepared by or for the State.*** These documents have been prepared for the State’s appraisal purposes only.

f. ***That the sale area is free from threatened or endangered species, or their habitat.*** The State is not responsible for any interferences with forestry operations that result from the presence of any threatened or endangered species, or the presence of their habitat, within the sale area.

g. ***That the forestry operations to be performed under this contract will be free from regulatory actions by governmental agencies.*** The State is not responsible for actions to enforce regulatory laws, such as the Washington Forest Practices Act (Chapter 76.09 RCW), taken by the Department of Natural Resources or any other agency that may affect the operability of these timber sales.

h. Items contained in any other documents prepared for or by the State.

Please also see timber sale contract clause G-060 for further information.

# BIDDING PROCEDURES FOR TIMBER AUCTIONS

---

*The general requirements that follow are a part of all Timber Notices of Sale to be auctioned by the Department of Natural Resources (DNR).*

---

## General Information

*The State reserves the right to waive minor irregularities and the right to reject any or all bids.*

A. This book contains the timber notices of sale and maps for each timber sale scheduled to be auctioned. More specific information can be obtained by contacting the appropriate region office at the number listed on the back cover of this book.

B. The timber notice of sale is a summary of sale information. For more specific information, interested parties are encouraged to view the Appraisal Packets on the DNR Internet Site @ [www.dnr.wa.gov](http://www.dnr.wa.gov), this will take you directly to the Product Sales Section. The Appraisal Packets contain **DRAFT** copies of the timber notice of sale, map, contract, road plan, cruise data, precruise and cruise narrative, Forest Practices Application (FPA), Hydraulics Project Approval (HPA).

C. The sale preview packets may be obtained at no charge for individual sales by visiting the appropriate region office.

D. Timber sale contracts contain extensive terms and conditions that will be binding upon successful high bidders. Each bidder should carefully review all terms contained in the appropriate **DRAFT** timber sale contract prior to bidding on a sale, and should review the final contract prior to signing. **DRAFT** timber sale contracts are contained in the preview and presales packets and are available upon request at the respective region office.

E. Sales advertised in this book have not been approved by the Board of Natural Resources and are subject to the Board's approval before they will be sold. The Board meets and approves sales approximately six weeks prior to auction. All sales are subject to confirmation by the DNR under RCW 79.15.120.

F. The State does not guarantee the accuracy of any information contained herein pertaining to particular sales. Therefore, all prospective purchasers are expected to make their own independent inspections and appraisals prior to bidding.

G. If any conflict exists between the information in the Timber Notice of Sale, timber sale map, sale preview packets and that in the timber sale contract, the signed contract will prevail.

H. Timber sales are subject to the Washington State Forest Excise Tax (RCW Chapter 84.33).

I. Within 30 days of sale confirmation, the apparent high bidder will provide to the State the Performance Security specified on each Notice of Sale.

J. Each DNR region office has information about sales offered in that region. For further information, contact the respective DNR region office. Region office addresses and telephone numbers appear on the back cover of this booklet.

K. The purchaser assumes the responsibility for any costs associated with extra maintenance or repair levied by a county for any county road used by the purchaser.

## BIDDING PROCEDURES FOR TIMBER AUCTIONS (Continued)

### **Bidding Process**

- A. All timber will be auctioned using the sealed bid method.
- B. Bids submitted on day of auction must be in the bid box at the specified auction location before 10:00 a.m. The respective DNR region office must receive mailed bids by 4:30 p.m., on the last business day before the auction. Bidders assume all risk for the method of delivery.
- C. The DNR has the right to reject bid forms that are completed incorrectly. *All bid forms must have an original signature on behalf of the person or entity submitting the bid, and must be on the form provided in this booklet or a photocopy thereof. Revised documents are not permissible.* Bidding instructions are on the back of the Sealed Bid Form. A bid deposit must be included in the sealed bid envelope unless using a Timber Sale Statewide Bid Bond.
- D. All bids must include the completed Sealed Bid Form and bid deposit.
- E. Bids will be opened in each respective region in the order in which sales appear in the Public Auction Sale of Timber book (alphabetically by county and by agreement number).
- F. If a tie bid occurs, the names of the tie bidders will be placed in a hat and the successful bidder will be determined by a drawing.
- G. The apparent high bidder on a particular sale will have the option of withdrawing additional sealed bids submitted for any remaining sales to be auctioned. The apparent high bidder must exercise this option within two minutes after the apparent high bidder is announced.

---

### **Auction Time and Location**

Auctions will start at 10:00 a.m. and close at 4:00 p.m. on the date and at the location specified in each Timber Notice of Sale.

---

### **Bid Deposits**

- A. Required bid deposits are listed on each Timber Notice of Sale.
- B. Bid deposits must be in the form of cash, certified check, cashiers' check, money order or bid bond.
- C. Bid bonds may be either a Timber Sale Statewide Bid Bond or a Timber Sale Per Sale Bid Bond.
- D. All bid deposits shall be submitted by the person or entity submitting the bid and made payable to the Department of Natural Resources. **Third party deposits will not be accepted.**

---

### **Timber Sale Per Sale Bid Bonds**

- A. The Per Sale Bid Bond shall guarantee payment of the bid deposit **within ten days of auction.**
- B. The balance between the bid bond and the Initial Deposit payment is due by 4:30 p.m., **on the day of auction.**
- C. Additional forms and instructions for a Per sale Bid Bond are available at any DNR region office.

## **Timber Sale Statewide Bid Bond**

- A. Statewide Bid Bonds shall guarantee payment of the Initial Deposit on any statewide timber sale while the bond is in effect.
- B. The Statewide Bid Bond must be received by the Department of Natural Resources, Product Sales & Leasing Division, PO BOX 47016, Olympia, Washington, 98504-7016, ten days in advance of the auction date. The bond shall be in the amount of \$150,000.00.
- C. The bidder must supply a list of persons authorized to bid using the bond. Bid bonds are subject to approval by the Department of Natural Resources.
- D. Successful bidders using a Statewide Bid Bond must pay the total Initial Deposit payment (10 percent of the total bid price) **by 4:30 p.m. on the day of auction.**
- E. A Statewide Bid Bond cannot be used to secure the Initial Deposit payment due the day of auction.
- F. Additional forms and instructions for a statewide bid bond are available at any DNR region office.

---

## **Payments**

The initial deposit for a sale is 10% of the total bid value as submitted by the apparent high bidder (25% if the bidder is a defaulter as defined under WAC 332-140-300) and never less than \$5,000.00 for lump sum sales. For Lump Sum sales appraised at less than \$5,000.00, the entire bid value is due on day of auction.

- a. Apparent high bidders using cash, certified check, cashiers' check or money order as a bid deposit must pay the total Initial Deposit amount by 4:30 p.m. on auction day.
- b. Apparent high bidders using a Timber Sale Per Sale Bid Bond as a bid deposit must pay the difference between the bid deposit and the total initial deposit by 4:30 p.m., on the day of auction. The bid bond amount must be replaced with a certified check, cashier's check, bank draft, cash, money order, or wire transfer within ten days of the auction.
- c. Apparent high bidders using a Timber Sale Statewide Bid Bond must pay the entire Initial Deposit amount by 4:30 p.m. on the day of auction.

---

## **Fees due on the day of sale must be paid by 4:30 p.m.**

All payments must be in the form of a certified check, cashier's check, bank draft, cash, money order or wire transfer.

---

## **Eligibility to Bid**

In order to bid on State timber sales you must be:

- 18 years of age (or have a co-signer who meets the eligibility requirements),
- Licensed to do business in the State of Washington,
- Eligible to bid on Export Restricted timber, and
- Capable of meeting all contract obligations.

## **Authorized Representatives**

Companies may only use authorized representatives or company officers to bid on State sales, sign State documents or sign checks. A list of authorized representatives and their specific authorities must be submitted in writing to the Department of Natural Resources Product Sales & Leasing Division, PO BOX 47016, Olympia, Washington, 98504-7016, ten days in advance of the auction. A company owner or officer must sign this submittal.

Purchaser-March 26, 2008

**PAYMENT SECURITY:** To be determined by the State as outlined in Clause P-041 of the Purchaser's Contract.

**BIDDING PROCEDURES:** Bidding to be allowed on individual log sorts. A separate sealed bid and envelope must be submitted for each sort. Prospective Purchasers may bid on any or all sorts. Complete bidding procedures and auction information may be obtained from the South Puget Sound Region office in Enumclaw, WA or at (360) 825-1631.

**SPECIAL REMARKS:** Timber will be manufactured by cut to length process. The successful Purchaser(s) will be required to purchase logs from the sale area upon delivery to their location specified in the bid submitted. Logs will be delivered to the Purchaser's delivery location by the State's contract harvester. Purchaser must pay the Forest Excise Tax associated with the log sorts awarded to them per G-252 clause. The tax rate for this sale is 4.2 percent. Purchaser is also responsible for associated weighing costs (P-035). Actual volumes delivered may vary from the estimates. Loads will be weighed and/or scaled at State approved scaling locations. The State reserves the right to determine where logs are authorized to be scaled and weighed. On the day of sale the Purchaser must bring their bid deposit up to 10 percent of their bid price.

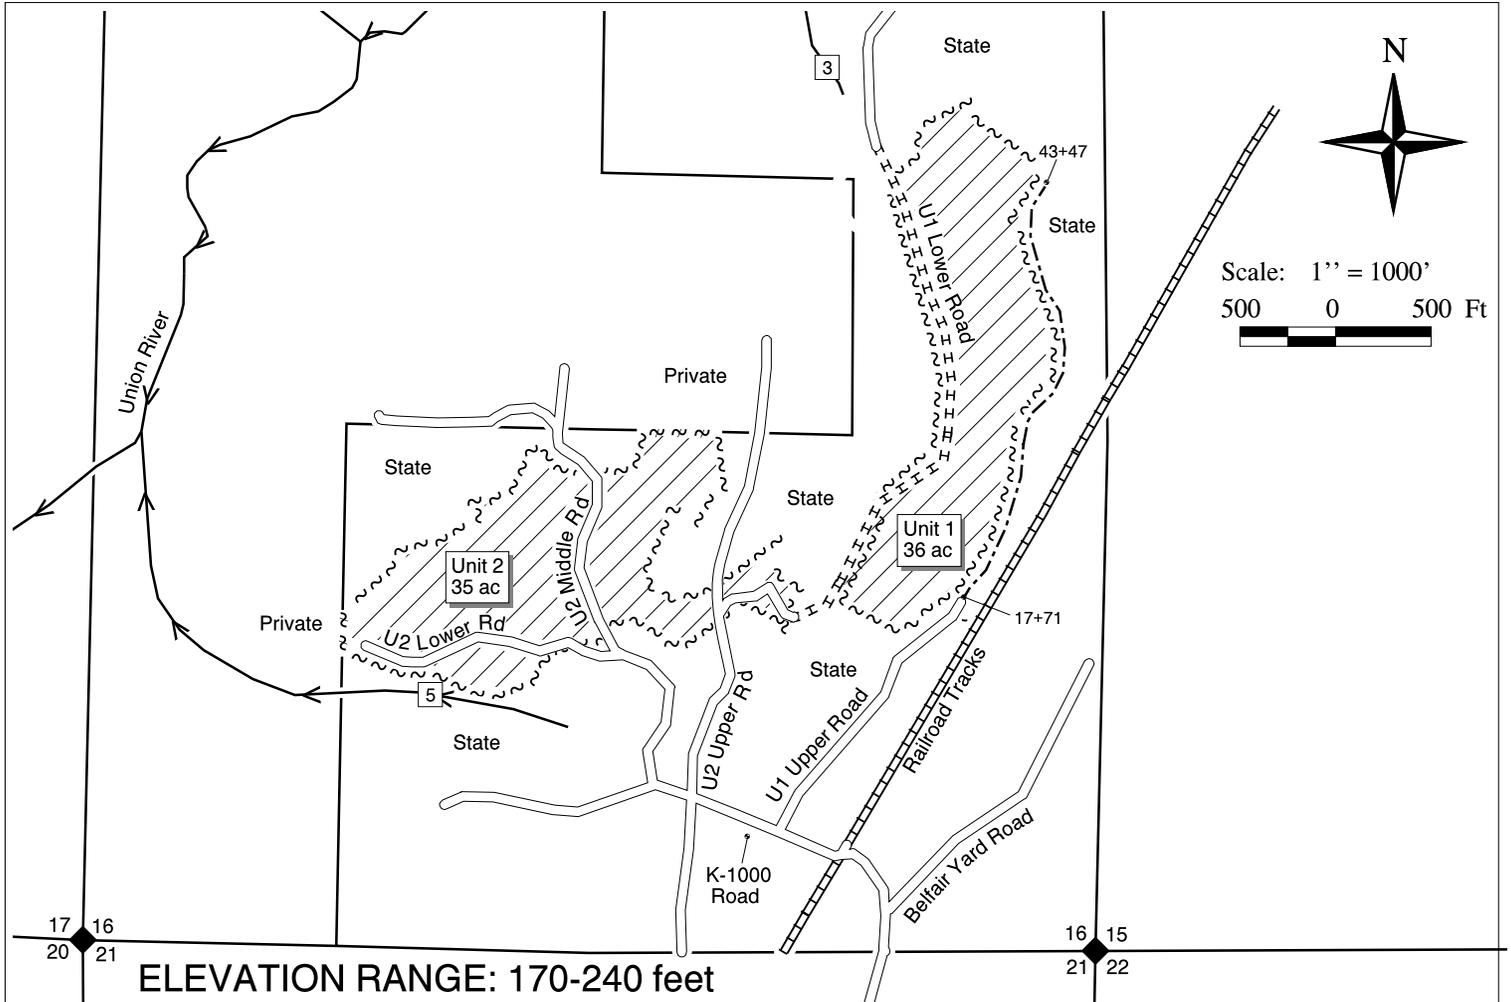

**The contracts for these sorts will be effective beginning July 7, 2007. Final contract award is contingent upon the State's haul cost analysis. Allow up to 3 business days following bid opening for the State to announce the apparent high bidder. Each sort is subject to confirmation following announcement of the apparent high bidder.** Should some sorts not sell, no sorts will be confirmed for sale until either all sorts are sold or a determination is made to withdraw the entire sale.

For more information regarding this individual log sort sale, visit our web site [www.wdnr.wa.gov/product\\_sales](http://www.wdnr.wa.gov/product_sales). If you have questions call Aileen Nichols (253) 732-1822 or Nancy Walter (360) 802-7044 at South Puget Sound Region.

## TIMBER NOTICE OF SALE

---

**BID DEPOSIT:** \$362,300.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

**HARVEST METHOD:** Ground based equipment on slopes less than 40 percent and cable on slopes greater than 40 percent. If Purchaser elects to shovel log, shovel logging shall be in accordance with the attached Schedule A, which is part of this contract. Falling and yarding will not be permitted from November 1 to May 31 unless authorized in writing by the Contract Administrator, nor at all on weekends or state recognized holidays.

**ROADS:** 54.94 stations of required construction. 59.16 stations of required reconstruction. 310.00 stations of optional construction. 6.80 stations of optional reconstruction. 448.80 stations of required pre-haul maintenance. 90.60 stations of abandonment, if constructed. Purchaser maintenance on the 8 Road from its junction with the 800 Road to its junction with the 9 Road, 9E2, 9E21, 9E22, 9E23, 87, 94, 96, 97, 871, 872, 873, 941, 941-1, 941-2, 941-11, 942, 961, 962, 963, 964, and 971 Roads and Spurs 1b and 4a. Designated maintenance on all other roads used. Road construction will not be permitted from November 1 to May 31 unless authorized in writing by the Contract Administrator, nor at all on weekends or state recognized holidays. The hauling of forest products will not be permitted from November 1 to May 31 unless authorized in writing by the Contract Administrator, nor at all on weekends or state recognized holidays.

### ACREAGE DETERMINATION

**CRUISE METHOD:** Acreage was determined by traversing boundaries by GPS/Lidar in Units #1, #2, #3, #4, #5, and #6. Refer to the Cruise Narrative for cruise method specifics.

**FEES:** \$100,000.00 is due on day of sale. \$15.39 per MBF is due upon removal. These are in addition to the bid price.

### SPECIAL REMARKS:

- The 8 Road, where it crosses Sahara Creek, is scheduled to be abandoned sometime between July 15, 2008 and September 15, 2008, with the proposed Whiskers Timber Sale. The portion of the 8 Road from the 8/9 Road junction to the 8/800 Road junction is available to the purchaser until the removal of the crossing. If the purchaser chooses to use this segment of road the purchaser will be responsible for all maintenance.
- This sale will crush 7,000 cubic yards of 2 1/2 inch minus rock for stock pile in the Primo Pit.
- The Purchaser is required to select leave trees based on the criteria outlined in Schedules B and C.
- Description, requirements and location regarding monitoring plots are outlined in Schedule F.
- The cruise does not deduct for those trees required to be left in the Ecological Enhancement Sites per Schedule E.
- Timing restrictions will be placed on portions on Unit #5 and #6 due to the existence of Marbled Murrelet habitat near the sale boundaries. See the attached timber sale map for exact locations. These restrictions will apply to all harvesting, road construction and hauling activities within 0.25 miles of the MM habitat polygon and will be in place from April 1st through August 31st lasing from 1 hour before sunrise to 2 hours after sunrise and from 1 hour before sunset to 1 hour after sunset, as per WAC 222-30 Timber Harvesting.
- An HPA has been applied for the optional Type 3 stream crossing.

**BID DEPOSIT:** \$59,700.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

**HARVEST METHOD:** Cable; cable or rubber-tired forwarder on slopes 35% or less. Cutting and yarding in the small wood thinning portion of the timber sale will not be permitted during the bark slippage season unless authorized in writing by the Contract Administrator. This season is estimated to run from April 1 to July 15 but will vary dependent on weather conditions. If permission is granted to operate during the bark slippage season the purchaser will be required to provide a plan outlining mitigation measures. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator (THIS PERTAINS TO GROUND-BASED YARDING ONLY) to reduce soil damage and erosion.

**ROADS:** 27.32 stations of required construction. 52.93 stations of required reconstruction. 76.38 stations of optional construction. 76.38 stations of road to be abandoned if built.

Development of an existing hardrock source at station 199+25 of the AL-ML Road will involve drilling, shooting, and processing rock to generate approximately 4,500 cubic yards of riprap and 3-inch-minus ballast.

Use of the existing 3-inch-minus ballast stockpiles in the pit at station 199+25 of the AL-ML Road.

Use of the existing 2-inch-minus surfacing stockpile in the pit at station 199+25 of the AL-ML Road. Use of this stockpile is limited to the quantities as specified in this road plan. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

**ACREAGE DETERMINATION**

**CRUISE METHOD:** Acres determined by GPS traverse. 325.2 acres gross. Acreage deducted for green tree retention clump and RMZ 25-foot core buffer. 304.7 acres net (including r/w). Cruised

**FEES:** \$36,159.25 is due on day of sale. \$1.20 per ton is due upon removal. These are in addition to the bid price.

**SPECIAL REMARKS:** Clearcut Area=24 Acres; Thinning Area= 281 Acres

Intermediate supports may be necessary on this sale.

**Schedule B**  
**Sherwood Thin Prescription**

Sherwood Thin Prescription

Designated Leave Trees:

	<b>Trees per acre</b>	<b>Spacing (feet)</b>	<b>Diameter Limits (inches)</b>	<b>Down Woody Debris</b>
<b>Unit 1</b>	100 - 105	21 X 21	17	35
<b>Unit 2</b>	105 - 110	20 X 20	16	135

Unit 1:

- Leave 100 to 105 trees per acre (tpa) across entire unit with an average spacing of approximately 21 feet by 21 feet.
- Leave all conifers greater than 17 inches diameter breast height (dbh), unless the trees are severely deformed as defined below or need to be removed for corridors.
- Cut a total of 35 conifers for down woody debris recruitment. These trees should be cut within 25 feet of the boundary tags for all type 4 streams, and should be of a similar diameter as other cut and yarded trees. These trees should be felled toward the stream channel where feasible and should be proportionally distributed across all type 4 streams.

Unit 2:

- Leave 105 to 110 tpa across entire unit with an average spacing of approximately 20 feet by 20 feet.
- Leave all conifers greater than 16 inches dbh, unless the trees are severely deformed as defined below or need to be removed for corridors.
- Cut a total of 135 conifers for down woody debris recruitment. These trees should be cut within 25 feet of the boundary tags for all type 4 streams, and should be of a similar diameter as other cut and yarded trees. These trees should be felled toward the stream channel where feasible and should be proportionally distributed across all type 4 streams.

All Units:

- Leave all western red cedar.
- If no conifers exist, hardwood species must be used to fulfill the spacing requirements. If conifers do exist, remove all hardwoods.
- Openings created by felling trees shall not exceed 30 feet between leave trees. If openings in the stand exceed this distance, sufficient trees shall be left on the perimeter of the opening to maintain the appropriate trees per acre.

Leave Tree Definition

Leave trees in the unit will be selected by comparing their characteristics with other trees in the stand. Leave trees will be the best trees from the largest diameter classes available and evenly distributed over the landscape.

Preferred leave tree species in order of preference are:

1. Western Red Cedar (no cut except for corridors)
2. Douglas-fir
3. Western Hemlock
4. Pacific Silver Fir
5. Big Leaf Maple

Best tree definition is having the following characteristics:

- Fullest and most vigorous crowns
- Free of disease, major defect and damage
- Best form: tallest tree, straightest boles, and smallest limb diameters

Deformed tree:

A tree that has forked tops, broken tops, or severe cat faces (bark removed on more than half the circumference of the tree).

**Ground-based Yarding Corridors:**

Corridors are limited to 14 feet wide (including rub trees) and no less than 75 feet apart as measured from the center of the corridor. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees.

**Cable Yarding Corridors:**

Corridors are limited to 12 feet wide (including rub trees) and no less than 100 feet apart as measured from the center of the corridor. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. Landing will be located to provide for parallel yarding corridors whenever possible. When radial yarding corridors are required from a central landing, the distance between yarding corridors must be no closer than 100 feet where the corridor leaves the unit as measured from the center of the corridor.

**Compliance:**

A 1/20 acre fixed radius plot (26.3 feet) will also be measured to determine trees per acre. The number of trees in a plot will be multiplied by 20 to determine the trees per acre for that plot. The average of all plots in a unit will determine the trees per acre for that unit. Only trees greater than or equal to 6.5" DBH will be measured.

**Unit divisions for assessment of damage:**

Per contract clauses H-012 and D-040.

**Unit 1** Three compartments are delineated for assessment of damage. These are marked on the supplemental map to the Contract Administrator and labeled as 1A, 1B, and 1C.

**Unit 2** Three compartments are delineated for assessment of damage. These are marked on the supplemental map to the Contract Administrator and labeled as 2A, 2B, and 2C.

**Certification of Fallers and Yarder Operators (additional requirements beyond those outlined in the H-011)**

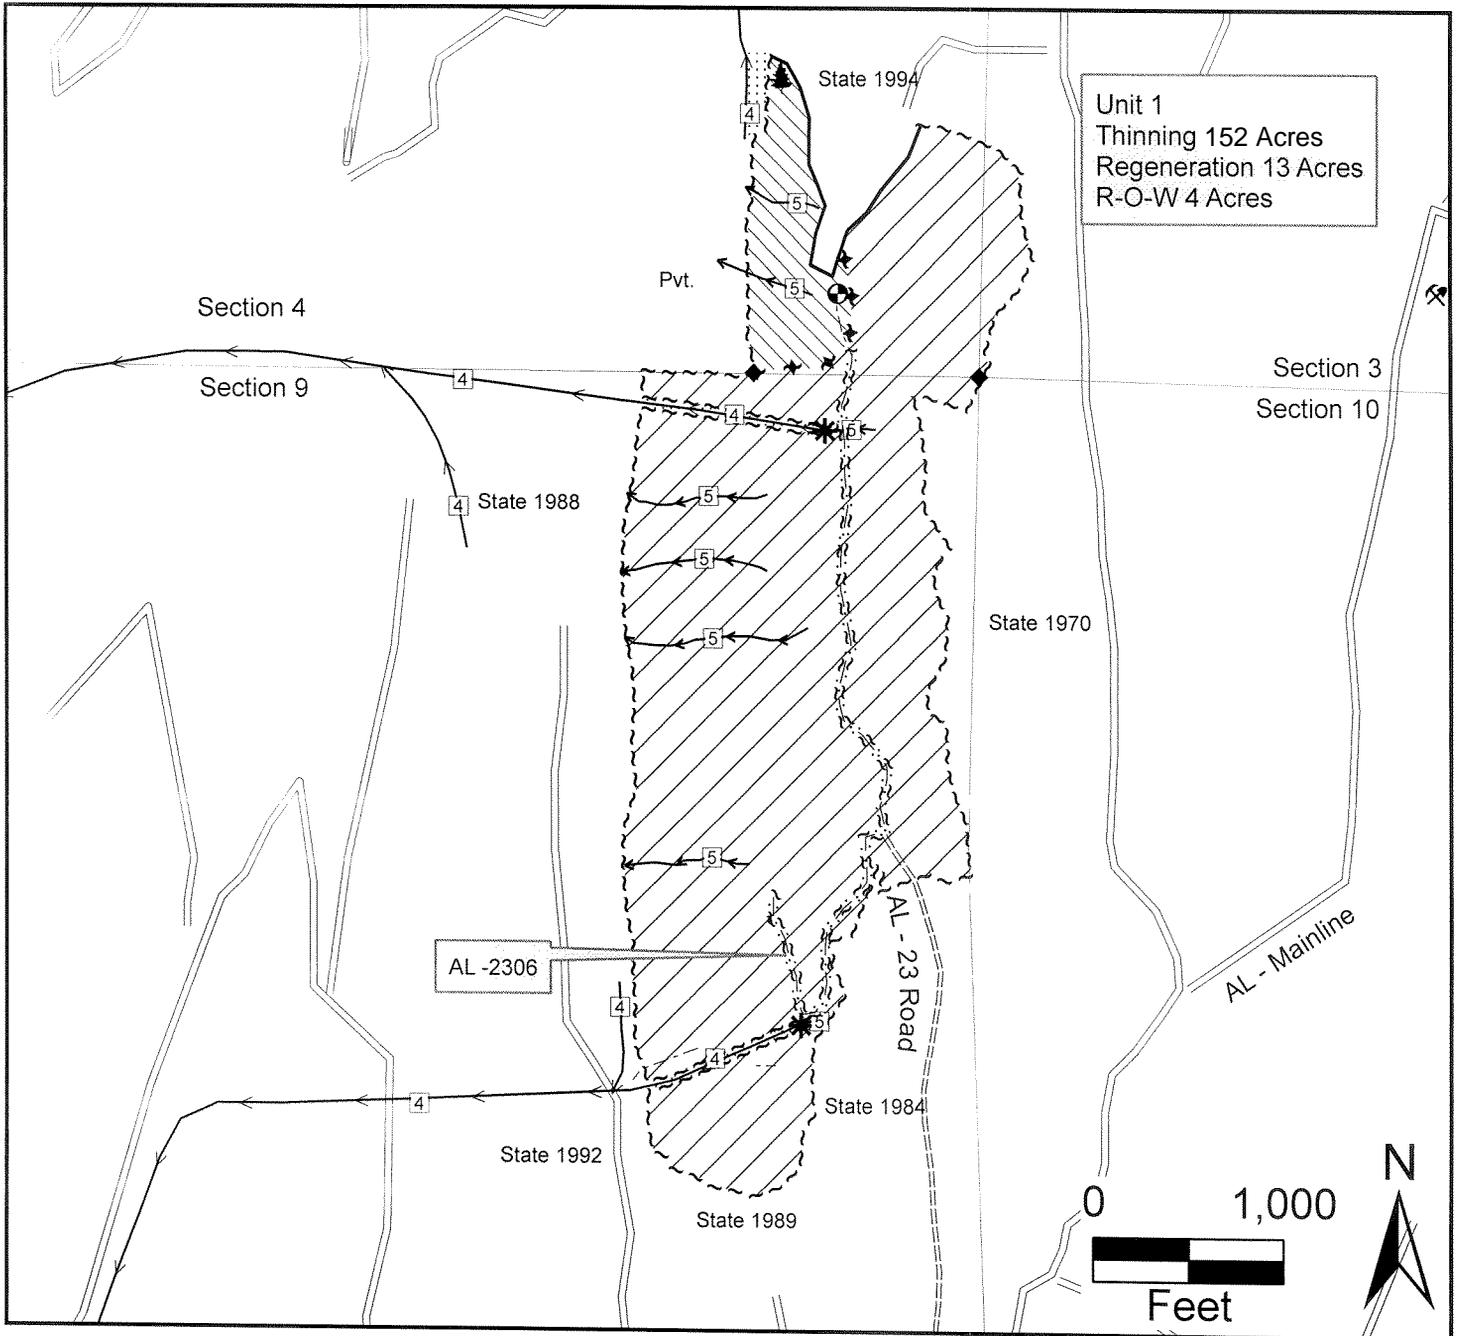

The contract administrator and faller/harvest operator will jointly review the take tree selection criteria as outlined in Schedule B of the sale contract. In conjunction with the Contract administrator, the faller/ harvest operator will mark a designated area as a test plot within the sale area boundary. Satisfactory thinning of the test plot completes the certification process.

Certifications will be issued to individuals when they demonstrate to the Contract administrator their ability to perform within the requirements set forth in the contract.

property. No commercial activities on the weekend (Saturday and Sunday) or on State or Federal holidays.

**Schedule B**  
**Thinning Prescription**

Cutting Prescription:

- Cut RA
- Cut DF and WH 6 – 17 inches dbh
- Cut no cedar.

Falling and Yarding Requirements:

Forest products shall be felled by chainsaw in cable areas, and chainsaw or tracked machine in ground-based areas unless authority to use other equipment is granted in writing by the Contract Administrator.

**GROUND BASED SEASON:** No cutting and yarding between November 1 and March 31, except authorized by Contract Administrator.

**SPECIAL THINNING CONDITIONS:** In areas where prescription trees do not exist, do not put in corridors.

**CORRIDORS:**

**GROUND YARDING CORRIDORS:** Limit to 14 feet wide (including rub trees) and no less than 70 feet apart.

**CABLE CORRIDORS:** Landings will be located to provide for parallel yarding whenever possible. Corridors will be limited to 12 feet including rub trees. Corridors will be at least 100 feet apart when parallel as measured from the center of the corridors. When radial yarding corridors are required from a central landing, the distance between yarding corridors must be no closer than 100 feet where the corridor leaves the unit as measured from the center of the corridors. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. When corridors are field located, only leave trees within 3-5 feet of the center to the corridor should be removed prior to yarding. Following completion of yarding of each corridor, damaged leave trees within 6 feet of the center of the corridor may be felled and yarded to the landing. It is not required to remove all leave trees from the 12-foot corridor.

**DAMAGE COMPARTMENTS:** Unit 1 ground based area one compartment, cable area the other.

**CERTIFICATION OF FALLERS AND YARDER OPERATORS – SEE CLAUSE H-011 OF THE CONTRACT.**

**ADDITIONAL REQUIREMENTS:**

The contract Administrator and Faller/Harvester Operator will jointly review the take tree selection criteria as outlined in Schedule B of the contract.

In conjunction with the Contract Administrator, the Faller/Harvester Operator will mark a designated area as a test plot within the sale area boundary. Satisfactory thinning of the test plot completes the certification process.

Certifications will be issued to individuals when they demonstrate to the contract Administrator their ability to perform within the requirements set forth in the contract.

Trees marked with blue tags that meet the prescription may be cut.

Corridors need to be approved by the Contract Administrator prior to falling any timber within the corridor.

**Schedule C**  
**Fencing Installation and Private Road Use**

Fencing will be installed by the Segelson 40 timber sale purchaser to the satisfaction of the landowners prior to commencing any road building activities on the Strafford/Antioquia property. Refer to Segelson 40 Fencing Plan Map (attached) as part of this Schedule C.

Purchaser, or its designee, will install field fencing with railroad ties, or pressure treated 6"x 6" posts, at minimum of every 50', with heavy duty metal 'T' posts every 10' in between 6"x 6" posts. All posts will be installed vertically with livestock field fencing stretched tight and in contact with the ground. Two 12' gates (double hung 6' gates also acceptable) will be installed at access crossing points on DR-1 (dirt road) and DR-2 as designated on Segelson 40 Fencing Plan Map (attached). The fence will be approximately 700' long, but must attach from existing fence north of barn, along tree line, across access road (DR-2, identified on the Fencing Plan Map only), East up the hill, across access road (DR-1) and tie into existing barbed wire fencing on the East edge of landowners' property. Fencing will be accomplished prior to commencement of road construction operations in order to protect landowners' animals from road construction and timber haul activities. Any damage to the landowners' fence as the result of purchaser's operations will be repaired on the same day as discovered, unless other means to protect animals is agreed upon with the landowners.

Large cedar trees near the gate to the northeast of the house will be left adjacent to existing right-of-way along CSH-18 road on private property. Limbs may be trimmed if necessary for passage by log trucks and equipment. Stumps on cut bank of road (North of cedar trees) will be removed as part of reconstruction of existing portion of CSH-18 road on private land.

The private landowners will be responsible for repairing any damage to the fence that has not been caused by activities of the States' employees or its permittees.

Barbed wire fence along the property line south of connection point of new fencing will be repaired or reestablished prior to close of sale. Upon completion of activity associated with the Segelson 40 Partial Cut Timber Sale, a livestock gate (barbed wire attached to movable post that connects to a set post with wire loops) will be installed by the purchaser (or designee).

Upon completion of activity associated with the Segelson 40 timber sale maintenance of the CSH-18 road will be the private landowners' responsibility.

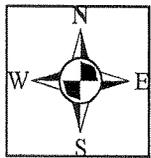

No hauling or heavy equipment operations on or across private land after 5:00 pm each day through 8:00 am the next morning. No truck air brakes usage on the private landowners' property. No commercial activities on the weekend (Saturday and Sunday) or on State or Federal holidays.
