

Forest Action Plan

March 2020

Forest Action Plan

Washington's Forest Action Plan is a comprehensive review of forests across all lands — public, private, rural and urban — that offers proactive solutions to conserve, protect and enhance the trees and forests that people and wildlife depend on.

things we
care about

Stakeholder Input

- Consider programs, tools, and resources available to support forest health and resilience outcomes
- Focus initial planning efforts on watersheds that are majority National Forest System that would benefit from active management and restoration

Discussion Questions

- **Are there any additional data layers that should be considered?**
- **How should we mask areas where active management isn't a viable objective?**
