Book 875

.....

WASHINGTON STATE DEPARTMENT OF  
**Natural Resources**

Caring for  
your natural resources ...  
now and forever

# IMPORTANT NOTICES

*The important notices that follow are part of all Timber Notices of Sale to be auctioned by Washington's Department of Natural Resources (DNR)*

## **Governmental Regulatory Actions or Orders**

The purchaser assumes the risk of liabilities related to regulatory actions or orders by any government agency that may affect the operability of these timber sales. Such regulatory actions or orders include, but are not limited to, actions taken pursuant to the State Forest Practices Act, Chapter 76.09 RCW, and the Federal Endangered Species Act, 16 U.S.C. §§ 1531-1544. Please see timber sale contract clauses G-066 and G-220 for further information.

## **Threatened and Endangered Species**

DNR cannot verify the presence or absence of **any** threatened or endangered species that may affect the operability of the timber sale. Purchasers must rely on their own assessments.

## **Export Restricted**

All timber purchased under these state DNR contracts shall not be exported outside of the United States until the timber has been processed. Purchasers shall not violate any of the prohibitions in WAC 240-15-015 (relating to the prohibitions on export and substitution), WAC 240-15-025 (relating to reporting requirements), and WAC 240-15-030 (relating to enforcement). If purchasers knowingly violate WAC 240-15-015, purchasers shall be barred from bidding on or purchasing export restricted timber as provided.

### **Cover photos**

Timber Sales in this book are from state trust lands, managed to help build K-12 public schools, state universities, colleges, prisons, mental hospitals, the state Capitol; and to support local services in many counties.

**Top left:** State Forest Lands are managed to provide revenue to the counties in which they are located such as the Pacific County Courthouse in South Bend, Washington. Northwest Bridge Company of Portland, Oregon completed construction of the courthouse building in June of 1911. One unusual feature of the historic building is an "art glass dome" that crowns the structure. The courthouse is listed on the National Register of Historic Places.

## **Certification Opportunities for DNR Timber Purchasers**

Certified forests are grown to an approved set of standards which demonstrate environmentally responsible, socially beneficial, and economically viable management practices that promote responsible stewardship and sustainable forestry. This unique commitment to sustainable forestry recognizes that forest landowners play a critical role in ensuring the long-term health and sustainability of our forests.

Forest Stewardship Council (FSC) is an independent, non-profit organization that promotes responsible management of the world's working forests through the development of forest management standards, a voluntary certification system, and trademarks that provide recognition and value to products bearing the FSC label in the marketplace. FSC standards ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way.

Sustainable Forestry Initiative® (SFI) is an independent non-profit organization internationally endorsed and accepted around the world. The SFI program is based on the premise that responsible environmental behavior and sound business decisions can co-exist. Its three-chamber Board of Directors governs all aspects of the SFI program, with equal representation from the environmental, economic and social sectors.

Currently, all Department of Natural Resources (DNR)-managed forested state trust lands in Washington State are certified under the Sustainable Forestry Initiative® (SFI) Standard. Lands within DNR's South Puget Habitat Conservation Plan Planning Unit, located within parts of King, Pierce, Thurston, Lewis, Kitsap, and Mason counties, are dually certified under the Forest Stewardship Council Pacific Coast Regional Standard (FSC) and the SFI Standard.

Certification under each standard (FSC and SFI) involves an inspection audit of the landowner's forest management activities by an independent third-party accredited team to verify that it meets specified forest management principles. If the forest unit complies with the specific standard, the landowner receives a certificate of conformance characterizing their forests as "green." Both standards encourage integration of perpetual growing and harvesting of trees with strong measures to protect wildlife, plants, soil, water, and air quality. Both standards provide a seal of approval that forests certified under these principles are well-managed. The global marketplace recognizes and endorses multiple forest certification standards. Each standard has individual market niches. By being dually certified, DNR can maximize its customer base and provide choices to the consumer.

**Forest Stewardship Council**

DNR's FSC Certificate number is: BV-FM / COC-080501

**SUSTAINABLE FORESTRY INITIATIVE**

DNR's SFI Certificate number is: 164041

DNR-managed forested state trust lands within the South Puget Habitat Conservation Plan Planning Unit (map below), located within parts of King, Pierce, Thurston, Lewis, Kitsap, and Mason counties, are certified as being in compliance with the Forest Stewardship Council Pacific Coast Regional Standard, which would make that planning unit dually certified under both the FSC and SFI Standards.

### **Bidder's/Purchaser's Inspection of Sale Area and Forest Products**

Acreage estimates and volume estimates contained within each timber notice of sale and each timber sale contract are made only for administrative and identification purposes. Except as expressly provided by the timber sale contract, the purchaser shall be responsible for paying the entire purchase price, even if the actual acreage or timber volume varies from the estimated quantity or volume shown.

All prospective bidders have the opportunity and are expected to inspect the sale area and the forest products located thereon. Bidders shall not rely on any representations by the State including, but not limited to, acreage estimates, volume estimates, appraisal or pre-bid documentation. The successful bidder/purchaser will further warrant that they have entered the timber sale contract without any reliance upon the DNR's volume estimates, acreage estimates, appraisals, pre-bid documentation, or any other representation by the DNR.

*Any timber sale contract arising out of these public auctions will require the successful purchaser to warrant that they are entering the timber sale contract based solely upon their own judgment of the value of the forest products, formed after their own examination and inspection of both the timber sale area and the forest products being sold.*

Cut western hemlock 6-9 inches dbh

Cut Douglas-fir 6-14 inches dbh

Compartment F:

**SPECIAL THINNING CONDITIONS:**

Where the prescription would leave an opening of ¼ acre or larger in conifer areas, the purchaser must leave at least one tree per 25 feet that is the largest diameter, largest crown class, best form, and un-damaged. Species preference in order of importance: RC, DF, WH, SF.

Trees of the above minimum specified dbh are required to be cut, but removals specifications are covered under Clause H-150.

Riparian Strategy implementation:

For each riparian thinned acre, 5 trees will be treated to become downed logs or snags according to the Contract Administrator instructions. A map is available that designates the number of trees per riparian zone to be treated.

3 trees per RMZ acre shall be selected from the first 25 to 50 feet outside the “No-harvest” 25-foot zone (marked with white “timber sale boundary tags”) and felled towards the typed water to serve as down wood (DW) as designated by the associated map (Schedule Y) and 2 trees per RMZ acre shall be topped at no less than 20’ or double-girdled. These (5) trees will be selected from the largest prescription trees.

#### Corridors

No trees within the riparian inner zone may be removed. Trees may be cut within the inner zones for corridors, but left on site. Full suspension is required on any typed stream crossing. Any rub trees in the corridors are to be left standing and not felled. Corridor felled trees may count towards required 5 tpa (above) if approved in advance by the Contract Administrator.

#### CERTIFICATION OF FALLERS AND YARDER OPERATORS – SEE CLAUSE H-011 OF THE CONTRACT.

The Contract Administrator and Faller/Harvester Operator will jointly review the take tree selection criteria as outlined in Schedule B of the contract.

In conjunction with the Contract Administrator, the Faller/Harvester Operator will mark a designated area as a test plot within the sale area boundary. Satisfactory thinning of the test plot completes the certification process.

Certifications will be issued to individuals when they demonstrate to the contract Administrator their ability to perform within the requirements set forth in the contract.

Certification may be revoked at any time by the Contract Administrator if the Contract Administrator determines that the prescription is not being implemented properly.

#### DAMAGE COMPARTMENTS:

Determination of damage will be calculated by comparing the percentage of damaged trees to the total number of standing trees. Compartment divisions for assessment of damage are designated on the attached Compartment Map. Use of roads, type of yarding (cable or ground-based) and where yarded wood comes from, are possible criteria to use to determine compartments.

There is a separate map designating damage compartments and the prescription on each compartment.

#### ADDITIONAL CLAUSES:

1. **BARK SLIPPAGE:** Cutting and yarding will not be permitted during the bark slippage season, unless authorized in writing by the Contract Administrator. This season is estimated to run from

April 1 to July 15, but will vary dependent on weather conditions. If permission is granted to operate during the bark slippage season, the Purchaser will be required to provide a plan outlining mitigation measures.

2. No tops or limbs will be allowed to accumulate on any landings. Tops and limbs will be redistributed in the unit or on roads to be abandoned (NM-7706, NM-82 and NM-42 from station 54+01 to 78+09) to the satisfaction of the Contract Administrator.

3. Tracked skidder operation is allowed only during dry periods.

4. All ground-based yarding equipment must operate on a mat of harvested stand's slash.

5. Cable Areas:

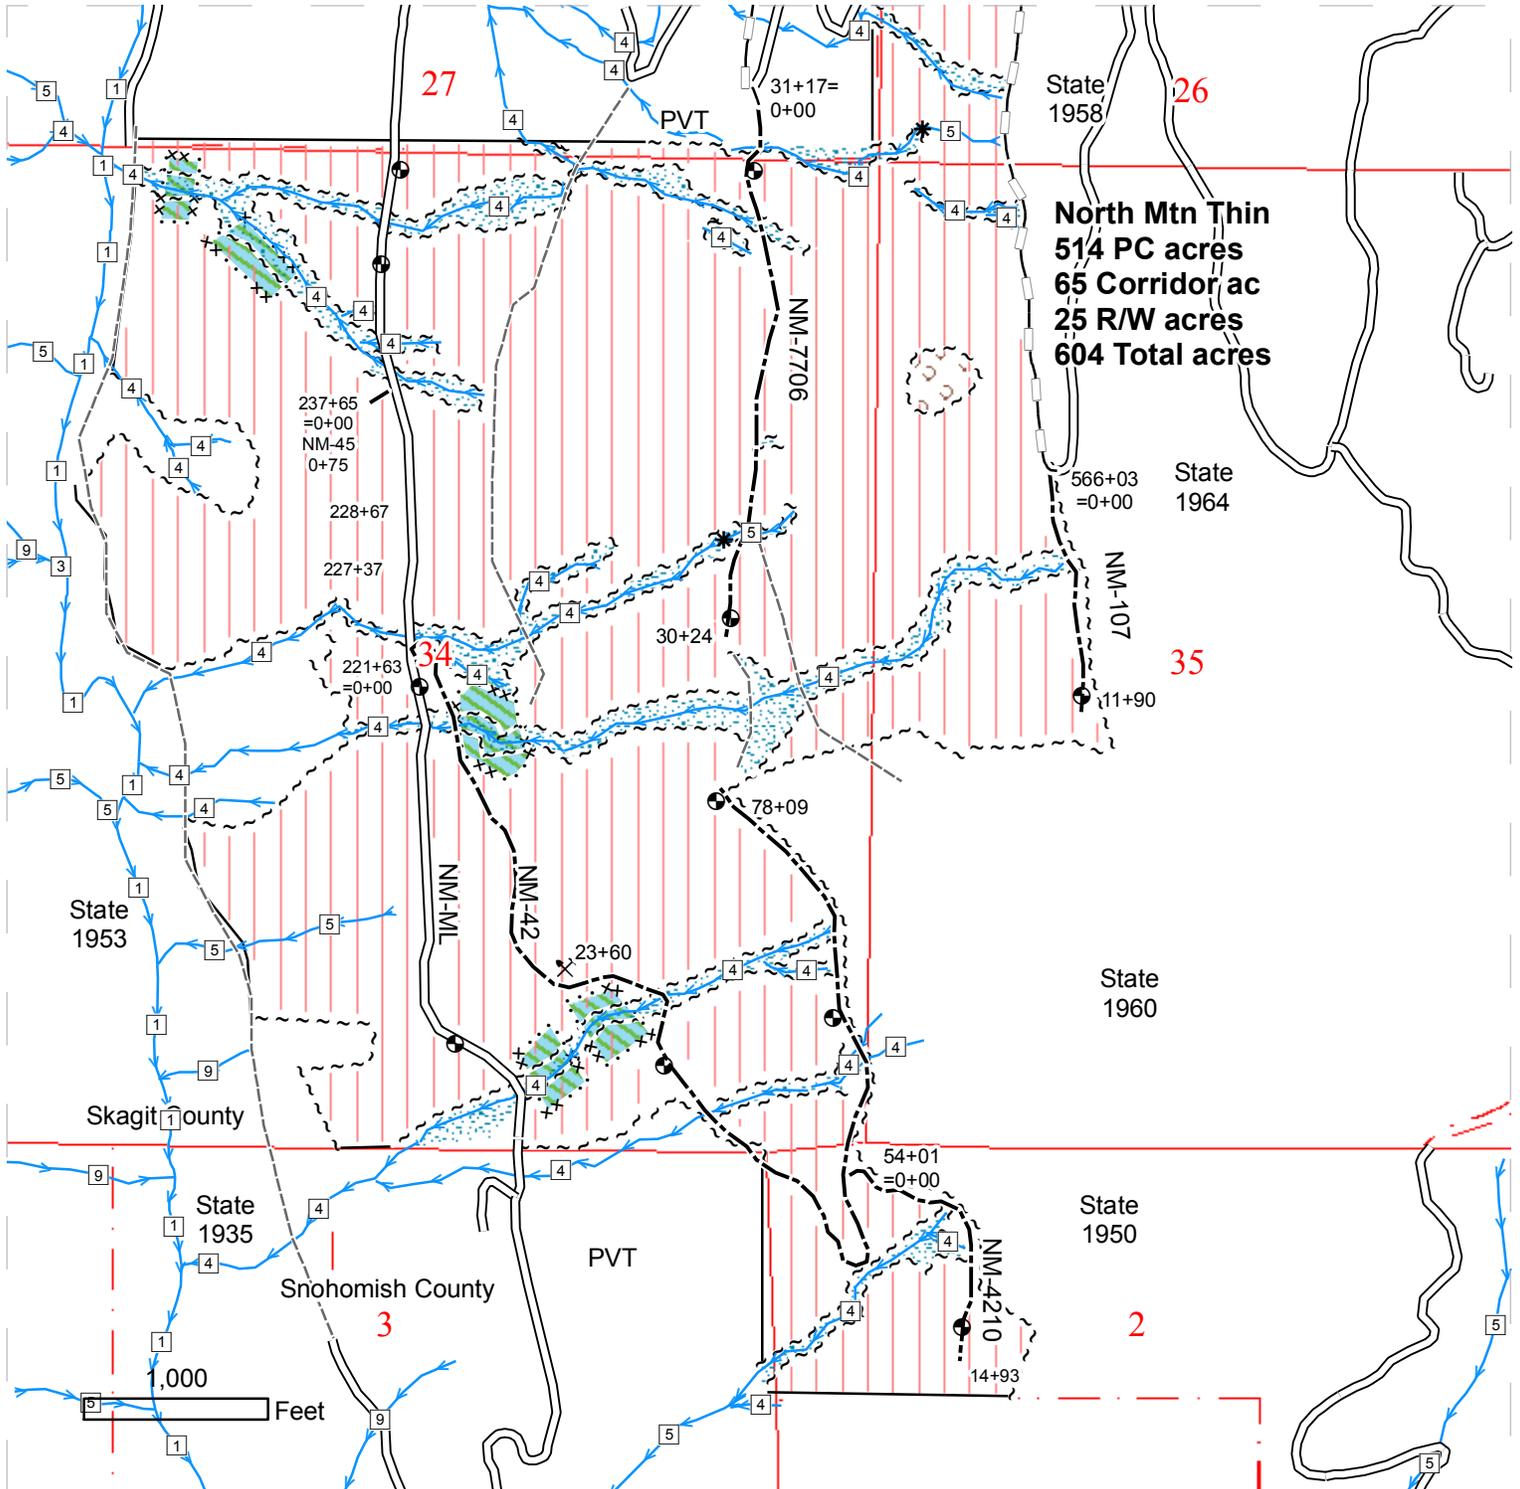

Landings will be located to provide for parallel yarding whenever possible. Corridors will be limited to 12 feet including rub trees. Corridors will be at least 100 feet apart when parallel as measured from the center of the corridors. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. It is not required to remove all leave trees from the 12-foot corridor. Additional corridors will not be permitted unless authorized in writing by the Contract Administrator.

6. Ground-Based Areas: Ground-based yarding corridors will be limited to 14 feet including rub trees and no less than 70 feet apart on slopes less than 30%, unless otherwise authorized in writing by the Contract Administrator.
