Western WA Forested Trust Lands by Trust

1.4 million acres
Trust Responsibilities

As manager of state trust lands, DNR has legal fiduciary responsibilities to:

• Generate revenue and other benefits for each trust, in perpetuity
• Preserve the corpus of the trust
• Exercise reasonable care and skill
• Act prudently to reduce the risk of loss for the trusts
• Maintain undivided loyalty to beneficiaries
• Act impartially with respect to current and future beneficiaries
Board Policies and Other Applicable Laws

Policy for Sustainable Forests
(Multiple state and federal laws)
• Economic Performance
• Forest Ecosystem Health and Productivity
  • Social and Cultural Benefits
  • Implementation

Multiple Use Concept
(Multiples Uses - RCW 79.10.120)

Sustainable Harvest Level
(Sustainable Harvest - RCW 79.10.300-340)

Habitat Conservation Plan
Endangered Species Act
(16 U.S.C. 1531 et seq.)
Board of Natural Resources

The Honorable Hilary Franz, Commissioner of Public Lands

Dan Brown, Ph.D., University of Washington

Jim Cahill, Office of the Governor

Richard Koenig, PH. D. Washington State University

The Honorable Bill Peach, Clallam County Commissioner

The Honorable Chris Reykdal, Superintendent of Public Instruction

Environmental Review Steps
Environmental Review Steps

Determination of Significance

→ EIS Required

→ Conduct scoping

Comment Period October 25th – December 9th

→ Issue a draft EIS for review and public comment

→ Publish a final EIS
Other Sustainable Harvest Calculation Steps

- **Scoping**
  - Public Comment
  - Scoping Summary
- **Draft EIS**
  - Public Comment
- **Final EIS**
  - Comment Summary with Responses
- **Financial Analysis**
  - Provides Financial Projections of Different Alternatives
- **Board of Natural Resources**
  - Approves Sustainable Harvest Level
What is Scoping?
Seek public input to help DNR:

- Narrow the focus of the EIS to significant environmental issues
- Eliminate issues that would have insignificant impacts, or that are not directly related to the proposal
Seek public input to help DNR:

• Identify alternatives to be analyzed in the EIS
• Identify mitigation measures that address potential environmental impacts of the proposal
Sustainable Harvest Calculation
Scoping Notice

DETERMINATION OF SIGNIFICANCE AND REQUEST FOR COMMENTS ON SCOPE OF EIS

Description of proposal: The proposal is to establish a sustainable harvest level for the 2025 to 2034 fiscal year planning decade for forested state trust land in western Washington.

Proponent: Washington Department of Natural Resources (DNR)

Location of proposal: All forested state trust lands located west of the Cascade Crest in Washington State (refer to attached map).

Lead agency: DNR

Determination: Environmental Impact Statement (EIS) required. The lead agency has determined this proposal potentially will have a significant adverse impact on the environment. An EIS is required under Revised Code of Washington (RCW) 43.21C.030(2)(c) and will be prepared.

Deadline for comments: December 9, 2021 by 5:00 pm

Scoping notice invites comments:
Scoping is the first formal step in preparing an EIS and initiates public involvement. Through scoping, DNR seeks public input on identifying the areas that require in-depth analysis, and those areas for which a more limited discussion is appropriate. This process helps to focus DNR’s consideration on the issues that are truly significant, and avoids obscuring those issues with unnecessary detail. The primary purposes of scoping are to:

- Narrow the focus of the EIS to significant environmental issues;
- Eliminate issues that would have insignificant impacts, or that are not directly related to the proposal;
- Identify alternatives to be analyzed in the EIS; and
- Identify mitigation measures that address potential environmental impacts of the proposal.

Scoping notice invites comments:
Scoping is the first formal step in preparing an EIS and initiates public involvement. Through scoping, DNR seeks public input on identifying the areas that require in-depth analysis, and those areas for which a more limited discussion is appropriate. This process helps to focus DNR’s consideration on the issues that are truly significant, and avoids obscuring those issues with unnecessary detail. The primary purposes of scoping are to:

- Narrow the focus of the EIS to significant environmental issues;
- Eliminate issues that would have insignificant impacts, or that are not directly related to the proposal;
- Identify alternatives to be analyzed in the EIS; and
- Identify mitigation measures that address potential environmental impacts of the proposal.
In the EIS, DNR will analyze the No Action Alternative and reasonable action alternatives (to be identified as a result of scoping). Alternatives to be considered in the EIS must meet the following parameters:

- DNR’s trust mandate
- Applicable forest practices rules (Title 222 WAC)
- All other applicable state and federal regulations
- All current DNR policies, including the objectives of the State Trust Lands Habitat Conservation Plan
- Proposed purpose and need statement (attached to this notice)

- Online comment via survey monkey: [https://www.surveymonkey.com/r/WWSHC-25to34](https://www.surveymonkey.com/r/WWSHC-25to34)

Background Information:
In Washington, DNR manages approximately 5.6 million acres of state trust lands. State trust lands are lands held in trust for specific trust beneficiaries, such as public schools and universities. The term “state trust lands” refers to both State lands and State forest lands:

- State lands (RCW 79.02.010(14)) are lands granted to the state by the federal government at statehood. State lands are also referred to as Federal Grant Lands.
- State forest lands (RCW 79.02.010(13)) are lands acquired by Washington State from the counties. There are two types: State Forest Purchase Lands, which are lands purchased or acquired by the state as a gift, and State Forest Transfer Lands, which are lands transferred to the state from the counties.

As a trust lands manager, DNR’s responsibility is to manage these lands consistent with fiduciary principles, which include producing a perpetual supply of revenue for specific trust beneficiaries. On forested state trust lands, revenue is produced primarily through the harvesting of trees.
Proposal
Western Washington Sustainable Harvest Calculation Proposal

The proposal is to establish a sustainable harvest level for the 2025 to 2034 planning decade for forested state trust lands in western Washington.
Western WA Sustainable Harvest Calculation Scoping Proposal: Purpose

The purpose of the proposal is to recalculate a sustainable harvest level consistent with DNR policies, including the Policy for the Sustainable Forests, the 1997 HCP, and applicable local, state, and federal laws.
Western WA
Sustainable Harvest Calculation Proposal: Need

DNR needs to calculate a new sustainable harvest level and determine the best course of action regarding arrearage, if one exists, consistent with state law and DNR policy.
Objective 1

Incorporate new information into an updated forest estate model to calculate the sustainable harvest level that will inform the Board of Natural Resources when setting the decadal harvest level.
Western WA Sustainable Harvest Calculation Proposal: Objective 2

Consider climate change as part of the affected environment, analyze climate change impacts and benefits of the alternatives, and identify possible mitigation measures that will reduce or eliminate any identified adverse environmental climate change impacts of the proposal.
Western WA Sustainable Harvest Calculation Proposal: Objective 3

Ensure alternatives analyzed are reasonable, feasible, and consistent with DNR’s trust management obligations, existing DNR policies, and applicable local, state, and federal laws.
Environmental Review Steps

1. **Determination of Significance**
2. **EIS Required**
3. **Conduct scoping**
   - **Comment Period October 25th – December 9th**
4. **Issue a draft EIS for review and public comment**
5. **Publish a final EIS**
Providing Comments
Sustainable Harvest Calculation
Scoping: Providing Comments

Description of the proposal

• Is the proposal clearly described?
  • If not, why not?

• Is the need and purpose statement clearly described?
  • If not, why not? What needs to be added/deleted?
Sustainable Harvest Calculation
Scoping: Providing Comments

Additional Information

• Alternatives to be considered that meet the purpose and need of the proposal

• Identification of additional environmental information, to support comments, such as peer reviewed studies or reports
Sustainable Harvest Calculation
Scoping: Providing Comments

Environmental Impacts
• Specific mitigation measures that DNR should consider to avoid or minimize impacts

Elements to be included in the EIS
• Identify elements of the environment that may be significantly impacted by the proposal and should be considered for analysis in the EIS
• WAC 197-11-444

Environmental Justice Considerations
• Overburdened communities and vulnerable populations
