

# Forest Health Advisory Committee Monitoring Sub-Committee

# Monitoring Goals

1. Develop metrics and a monitoring framework that effectively and consistently tracks implementation across multiple ownerships.
2. Distribute and share results of monitoring work and use the results to better tell the story of 20-Year FHSP.
3. Convene partners and coordinate monitoring activities.

# Next Steps

1. **Develop Forest Health Tracking System**
2. **Narrow down specific questions to focus monitoring efforts.**
3. **Organize a presentation to share monitoring framework with partners working at project scale (Fall 2019).**
4. **Evaluate how monitoring data can help stakeholder better understand co-benefits of treatments to other resource values (e.g. water)**
5. **Identify questions for future research**

# Forest Health Advisory Committee Communications and Community Engagement Sub-Committee

# Goals

1. Enable effective partner communications through leadership and support at multiple scales.
2. Support collaborative development of strategic communications.
3. Disseminate and share tools and resources that advance more coordinated communications.

# Activities

1. Communications Plan
2. Toolkit and Inventory
3. Provide input and advice to DNR on development of communications RFP focused on non-industrial landowners.

# Additional Questions for Feedback

- How do we best reach small, non-industrial private landowners and underserved communities and encourage them to be partners in fuel reduction and defensible space work?
- How do we better coordinate effective and efficient delivery of information about relevant programs and resources to partner organizations, agencies, and other relevant interests?
